Table of Contents – Part I

Robotics, Localization and Tracking and Visualization I

Unified Detection and Tracking in Retinal Microsurgery .................. 1
Raphael Sznitman, Anasuya Basu, Rogerio Richa, Jim Handa,
Peter Gehlbach, Russell H. Taylor, Bruno Jedynak, and
Gregory D. Hager

Graph-Based Geometric-Iconic Guide-Wire Tracking .................... 9
Nicolas Honnorat, Régis Vaillant, and Nikos Paragios

Deformable Registration of Bronchoscopic Video Sequences to CT
Volumes with Guaranteed Smooth Output .............................. 17
Tobias Reichl, Xiongbiao Luo, Manuela Menzel, Hubert Hautmann,
Kensaku Mori, and Nassir Navab

MR-Based Real Time Path Planning for Cardiac Operations with
Transapical Access .................................................. 25
Erol Yeniaras, Nikhil V. Navkar, Ahmet E. Sonmez, Dipan J. Shah,
Zhigang Deng, and Nikolaos V. Tsekos

Steerable Intravitreal Inserts for Drug Delivery: In Vitro and Ex Vivo
Mobility Experiments ............................................. 33
Christos Bergeies, Michael P. Kummer, Bradley E. Kratochvil,
Carsten Framme, and Bradley J. Nelson

Distance Measurement in Middle Ear Surgery Using a
Telemanipulator .................................................... 41
Thomas Maier, Gero Strauss, Franz Bauer, Andreas Grasser,
Nobuhiko Hata, and Tim C. Lueth

An Instantiability Index for Intra-operative Tracking of 3D Anatomy
and Interventional Devices ........................................ 49
Su-Lin Lee, Celia Riga, Lisa Crowie, Mohamad Hamady,
Nick Cheshire, and Guang-Zhong Yang

Automatic Tracking of an Organ Section with an Ultrasound Probe:
Compensation of Respiratory Motion ............................... 57
Caroline Nadeau, Alexandre Krupa, and Jacques Gangloff

3D Ocular Ultrasound Using Gaze Tracking on the Contralateral Eye:
A Feasibility Study ................................................ 65
Narges Afsham, Mohammad Najafi, Purang Abolmaesumi, and
Robert Rohling
XXIV Table of Contents – Part I

Interactive 3D Visualization of a Single-View X-Ray Image .......................... 73
  Matthias Wieczorek, André Aichert, Pascal Fallavollita, Oliver Kutter, Ahmad Ahmadi, Lejing Wang, and Nassir Navab

Augmented Reality System for Oral Surgery Using 3D Auto Stereoscopic Visualization .................................................. 81
  Huy Hoang Tran, Hideyuki Suenaga, Kenta Kuwana, Ken Masamune, Takeyoshi Dohi, Susumu Nakajima, and Hongen Liao

Dense Surface Reconstruction for Enhanced Navigation in MIS ............. 89
  Johannes Totz, Peter Mountney, Danail Stoyanov, and Guang-Zhong Yang

Compressed Sensing Based 3D Tomographic Reconstruction for Rotational Angiography ..................................................... 97
  Hélène Langet, Cyril Riddell, Yves Trouset, Arthur Tenenhaus, Elisabeth Lahalle, Gilles Fleury, and Nikos Paragios

Real-Time 4D Ultrasound Mosaicing and Visualization .......................... 105
  Laura J. Brattain and Robert D. Howe

Robotics, Localization and Tracking and Visualization II

Robotic Hair Harvesting System: A New Proposal ................................. 113
  Xiang Lin, Toji Nakazawa, Ryuya Yasuda, Etsuko Kobayashi, Ichiro Sakuma, and Hongen Liao

Direct Surgeon Control of the Computer in the Operating Room ............ 121
  Dumitru Onceanu and A. James Stewart

Learning Gestures for Customizable Human-Computer Interaction in the Operating Room ......................................................... 129
  Loren Arthur Schwarz, Ali Bigdelou, and Nassir Navab

Interventional Radiology Robot for CT and MRI Guided Percutaneous Interventions ............................................................ 137
  Nikolai Hungr, Céline Fouard, Adeline Robert, Ivan Bricault, and Philippe Cinquin

Spatio-Temporal Registration of Multiple Trajectories ............................ 145
  Nicolas Padoy and Gregory D. Hager

A Non-disruptive Technology for Robust 3D Tool Tracking for Ultrasound-Guided Interventions ........................................... 153
  Jay Mung, Francois Vignon, and Ameet Jain
Image-Based Device Tracking for the Co-registration of Angiography and Intravascular Ultrasound Images ............................................. 161
  
  Peng Wang, Terrence Chen, Olivier Ecabert, Simone Prummer, Martin Ostermeier, and Dorin Comaniciu

 Robotics, Localization and Tracking and Visualization III

Nonmetallic Rigid–Flexible Outer Sheath with Pneumatic Shapelocking Mechanism and Double Curvature Structure ............................................. 169
  
  Siyang Zuo, Ken Masamune, Kenta Kuwana, Morimasa Tomikawa, Satoshi Ieiri, Takeshi Ohdaira, Makoto Hashizume, and Takeyoshi Dohi

3D Stent Recovery from One X-Ray Projection ............................................. 178
  

Augmented Virtuality for Arthroscopic Knee Surgery ............................................. 186
  
  John M. Li, Davide D. Bardana, and A. James Stewart

Bronchoscopy Navigation Beyond Electromagnetic Tracking Systems: A Novel Bronchoscope Tracking Prototype ............................................. 194
  
  Xiongbiao Luo, Takayuki Kitasaka, and Kensaku Mori

3D Tracking of Laparoscopic Instruments Using Statistical and Geometric Modeling ............................................. 203
  
  Rémi Wolf, Josselin Duchateau, Philippe Cinquin, and Sandrine Voros

Tracking and Characterization of Fragments in a Beating Heart Using 3D Ultrasound for Interventional Guidance ............................................. 211
  
  Paul Thienphrapa, Haytham Elhawary, Bharat Ramachandran, Douglas Stanton, and Aleksandra Popovic

Planning and Image Guidance

Model-Based Fusion of Multi-modal Volumetric Images: Application to Transcatheter Valve Procedures ............................................. 219
  
  Saša Grbić, Razvan Ionasec, Yang Wang, Tommaso Mansi, Bogdan Georgescu, Matthias John, Jan Boese, Yefeng Zheng, Nassir Navab, and Dorin Comaniciu

1D–3D Registration for Functional Nuclear Imaging ............................................. 227
  
  Christoph Vetter, Tobias Lasser, Thomas Wendler, and Nassir Navab
Towards Real-Time 3D US to CT Bone Image Registration Using Phase and Curvature Feature Based GMM Matching

Anna Brounstein, Ilker Hacihaliloglu, Pierre Guy, Antony Hodgson, and Rafeef Abugharbieh

Robust and Fast Contrast Inflow Detection for 2D X-ray Fluoroscopy

Terrence Chen, Gareth Funka-Lea, and Dorin Comaniciu

Generation of 4D Access Corridors from Real-Time Multislice MRI for Guiding Transapical Aortic Valvuloplasties

N.V. Navkar, E. Yeniaras, D.J. Shah, N.V. Tsekos, and Z. Deng

Automatic Trajectory Planning of DBS Neurosurgery from Multi-modal MRI Datasets

Silvain Bériault, Fahd Al Subaie, Kelvin Mok, Abbas F. Sadikot, and G. Bruce Pike

Automated Planning of Computer Assisted Mosaic Arthroplasty

Jiro Inoue, Manuela Kunz, Mark B. Hurtig, Stephen D. Waldman, and A. James Stewart

Model-Updated Image-Guided Minimally Invasive Off-Pump Transcatheter Aortic Valve Implantation

Mohamed Esmail Karar, Matthias John, David Holzhey, Volkmar Falk, Friedrich-Wilhelm Mohr, and Oliver Burgert

Real-Time 3D Ultrasound Guided Interventional System for Cardiac Stem Cell Therapy with Motion Compensation

Vijay Parthasarathy, Charles Hatt, Zoran Stankovic, Amish Raval, and Ameet Jain

Towards Intra-operative Prostate Brachytherapy Dosimetry Based on Partial Seed Localization in Ultrasound and Registration to C-arm Fluoroscopy

Mehdi Moradi, S. Sara Mahdavi, Sanchit Deshmukh, Julio Lobo, Ehsan Dehghan, Gabor Fichtinger, William J. Morris, and Septimiu E. Salcudean

Effects of Ultrasound Section-Thickness on Brachytherapy Needle Tip Localization Error

Mohammad Peikari, Thomas Kuiran Chen, Andras Lasso, Tamas Heffter, and Gabor Fichtinger

Quantifying Stranded Implant Displacement Following Prostate Brachytherapy

Julio Lobo, Mehdi Moradi, Nick Chng, Ehsan Dehghan, Gabor Fichtinger, William J. Morris, and Septimiu E. Salcudean
Physical Modeling and Simulation I

Preconditioner-Based Contact Response and Application to Cataract Surgery .......................... 315
   Hadrien Courtecuisse, Jérémie Allard, Christian Duriez, and Stéphane Cotin

Layered Surface Fluid Simulation for Surgical Training .................. 323
   Louis Borgeat, Philippe Massicotte, Guillaume Poirier, and Guy Godin

An Application-Dependent Framework for the Recognition of High-Level Surgical Tasks in the OR .............. 331
   Florent Lalys, Laurent Riffaud, David Bouget, and Pierre Jannin

Biomechanical Simulation of Electrode Migration for Deep Brain Stimulation ........................................ 339
   Alexandre Bilger, Jérémie Dequidt, Christian Duriez, and Stéphane Cotin

Hemodynamic Simulation for an Anatomically Realistic Portal System ........................................ 347
   Harvey Ho, Adam Bartlett, and Peter Hunter

Virtual Coiling of Intracranial Aneurysms Based on Dynamic Path Planning ........................................ 355
   Hernán G. Morales, Ignacio Larrabide, Minsuok Kim, Maria-Cruz Villa-Uriol, Juan M. Macho, Jordi Blasco, Luis San Roman, and Alejandro F. Frangi

Time Domain Simulation of Harmonic Ultrasound Images and Beam Patterns in 3D Using the k-space Pseudospectral Method .............. 363
   Bradley E. Treeby, Mustafa Tumen, and B.T. Cox

Ultrasound Elastography Using Three Images ...................... 371
   Hassan Rivaz, Emad M. Boctor, Michael A. Choti, and Gregory D. Hager

Monitoring of Tissue Ablation Using Time Series of Ultrasound RF Data ........................................ 379
   Farhad Imani, Mark Z. Wu, Andras Lasso, Everett C. Burdette, Mohammad Daoud, Gabor Fitchinger, Purang Abolmaesumi, and Parvin Mousavi

Evaluation of in vivo Liver Tissue Characterization with Spectral RF Analysis versus Elasticity .................. 387
   Stéphane Audière, Elsa D. Angelini, Maurice Charbit, and Véronique Miette
Towards Extra-Luminal Blood Detection from Intravascular Ultrasound
Radio Frequency Data .................................................. 396
E. Gerardo Mendizabal-Rutz, George Biros, and
Ioannis A. Kakadiaris

Physical Modeling and Simulation II

Physiologically Based Construction of Optimized 3-D Arterial Tree
Models ................................................................. 404
Matthias Schneider, Sven Hirsch, Bruno Weber, and Gábor Székely

Cortical Surface Strain Estimation Using Stereovision ............... 412
Songbai Ji, Xiaoyao Fan, David W. Roberts, and Keith D. Paulsen

A Comparative Study of Physiological Models on Cardiac Deformation
Recovery: Effects of Biomechanical Constraints ...................... 420
Ken C.L. Wong, Linwei Wang, Huafeng Liu, and Pengcheng Shi

Motion Tracking and Strain Map Computation for Quasi-Static
Magnetic Resonance Elastography .................................... 428
Y.B. Fu, C.K. Chui, C.L. Teo, and E. Kobayashi

Blood Flow Computation in Phase-Contrast MRI by Minimal Paths in
Anisotropic Media ................................................... 436
Michael Schwenke, Anja Hennemuth, Bernd Fischer, and Ola Friman

Finding the Optimal Compression Level for Strain-Encoded (SENC)
Breast MRI; Simulations and Phantom Experiments .................. 444
Ahmed A. Harouni, Michael A. Jacobs, and Nael F. Osman

Towards Patient-Specific Finite-Element Simulation of MitralClip
Procedure ............................................................... 452
T. Mansi, I. Voigt, E. Assoumou Mengue, R. Ionasec, B. Georgescu,
T. Noack, J. Seeburger, and D. Comaniciu

Model-Based Deformable Registration of Preoperative 3D to
Intraoperative Low-Resolution 3D and 2D Sequences of MR Images.. 460
Bahram Marami, Shahin Sirouspour, and David W. Capson

Using High Resolution Cardiac CT Data to Model and Visualize
Patient-Specific Interactions between Trabeculae and Blood Flow ... 468
Scott Kulp, Mingchen Gao, Shaoting Zhang, Zhen Qian,
Szilard Voros, Dimitris Metaxas, and Leon Axel

Motion Correction and Parameter Estimation in dceMRI Sequences:
Application to Colorectal Cancer .................................... 476
Manav Bhushan, Julia A. Schnabel, Laurent Risser,
Mattias P. Heinrich, J. Michael Brady, and Mark Jenkinson
Sparse Dose Painting Based on a Dual-Pass Kinetic-Oxygen Mapping of Dynamic PET Images .............................................. 484  
*Kuangyu Shi, Sabrina T. Astner, Liang Sun, Nassir Navab, Fridtjof Nüsslin, Peter Vaupel, and Jan J. Wilkens*

Robust Estimation of Kinetic Parameters in Dynamic PET Imaging .... 492  
*Fei Gao, Huafeng Liu, and Pengcheng Shi*

Synthetic Echocardiographic Image Sequences for Cardiac Inverse Electro-Kinematic Learning ...................................... 500  
*Adityo Prakosa, Maxime Sermesant, Hervé Delingette, Eric Saloux, Pascal Allain, Pascal Cathier, Patrick Etyngier, Nicolas Villain, and Nicholas Ayache*

**Motion Modeling and Compensation**

Automatic Prone to Supine Haustral Fold Matching in CT Colonography Using a Markov Random Field Model .................... 508  
*Thomas Hampshire, Holger Roth, Mingzong Hu, Darren Boone, Greg Slabaugh, Shonit Punwani, Steve Halligan, and David Hawkes*

Detecting Patient Motion in Projection Space for Cone-Beam Computed Tomography .................................................. 516  
*Wolfgang Wein and Alexander Ladikos*

Multi-feature Statistical Nonrigid Registration Using High-Dimensional Generalized Information Measures ...................... 524  
*Sameh Hamrouni, Nicolas Rougon, and Françoise Prêteux*

Estimating the 4D Respiratory Lung Motion by Spatiotemporal Registration and Building Super-Resolution Image .................. 532  
*Guorong Wu, Qian Wang, Jun Lian, and Dinggang Shen*

Combined Cardiac and Respiratory Motion Compensation for Atrial Fibrillation Ablation Procedures ............................... 540  
*Alexander Brost, Wen Wu, Martin Koch, Andreas Wimmer, Terrence Chen, Rui Liao, Joachim Hornegger, and Norbert Strobel*

Estimation of Delivered Dose in Radiotherapy: The Influence of Registration Uncertainty ............................................ 548  
*Petter Risholm, James Balter, and William M. Wells*

Deformable Registration of High-Resolution and Cine MR Tongue Images .......................................................... 556  
*Maureen Stone, Jerry L. Prince, and Jonghye Woo*

# Table of Contents – Part II

## Diffusion Weighted Imaging I

Longitudinal Change Detection: Inference on the Diffusion Tensor Along White-Matter Pathways ......................................................... 1  
  Antoine Grigis, Vincent Noblet, Frédéric Blanc, Fabrice Heitz,  
  Jérôme de Seze, and Jean-Paul Armspach

Voxelwise Multivariate Statistics and Brain-Wide Machine Learning Using the Full Diffusion Tensor ....................................................... 9  
  Anne-Laure Fouque, Pierre Fillard, Anne Bargiacchi,  
  Arnaud Cachia, Monica Zilbovicius, Benjamin Thyeau,  
  Edith Le Floch, Philippe Ciuciu, and Edouard Duchesnay

Fiber Modeling and Clustering Based on Neuroanatomical Features .... 17  
  Qian Wang, Pew-Thai Yap, Guorong Wu, and Dinggang Shen

Probabilistic Clustering and Shape Modelling of White Matter Fibre Bundles Using Regression Mixtures ............................................. 25  
  Nagulan Ratnarajah, Andy Simmons, and Ali Hojjatoleslami

Integrated Parcellation and Normalization Using DTI Fasciculography ................................................................. 33  
  Hon Pong Ho, Fei Wang, Xenophon Papademetris,  
  Hilary P. Blumberg, and Lawrence H. Staib

Predicting Functional Brain ROIs via Fiber Shape Models ............... 42  
  Tuo Zhang, Lei Guo, Kaiming Li, Dajing Zhu, Guangbin Cui, and  
  Tianming Liu

Predictive Modeling of Cardiac Fiber Orientation Using the Knutsson Mapping .................................................................................. 50  
  Karim Lekadir, Babak Ghafaryasal, Emma Muñoz-Moreno,  
  Constantine Butakoff, Corné Hoogendoorn, and Alejandro F. Frangi

Sparse Multi-Shell Diffusion Imaging .................................................. 58  
  Yogesh Rathi, O. Michailovich, K. Setsompop, S. Bouix,  
  M.E. Shenton, and Carl-Fredrik Westin

Longitudinal Tractography with Application to Neuronal Fiber Trajectory Reconstruction in Neonates .................................................. 66  
  Pew-Thai Yap, John H. Gilmore, Weili Lin, and Dinggang Shen
Quantitative Body DW-MRI Biomarkers Uncertainty Estimation Using Unscented Wild-Bootstrap .................................................. 74

Axon Diameter Mapping in Crossing Fibers with Diffusion MRI .......... 82
Hui Zhang, Tim B. Dyrby, and Daniel C. Alexander

Detecting Structure in Diffusion Tensor MR Images .................... 90
K. Krishna Nand, Rafeef Abugharbieh, Brian G. Booth, and Ghassan Hamarneh

Diffeomorphism Invariant Riemannian Framework for Ensemble Average Propagator Computing............................................. 98
Jian Cheng, Aurobrata Ghosh, Tianzi Jiang, and Rachid Deriche

Assessment of Bias for MRI Diffusion Tensor Imaging Using SIMEX ... 107
Carolyn B. Lauzon, Andrew J. Asman, Ciprian Crainiceanu, Brian C. Caffo, and Bennett A. Landman

Diffusion Weighted Imaging II
Impact of Radial and Angular Sampling on Multiple Shells Acquisition in Diffusion MRI ...................................................... 116
Sylvain Merlet, Emmanuel Caruyer, and Rachid Deriche

Super-Resolution in Diffusion-Weighted Imaging .......................... 124
Benoit Scherrer, Ali Gholipour, and Simon K. Warfield

Reconstruction of Fiber Trajectories via Population-Based Estimation of Local Orientations ................................................. 133
Pew-Thian Yap, John H. Gilmore, Weili Lin, and Dinggang Shen

Segmenting Thalamic Nuclei: What Can We Gain from HARDI? ...... 141
Thomas Schultz

Resting State fMRI-Guided Fiber Clustering ............................... 149
Bao Ge, Lei Guo, Jinglei Lv, Xintao Hu, Junwei Han, Tuo Zhang, and Tianming Liu

Apparent Intravoxel Fibre Population Dispersion (FPD) Using Spherical Harmonics ......................................................... 157
Haz-Edine Assemal, Jennifer Campbell, Bruce Pike, and Kaleem Siddiqi

Feasibility and Advantages of Diffusion Weighted Imaging Atlas Construction in Q-Space .................................................... 166
Thijs Dhollander, Jelle Veraart, Wim Van Hecke, Frederik Maes, Stefan Sunaert, Jan Sijbers, and Paul Suetens
Susceptibility Distortion Correction for Echo Planar Images with Non-uniform B-Spline Grid Sampling: A Diffusion Tensor Image Study ................................................................. 174
  M.O. Irfanoglu, L. Walker, S. Sammet, C. Pierpaoli, and R. Machiraju

Probabilistic ODF Estimation from Reduced HARDI Data with Sparse Regularization .................................................. 182
  Antonio Tristán-Vega and Carl-Fredrik Westin

Sheet-Like White Matter Fiber Tracts: Representation, Clustering, and Quantitative Analysis ........................................ 191
  Mahnaz Maddah, James V. Miller, Edith V. Sullivan, Adolf Pfefferbaum, and Torsten Rohlfing

Diffusion Tensor Image Registration with Combined Tract and Tensor Features .......................................................... 200
  Qian Wang, Pew-Thian Yap, Guorong Wu, and Dinggang Shen

Probabilistic Tractography Using Q-Ball Modeling and Particle Filtering ............................................................... 209
  Julien Pontabry and François Rousseau

Bessel Fourier Orientation Reconstruction: An Analytical EAP Reconstruction Using Multiple Shell Acquisitions in Diffusion MRI ........... 217
  Ameer Pasha Hosseinzor, Moo K. Chung, Yu-Chien Wu, and Andrew L. Alexander

Parallel MRI Noise Correction: An Extension of the LMMSE to Non Central χ Distributions .............................................. 226
  Véronique Brion, Cyril Poupon, Olivier Riff, Santiago Aja-Fernández, Antonio Tristán-Vega, Jean-François Mangin, Denis Le Bihan, and Fabrice Poupon

HARDI Based Pattern Classifiers for the Identification of White Matter Pathologies ......................................................... 234

fMRI

Detrend-Free Hemodynamic Data Assimilation of Two-Stage Kalman Estimator ........................................................... 242
  Hu Zhenghui and Shi Pengcheng

Fiber-Centered Granger Causality Analysis ........................................ 251
  Xiang Li, Kaiming Li, Lei Guo, Chulwoo Lim, and Tianming Liu
Variational Solution to the Joint Detection Estimation of Brain Activity in fMRI ....................................................... 260
   Lofti Chaari, Florence Forbes, Thomas Vincent, Michel Dojat, and Philippe Ciuciu

Adaptively and Spatially Estimating the Hemodynamic Response Functions in fMRI .................................................. 269
   Jiaping Wang, Hongtu Zhu, Jianqing Fan, Kelly Giovanello, and Weili Lin

Identification of Individuals with MCI via Multimodality Connectivity Networks ......................................................... 277
   Chong-Yaw Wee, Pew-Thian Yap, Daoqiang Zhang, Kevin Denny, Lihong Wang, and Dinggang Shen

Connectivity-Informed fMRI Activation Detection ................................................. 285
   Bernard Ng, Rafeef Abugharbieh, Gael Varoquaux, Jean Baptiste Poline, and Bertrand Thirion

A Stochastic Linear Model for fMRI Activation Analyses ................................. 293
   Leigh A. Johnston, Maria Gavrilescu, and Gary F. Egan

Statistical Analysis and Shape Modelling I

Computing the Shape of Brain Networks Using Graph Filtration and Gromov-Hausdorff Metric ........................................... 302
   Hyekyoung Lee, Moo K. Chung, Hyejin Kang, Boong-Nyun Kim, and Dong Soo Lee

Model-Driven Harmonic Parameterization of the Cortical Surface ............... 310
   Guillaume Auzias, Julien Lefèvre, Arnaud Le Troter, Clara Fischer, Matthieu Perrot, Jean Régis, and Olivier Coulon

Assessing Regularity and Variability of Cortical Folding Patterns of Working Memory ROIs ........................................ 318
   Hanbo Chen, Tuo Zhang, Kaiming Li, Xintao Hu, Lei Guo, and Tianming Liu

Conformal Metric Optimization on Surface (CMOS) for Deformation and Mapping in Laplace-Beltrami Embedding Space .................. 327
   Yonggang Shi, Rongjie Lai, Raja Gill, Daniel Pelletier, David Mohr, Nancy Sicotte, and Arthur W. Toga

Area-Preserving Surface Flattening Using Lie Advection .......................... 335
   Guangyu Zou, Jiaxi Hu, Xianfeng Gu, and Jing Hua

Non-parametric Population Analysis of Cellular Phenotypes .................. 343
   Shantanu Singh, Firdaus Janoos, Thierry Pécot, Enrico Caserta, Kun Huang, Jens Rittscher, Gustavo Leone, and Raghu Machiraju

## Table of Contents – Part III

### Computer Aided Diagnosis and Machine Learning I

**Sliding Window and Regression Based Cup Detection in Digital Fundus Images for Glaucoma Diagnosis** .......................................................... 1  
*Yanwu Xu, Dong Xu, Stephen Lin, Jiang Liu, Jun Cheng, Carol Y. Cheung, Tin Aung, and Tien Yin Wong*

**Learning from Only Positive and Unlabeled Data to Detect Lesions in Vascular CT Images** ................................................................. 9  
*Maria A. Zuluaga, Don Hush, Edgar J.F. Delgado Leyton, Marcela Hernández Hoyos, and Maciej Orkisz*

**Regularized Tensor Factorization for Multi-Modality Medical Image Classification** .......................................................... 17  
*Nematollah Batmanghelich, Aoyan Dong, Ben Taskar, and Christos Davatzikos*

**Detection, Grading and Classification of Coronary Stenoses in Computed Tomography Angiography** .................................................. 25  
*B. Michael Keim, Sushil Mittal, Yefeng Zheng, Alexey Tsymbal, Dominik Bernhardt, Fernando Vega-Higuera, S. Kevin Zhou, Peter Meer, and Dorin Comaniciu*

**Aggregated Distance Metric Learning (ADM) for Image Classification in Presence of Limited Training Data** .............................................. 33  
*Gaoyu Xiao and Anant Madabhushi*

**Sparse Classification for Computer Aided Diagnosis Using Learned Dictionaries** .......................................................... 41  
*Meizhu Liu, Le Lu, Xiaojing Ye, Shipeng Yu, and Marcos Salganicoff*

**A Discriminative-Generative Model for Detecting Intravenous Contrast in CT Images** .......................................................... 49  
*Antonio Criminisi, Krishna Juluru, and Sayan Pathak*

**Classification of Alzheimer’s Disease Using a Self-Smoothing Operator** .......................................................... 58  
*Juan Eugenio Iglesias, Jiayan Jiang, Cheng-Yi Liu, Zhuowen Tu, and ADNI*

**An Analysis of Scale and Rotation Invariance in the Bag-of-Features Method for Histopathological Image Classification** .......................................................... 66  
*S. Hussain Raza, R. Mitchell Parry, Richard A. Moffitt, Andrew N. Young, and May D. Wang*
Robust Large Scale Prone-Supine Polyp Matching Using Local Features: A Metric Learning Approach ........................................ 75
  Meizhu Liu, Le Lu, Jinbo Bi, Vikas Raykar, Matthias Wolf, and Marcos Salganicoff

Targeted Optical Biopsies for Surveillance Endoscopies .......... 83
  Selen Atasoy, Diana Mateus, Alexander Meining, Guang-Zhong Yang, and Nassir Navab

Focal Biologically Inspired Feature for Glaucoma Type Classification .. 91
  Jun Cheng, Dacheng Tao, Jiang Liu, Damon Wing Kee Wong, Beng Hai Lee, Mani Baskaran, Tien Yin Wong, and Tin Aung

The Relevance Voxel Machine (RVoxM): A Bayesian Method for Image-Based Prediction .................................................. 99
  Mert R. Sabuncu and Koen Van Leemput

Assessment of Regional Myocardial Function via Statistical Features in MR Images ...................................................... 107

Computer Aided Diagnosis and Machine Learning II

Identifying AD-Sensitive and Cognition-Relevant Imaging Biomarkers via Joint Classification and Regression ....................... 115
  Hua Wang, Feiping Nie, Heng Huang, Shannon Risacher, Andrew J. Saykin, Li Shen, and ADNI

Biological Indexes Based Reflectional Asymmetry for Classifying Cutaneous Lesions ................................................ 124
  Zhao Liu, Lyndon Smith, Jiuai Sun, Melvyn Smith, and Robert Warr

Identification of Paediatric Tuberculosis from Airway Shape Features .. 133
  Benjamin Irving, Pierre Goussard, Robert Gie, Andrew Todd-Pokropek, and Paul Taylor

Automatic Region-of-Interest Segmentation and Pathology Detection in Magnetically Guided Capsule Endoscopy .................... 141
  Philip W. Mewes, Dominik Neumann, Oleg Licegevic, Johannes Simon, Aleksandar Lj. Juloski, and Elli Angelopoulou

Simultaneous Segmentation and Grading of Hippocampus for Patient Classification with Alzheimer's Disease .................... 149
  Pierrick Coupé, Simon F. Eskildsen, José V. Manjón, Vladimir Fonov, and D. Louis Collins
Localization of the Lumbar Discs Using Machine Learning and Exact Probabilistic Inference .......................................................... 158

Ayse Betul Oktay and Yusuf Sinan Akgul

Automatic Contrast Phase Estimation in CT Volumes ......................... 166

Michal Sofka, Dijia Wu, Michael Sühling, David Liu, Christian Tietjen, Grzegorz Soza, and S. Kevin Zhou

3D Shape Analysis for Early Diagnosis of Malignant Lung Nodules .... 175

Ayman El-Baz, Matthew Nitzken, Ahmed Elnakib, Fahmi Khalifa, Georgy Gimel’farb, Robert Falk, and Mohamed Abou El-Ghar

Classification of Diffuse Lung Disease Patterns on High-Resolution Computed Tomography by A Bag of Words Approach .................. 183

Rui Xu, Yasushi Hirano, Rie Tachibana, and Shoji Kido

Discriminative Pathological Context Detection in Thoracic Images Based on Multi-level Inference .................................................. 191

Yang Song, Weidong Cai, Stefan Eberl, Michael J. Fulham, and Dagan Feng

X-ray Categorization and Spatial Localization of Chest Pathologies...... 199

Uri Avni, Hayit Greenspan, and Jacob Goldberger

Computer-Aided Detection of Ground Glass Nodules in Thoracic CT Images Using Shape, Intensity and Context Features ..................... 207

Colin Jacobs, Clara I. Sánchez, Stefan C. Saur, Thorsten Twellmann, Pim A. de Jong, and Bram van Ginneken

Learning Shape and Texture Characteristics of CT Tree-in-Bud Opacities for CAD Systems ...................................................... 215

Ulas Bagci, Jianhua Yao, Jesus Caban, Anthony F. Suffredini, Tara N. Palmore, and Daniel J. Mollura

Referenceless Stratification of Parenchymal Lung Abnormalities ......... 223

Sushravya Raghunath, Srinivasan Rajagopalan, Ronald A. Karwoski, Brian J. Bartholmai, and Richard A. Robb

Lung Texture Classification Using Locally-Oriented Riesz Components .................................................. 231

Adrien Depeursinge, Antonio Foncubierta-Rodriguez, Dimitri Van de Ville, and Henning Müller

Computer Aided Diagnosis and Machine Learning III

Fast Multiple Organ Detection and Localization in Whole-Body MR Dixon Sequences .......................................................... 239

Olivier Pauly, Ben Glocker, Antonio Criminisi, Diana Mateus, Axel Martinez Möller, Stephan Nekolla, and Nassir Navab
ManiSMC: A New Method Using Manifold Modeling and Sequential Monte Carlo Sampler for Boosting Navigated Bronchoscopy 248
Xiongbiao Luo, Takayuki Kitasaka, and Kensaku Mori

Characterizing Pathological Deviations from Normality Using Constrained Manifold-Learning 256
Nicolas Duchateau, Mathieu De Craene, Gemma Piella, and Alejandro F. Frangi

Detecting Outlying Subjects in High-Dimensional Neuroimaging Datasets with Regularized Minimum Covariance Determinant 264
Virgile Fritsch, Gael Varoquaux, Benjamin Thirion, Jean-Baptiste Poline, and Bertrand Thirion

Segmenting Images by Combining Selected Atlases on Manifold 272
Yihui Cao, Yuan Yuan, Xuelong Li, Baris Turkbey, Peter L. Choyke, and Pingkun Yan

Learning Pit Pattern Concepts for Gastroenterological Training 280
Roland Kwitt, Nikhil Rasiwasia, Nuno Vasconcelos, Andreas Uhl, Michael Häfner, and Friedrich Wrba

Immediate Structured Visual Search for Medical Images 288
Karen Simonyan, Andrew Zisserman, and Antonio Criminisi

Retrieval Evaluation and Distance Learning from Perceived Similarity between Endomicroscopy Videos 297
Barbara André, Tom Vercauteren, Anna M. Büchner, Michael B. Wallace, and Nicholas Ayache

Segmentation I

A New Approach for Tubular Structure Modeling and Segmentation Using Graph-Based Techniques 305
Jack H. Noble and Benoit M. Dawant

Learning-Based Meta-Algorithm for MRI Brain Extraction 313
Feng Shi, Li Wang, John H. Gilmore, Weili Lin, and Dinggang Shen

Learning Likelihoods for Labeling (L3): A General Multi-Classifier Segmentation Algorithm 322
Neil I. Weisenfeld and Simon K. Warfield

Anatomical Labeling of the Anterior Circulation of the Circle of Willis Using Maximum a Posteriori Classification 330
Hrvoje Bogunović, José María Pozo, Rubén Cárdenes, and Alejandro F. Frangi
Table of Contents – Part III

Automatic Multi-organ Segmentation Using Learning-Based Segmentation and Level Set Optimization ........................................... 338
Timo Kohlberger, Michal Sofka, Jingdan Zhang, Neil Birkbeck, Jens Wetzl, Jens Kaftan, Jérôme Declerck, and S. Kevin Zhou

Pose-Invariant 3D Proximal Femur Estimation through Bi-planar Image Segmentation with Hierarchical Higher-Order Graph-Based Priors ................................................................. 346
Chaohui Wang, Haithem Boussaid, Loic Simon, Jean-Yves Lazennec, and Nikos Paragios

Fully Automatic Segmentation of Brain Tumor Images Using Support Vector Machine Classification in Combination with Hierarchical Conditional Random Field Regularization ........................................... 354
Stefan Bauer, Lutz-P. Nolte, and Mauricio Reyes

Midbrain Segmentation in Transcranial 3D Ultrasound for Parkinson Diagnosis .................................................................................. 362
Seyed-Ahmad Ahmadi, Maximilian Baust, Athanasios Karamalis, Annika Plate, Kai Boetzel, Tassilo Klein, and Nassir Navab

Segmentation II

Order Preserving and Shape Prior Constrained Intra-retinal Layer Segmentation in Optical Coherence Tomography ........................................... 370
Fabian Rathke, Stefan Schmidt, and Christoph Schnörr

Adaptive Neonate Brain Segmentation .................................................. 378
M. Jorge Cardoso, Andrew Melbourne, Giles S. Kendall, Marc Modat, Cornelia F. Hagmann, Nicola J. Robertson, Neil Marlow, and Sebastien Ourselin

Renal Cortex Segmentation Using Optimal Surface Search with Novel Graph Construction ................................................................. 387
Xiuli Li, Xinjian Chen, Jianhua Yao, Xing Zhang, and Jie Tian

3D Modeling of Coronary Artery Bifurcations from CTA and Conventional Coronary Angiography ...................................................... 395
Rubén Cárdenes, Jose Luis Díez, Ignacio Larrabide, Hrvoje Bogunović, and Alejandro F. Frangi

Efficient Detection of Native and Bypass Coronary Ostia in Cardiac CT Volumes: Anatomical vs. Pathological Structures ..................... 403
Yefeng Zheng, Huseyin Tek, Gareth Funka-Lea, S. Kevin Zhou, Fernando Vega-Higuera, and Dorin Comaniciu
A Holistic Approach for the Detection of Media-Adventitia Border in IVUS
Francesco Ciompi, Oriol Pujol, Carlo Gatta, Xavier Carrillo, Josepa Mauri, and Petia Radeva

Orientation Histograms as Shape Priors for Left Ventricle Segmentation Using Graph Cuts
Dwarikanath Mahapatra and Ying Sun

Myocardial Segmentation of Late Gadolinium Enhanced MR Images by Propagation of Contours from Cine MR Images
Dong Wei, Ying Sun, Ping Chai, Adrian Low, and Sim Heng Ong

Minimum Average-Cost Path for Real Time 3D Coronary Artery Segmentation of CT Images
Ning Zhu and Albert C.S. Chung

Robust Surface-Based Multi-template Automated Algorithm to Segment Healthy and Pathological Hippocampi
Hosung Kim, Tommaso Mansi, Neda Bernasconi, and Andrea Bernasconi

Model Based 3D Segmentation and OCT Image Undistortion of Percutaneous Implants
Oliver Müller, Sabine Donner, Tobias Klinder, Ralf Dragon, Ivonne Bartsch, Frank Witte, Alexander Krüger, Alexander Heisterkamp, and Bodo Rosenhahn

Optimizing GHT-Based Heart Localization in an Automatic Segmentation Chain
Axel Saalbach, Irina Wächter-Stehle, Reinhard Kneser, Sabine Mollus, Jochen Peters, and Jürgen Weese

Automatic Extraction of 3D Dynamic Left Ventricle Model From 2D Rotational Angiocardiogram
Mingqing Chen, Yefeng Zheng, Kerstin Mueller, Christopher Rohkohl, Guenter Lauritsch, Jan Boese, Gareth Funka-Lea, Joachim Hornegger, and Dorin Comaniciu

Automatic View Planning for Cardiac MRI Acquisition
Xiaoquang Lu, Marie-Pierre Jolly, Bogdan Georgescu, Carmel Hayes, Peter Speier, Michaela Schmidt, Xiaoming Bi, Randall Kroeker, Dorin Comaniciu, Peter Kellman, Edgar Mueller, and Jens Guehring

Multi-part Left Atrium Modeling and Segmentation in C-Arm CT Volumes for Atrial Fibrillation Ablation
Yefeng Zheng, Tianzhou Wang, Matthias John, S. Kevin Zhou, Jan Boese, and Dorin Comaniciu
