| Preface to the Fourth Edition | v |
| 1 Introduction | 1 |
| 1.1 Definition of geodesy | 1 |
| 1.2 The objective of geodesy | 2 |
| 1.3 Historical development of geodesy | 4 |
| 1.3.1 The spherical Earth model | 4 |
| 1.3.2 The ellipsoidal Earth model | 7 |
| 1.3.3 The geoid, arc measurements and national geodetic surveys | 9 |
| 1.3.4 Three-dimensional geodesy | 11 |
| 1.3.5 Four-dimensional geodesy | 12 |
| 1.4 Organization of geodesy, literature | 12 |
| 1.4.1 National organizations | 12 |
| 1.4.2 International collaboration | 13 |
| 1.4.3 Literature | 15 |
| 2 Reference Systems and Reference Frames | 17 |
| 2.1 Basic units and constants | 17 |
| 2.2 Time systems | 19 |
| 2.2.1 Atomic time, dynamical time systems | 20 |
| 2.2.2 Sidereal and Universal Time | 21 |
| 2.3 Reference coordinate systems: fundamentals | 24 |
| 2.3.1 Celestial Reference System | 25 |
| 2.3.2 Precession, nutation | 27 |
| 2.3.3 Terrestrial Reference System | 28 |
| 2.3.4 Polar motion, Earth rotation | 30 |
| 2.4 International reference systems and reference frames | 34 |
| 2.4.1 International Celestial Reference System and Frame | 34 |
| 2.4.2 International Terrestrial Reference System and Frame | 39 |
| 2.4.3 Transformation between celestial and terrestrial reference systems, Earth orientation parameters | 42 |
| 2.4.4 International Earth Rotation and Reference Systems Service | 45 |
| 2.5 Local level systems | 46 |
| 3 The Gravity Field of the Earth | 53 |
| 3.1 Fundamentals of gravity field theory | 53 |
| 3.1.1 Gravitation, gravitational potential | 53 |
| 3.1.2 Gravitation of a spherically symmetric Earth | 55 |
| 3.1.3 Properties of the gravitational potential | 57 |
| 3.1.4 Centrifugal acceleration, centrifugal potential | 60 |
| 3.1.5 Gravity acceleration, gravity potential | 61 |

| | | |
|----------|--|------------|
| 3.2 | Geometry of the gravity field..... | 62 |
| 3.2.1 | Level surfaces and plumb lines | 63 |
| 3.2.2 | Local gravity field representation | 64 |
| 3.2.3 | Natural coordinates | 67 |
| 3.3 | Spherical harmonic expansion of the gravitational potential..... | 69 |
| 3.3.1 | Expansion of the reciprocal distance..... | 69 |
| 3.3.2 | Expansion of the gravitational potential | 71 |
| 3.3.3 | Geometrical interpretation of the surface spherical harmonics..... | 73 |
| 3.3.4 | Physical interpretation of the spherical harmonic coefficients | 74 |
| 3.4 | The geoid..... | 76 |
| 3.4.1 | Definition | 76 |
| 3.4.2 | Mean sea level..... | 78 |
| 3.4.3 | The geoid as height reference surface..... | 81 |
| 3.5 | Temporal gravity variations..... | 84 |
| 3.5.1 | Gravitational constant, Earth rotation | 85 |
| 3.5.2 | Tidal acceleration, tidal potential | 85 |
| 3.5.3 | Non-tidal temporal gravity variations | 89 |
| 4 | The Geodetic Earth Model..... | 91 |
| 4.1 | The rotational ellipsoid..... | 91 |
| 4.1.1 | Parameters and coordinate systems | 91 |
| 4.1.2 | Curvature..... | 94 |
| 4.1.3 | Spatial geodetic coordinates | 96 |
| 4.2 | The normal gravity field..... | 99 |
| 4.2.1 | The level ellipsoid, level spheroids..... | 99 |
| 4.2.2 | The normal gravity field of the level ellipsoid | 101 |
| 4.2.3 | Geometry of the normal gravity field..... | 105 |
| 4.3 | Geodetic reference systems, optimum Earth model | 108 |
| 5 | Methods of Measurement..... | 113 |
| 5.1 | Atmospheric refraction..... | 113 |
| 5.1.1 | Fundamentals | 114 |
| 5.1.2 | Tropospheric refraction | 117 |
| 5.1.3 | Ionospheric refraction | 121 |
| 5.2 | Satellite observations | 123 |
| 5.2.1 | Undisturbed satellite motion | 124 |
| 5.2.2 | Perturbed satellite motion | 126 |
| 5.2.3 | Artificial Earth satellites..... | 128 |
| 5.2.4 | Direction, range and range rate (Doppler, DORIS) measurements..... | 131 |
| 5.2.5 | Global Navigation Satellite Systems GNSS (GPS, GLONASS, Galileo and others) | 135 |
| 5.2.6 | Laser distance measurements..... | 150 |
| 5.2.7 | Satellite altimetry | 154 |
| 5.2.8 | Satellite-to-satellite tracking, satellite gravity gradiometry..... | 158 |

| | | |
|----------|--|------------|
| 5.3 | Geodetic astronomy..... | 162 |
| 5.3.1 | Optical observation instruments..... | 163 |
| 5.3.2 | Astronomic positioning and azimuth determination..... | 166 |
| 5.3.3 | Reductions..... | 168 |
| 5.3.4 | Very Long Baseline Interferometry..... | 170 |
| 5.4 | Gravimetry..... | 175 |
| 5.4.1 | Absolute gravity measurements..... | 175 |
| 5.4.2 | Relative gravity measurements..... | 183 |
| 5.4.3 | Gravity reference systems and gravity standard..... | 189 |
| 5.4.4 | Gravity measurements on moving platforms..... | 190 |
| 5.4.5 | Gravity gradiometry..... | 197 |
| 5.4.6 | Continuous gravity measurements..... | 199 |
| 5.5 | Terrestrial geodetic measurements..... | 203 |
| 5.5.1 | Horizontal and vertical angle measurements..... | 204 |
| 5.5.2 | Distance measurements, total stations..... | 206 |
| 5.5.3 | Inertial surveying, underwater acoustic positioning..... | 212 |
| 5.5.4 | Leveling..... | 215 |
| 5.5.5 | Tilt and strain measurements..... | 219 |
| 6 | Methods of Positioning and Gravity Field Modeling..... | 223 |
| 6.1 | Residual gravity field..... | 224 |
| 6.1.1 | Disturbing potential, height anomaly, geoid height..... | 224 |
| 6.1.2 | Gravity disturbance, gravity anomaly, deflection of the vertical..... | 226 |
| 6.1.3 | Statistical description of the gravity field, interpolation..... | 229 |
| 6.2 | Three-dimensional positioning..... | 233 |
| 6.2.1 | Observation equations..... | 234 |
| 6.2.2 | Geodetic datum..... | 240 |
| 6.3 | Horizontal positioning..... | 245 |
| 6.3.1 | Ellipsoidal trigonometry..... | 245 |
| 6.3.2 | Reductions to the ellipsoid..... | 247 |
| 6.3.3 | Computations on the ellipsoid..... | 249 |
| 6.4 | Height determination..... | 252 |
| 6.4.1 | Heights from geometric leveling..... | 253 |
| 6.4.2 | Trigonometrical heights..... | 255 |
| 6.4.3 | Heights from GNSS (GPS)..... | 256 |
| 6.5 | Fundamentals of gravity field modeling..... | 258 |
| 6.5.1 | The geodetic boundary-value problem..... | 258 |
| 6.5.2 | Gravitation of topography, digital elevation models..... | 262 |
| 6.5.3 | Gravity reductions to the geoid..... | 264 |
| 6.5.4 | Orientation and scale of gravity field models..... | 269 |
| 6.6 | Global gravity field modeling..... | 271 |
| 6.6.1 | Spherical harmonic expansion..... | 271 |
| 6.6.2 | “Satellite-only” gravity field models..... | 275 |
| 6.6.3 | Combined (high resolution) gravity field models..... | 278 |

| | | |
|----------|--|------------|
| 6.7 | Local gravity field modeling..... | 283 |
| 6.7.1 | Gravimetric geoid heights and deflections of the vertical: integral formulas..... | 283 |
| 6.7.2 | Gravimetric height anomalies and surface deflections of the vertical..... | 290 |
| 6.7.3 | The external gravity field..... | 293 |
| 6.7.4 | Astrogeodetic geoid and quasigeoid determination..... | 296 |
| 6.8 | Least-squares collocation..... | 301 |
| 7 | Geodetic and Gravimetric Networks..... | 305 |
| 7.1 | Horizontal control networks..... | 305 |
| 7.2 | Vertical control networks..... | 316 |
| 7.3 | Three-dimensional networks..... | 321 |
| 7.4 | Gravity networks..... | 330 |
| 8 | Structure and Dynamics of the Earth..... | 333 |
| 8.1 | The geophysical Earth model..... | 333 |
| 8.2 | The upper layers of the Earth..... | 337 |
| 8.2.1 | Structure of the Earth's crust and upper mantle..... | 337 |
| 8.2.2 | Isostasy..... | 338 |
| 8.2.3 | Plate tectonics..... | 342 |
| 8.2.4 | Interpretation of the gravity field..... | 344 |
| 8.3 | Geodesy and recent geodynamics..... | 349 |
| 8.3.1 | Geophysical processes and effects on geodetic products..... | 350 |
| 8.3.2 | Changes in Earth rotation..... | 353 |
| 8.3.3 | Sea level variations..... | 355 |
| 8.3.4 | Crustal deformations..... | 359 |
| 8.3.5 | Gravity field variations with time..... | 367 |
| 8.3.6 | Earth tides and tidal loading..... | 375 |
| | References..... | 383 |
| | Index..... | 421 |
