Table of Contents XI

List of Figures XV

List of Tables XVII

List of Abbreviations XIX

1 Introduction 1

1.1 Agricultural and environmental background 1

1.1.1 Agricultural development – Striving for self-sufficiency 1

1.1.2 Nitrogen fertilisation – A fundamental problem 2

1.1.3 Agri-environmental situation – A matter of urgency 3

1.1.4 General environmental awareness – A question of education 4

1.1.5 “The Three Rural Issues” – A future challenge 4

1.1.6 Farmers’ decision-making in the crossfire of influences 5

1.2 Research framework 7

1.3 Outline of the thesis 12
# 2 Theoretical Framework

## 2.1 Economic theory of individual behaviour

1. The economic model of individual decision-making
2. Modified approaches including cognitive and social motivations
3. Social embeddedness and the rationality of individual decision-making

## 2.2 Socio-psychological theory of human behaviour

1. Fundamentals of cognitive hierarchy models
2. Cognitive hierarchy model of human behaviour

## 2.3 Theoretical background of selected decision-making determinants

1. Fundamental value positions
2. *Guānxi* relationships – a socio-cultural dimension
3. Environmental attitudes in China

## 2.4 Comprehensive model of individual decision-making

# 3 Empirical Research

## 3.1 Study area

1. The North China Plain
2. Socio-economic situation of Shandong Province
3. Impact of agricultural regulations
4. Agriculture in the research area
5. The pilot counties Huimin and Shouguang
6. Fertilisation in the research area

## 3.2 Questionnaire design

1. Questionnaire composition
2. Description of variables
3. Question-forming and response-scaling techniques
4. Questionnaire adaption to the local situation
5. Research ethic

## 3.3 Sample selection

## 3.4 Survey data collection
4.5.4 Perception of water pollution and the monetary value of water quality 113
4.5.5 Farmers’ fundamental value orientation 115
4.5.6 Traits of farmers’ guānxì relationships 120
4.5.7 Correlations between fundamental value orientations and guānxì traits 122
4.5.8 Correlations between fundamental value orientations and environmental attitudes 124

4.6 Impact of cognitive and social factors on farmers’ decision-making 127
4.6.1 Evaluation and description of the PLS model 127
4.6.2 Factors influencing farmers’ agri-environmental attitudes 131
4.6.3 Decision determinants of farmers’ fertilisation behaviour 133
4.6.4 Motivation for farmers’ WTP for environmental goods 135
4.6.5 Relevance of cognitive and social decision-making determinants for better adapted agricultural training approaches 136

5 Conclusion 139
5.1 Discussion of results 139
5.2 Strengths and limitations 152
5.3 Outlook – Policy implications 154
