Contents

EDITORIAL
Marginal bone maintenance around oral implants
Marco Esposito, Michele Nieri, Jerome A. Lindeboom, Søren Schou  S3

Guest editors’ introductory remarks
Björn Klinge, Daniel van Steenberghe  S7

Working Group on Treatment Options for the Maintenance of Marginal Bone Around Endosseous Oral Implants, Stockholm, Sweden, 8 and 9 September 2011: Methodology
Björn Klinge, Daniel van Steenberghe  S9

REVIEWS
Peri-implant marginal bone loss: an academic controversy or a clinical challenge?
Björn Klinge  S13

Treatment of peri-implantitis: what interventions are effective?
A Cochrane systematic review
Marco Esposito, Maria Gabriella Grusovin, Helen V. Worthington  S21

Antibiotics in the treatment of peri-implantitis
Arie Jan van Winkelhoff  S43

The impact of genotypes and immune reactivity on peri-implant inflammation: identification and therapeutic use of anti-inflammatory drugs and immunomodulators
Thomas E. Van Dyke  S51

Surgical treatments of peri-implantitis
Andrea Mombelli, Raphaël Moëne, Fabien Décaillé  S61

Mechanical, chemical and laser treatments of the implant surface in the presence of marginal bone loss around implants
Joerg Meyle  S71

The impact of the type and configuration of abutments and their (repeated) removal on the attachment level and marginal bone
Eric Rompen  S83

Identifying occlusal overload and how to deal with it to avoid marginal bone loss around implants
Jia-Hui Fu, Yung-Ting Hsu, Horn-Lay Wang  S91

Working Group on the Treatment Options for the Maintenance of Marginal Bone Around Endosseous Oral Implants, Stockholm, Sweden, 8 and 9 September 2011: Consensus Statements
Marco Esposito, Björn Klinge, Joerg Meyle, Andrea Mombelli, Eric Rompen, Daniel van Steenberghe, Tom Van Dyke, Horn-Lay Wang, Arie Jan van Winkelhoff  S105
