Content

Oral communication

Innovative technology in contemporary stained-glass design: Photovoltaic solar cells and LED lamps in some of my recent creations

J. Caen

The hot state combination of glass and ceramics in artistic studio practice

J. Kelly

Recent developments with CO₂ laser engraving and enamel painting for the artist

R. Wiley

Characterization of an ovoid glass object with anthropomorphic reliefs

M. Vilarigues, C. Villamariz, A. Lima, R. Wiley, V. Corregidor, L.C. Alves

The application of ion exchangers as a cleaning method for medieval stained glass, using window S XIV of the Cathedral of Seville as an example

M. Kleine, C. Heidrich

Development and design of repair and protection principles and a concrete repair mortar for the conservation of slab glass set in concrete from the 20th century

M. Ünal, H.-C. Kühne, M. Kleine, C. Sander

The history of Pyrex cast glass block and its conservation issues

M. Jablonski

Gold mosaics – material composites and glass-chemical characteristics

M. Raedel, B. Unger, M. Buecker, M. Sabel, I. Feldmann

On the use of a purely inorganic sealant for low-temperature sealing of ancient glass

M. Krauß, G. Leopoldsberger, M. Kilo

The consolidation of cracks in architectural glass and Dalle de Verre: First assessment of possible adhesives

K. De Vis, P. Jacobs, K. Janssens, J. Caen

The corrosion phenomenon of internal fractures on stained glass windows - An analysis and conservation study

K. Wittstadt

Chartres Cathedral stained glass observed through micro-computed X-ray tomography and various analytical tools

Re-treatability investigations of weathered stained glass windows by means of micro focus X-ray CT and phase contrast CT

J. Dewanckele, F. Zanini, N. Sodini, A. Vichi, J. Caen, P. Jacobs

Color matching software for designers and glass industry: A unique tool used in glass art, design and conservation

P. Jokela, L. Grund, P. Sundberg

Non-invasive Vis-NIR spectroscopic characterisation of historical glasses: Advantages and drawbacks

S. Bracci, M. Picollo, M. Bacci, C. Cucci

Study of European ancient mirrors using micro diffraction techniques and Mössbauer spectroscopy

L. K. Herrera, A. Justo, A. Muñoz-Páez, J.L. Perez-Rodríguez, A. Lerf, F. E. Wagner

Restoration and reconstruction of historic windows in combination with creative and artistic elements

W. Peters, J. Peters

The apsis window in the Neumünster, Würzburg, and its invisible UV-protective glazing

A. Kaiser, M. Rothkegel

Non-destructive characterisation of glasses and grisailles from Segovia Cathedral stained glass windows

Contemporary stained glass using luminescent materials

F. Quintas, A. Ruivo, C. Queiroz, A. Pires de Matos

Luminescent enamels: palette of colours - An interface between art/science in the creation of glass works

T. Almeida, A. Ruivo, A. Pires de Matos

Aging of PLS-glass: Study of the alteration phenomena

L. de Ferri, D. Bersani, Ph. Colomban, P.P. Lottici, G. Simon, G. Vezzalini

Thermoluminescence dating of core-formed glass - A scientific method for the authentication of early glass artefacts

R. Riens

Looking into the opaque: 3D-CT and the making of roman ribbed bowls

D.S. Straub, G. Eggert

The manufacturing of mouth-blown glass

R. Meindl
