Table of Contents

Invited Talks

Uniform Evaluation of Nonmonotonic DL-Programs ......................... 1
   Thomas Eiter, Thomas Krennwallner, Patrik Schneider, and
   Guohui Xiao

Foundations of XML Based on Logic and Automata: A Snapshot ........... 23
   Thomas Schwentick

Regular Articles

Inconsistency-Tolerance in Knowledge-Based Systems by
Dissimilarities .............................................................. 34
   Ofer Arieli and Anna Zamansky

Revising Belief without Revealing Secrets ................................ 51
   Joachim Biskup and Cornelia Tadros

More Than the Sum of Its Parts – Holistic Ontology Alignment by
Population-Based Optimisation ............................................. 71
   Jürgen Bock, Sebastian Rudolph, and Michael Mutter

Handling Preferences in P2P Systems ..................................... 91
   Luciano Caroprese and Ester Zumpano

Backing and Undercutting in Abstract Argumentation Frameworks..... 107
   Andrea Cohen, Alejandro J. García, and Guillermo R. Simari

The Impact of Transitive Closure on the Boolean Expressiveness of
Navigational Query Languages on Graphs ................................. 124
   George H.L. Fletcher, Marc Gyssens, Dirk Leinders,
   Jan Van den Bussche, Dirk Van Gucht, Stijn Vansummeren, and
   Yuqing Wu

Using Functional Dependencies for Reducing the Size of a Data Cube... 144
   Eve Garnaud, Sofian Maabout, and Mohamed Mosbah

Armstrong Databases and Reasoning for Functional Dependencies and
Cardinality Constraints over Partial Bags ................................. 164
   Sven Hartmann, Henning Köhler, Sebastian Link, and
   Bernhard Thalheim

FD Covers and Universal Complements of Simple Projections .......... 184
   Stephen J. Hegner
Encoding Databases Satisfying a Given Set of Dependencies 203
   Gyula O.H. Katona and Krisztian Tichler

On Lifted Inference for a Relational Probabilistic Conditional Logic with Maximum Entropy Semantics 224
   Annika Krämer and Christoph Beierle

Flexible and Efficient Distributed Resolution of Large Entities 244
   András J. Molnár, András A. Benczúr, and Csaba István Sidló

On Real-Valued Evaluation of Propositional Formulas 264
   Aleksandar Perović, Dragan Doder, and Zoran Ognjanović

Detecting Suspect Answers in the Presence of Inconsistent Information 278
   Olivier Pivert and Henri Prade

Learning the News in Social Networks 298
   Krishnan Rajagopalan, Venkatesh Srinivasan, and Alex Thomo

Verifying Resource Requirements for Ontology-Driven Rule-Based Agents 312
   Abdur Rakib, Rokan Uddin Faruqui, and Wendy MacCaull

Formalizing Production Systems with Rule-Based Ontologies 332
   Martin Rezk and Michael Kifer

Count Constraints and the Inverse OLAP Problem: Definition, Complexity and a Step toward Aggregate Data Exchange 352
   Domenico Saccà, Edoardo Serra, and Antonella Guzzo

Synchronous Parallel Database Transformations 370
   Klaus-Dieter Schewe and Qing Wang

Functional Dependencies on Extended Relations Defined by Regular Languages 384
   Gyula I. Szabó and András Benczúr

Author Index 405
