

Table of Contents

Communication-Efficient Self-stabilization in Wireless Networks	1
<i>Tomoya Takimoto, Fukuhito Ooshita, Hirotsugu Kakugawa, and Toshimitsu Masuzawa</i>	
Self-stabilizing Local k -Placement of Replicas with Minimal Variance . . .	16
<i>Sven Köhler, Volker Turau, and Gerhard Mentges</i>	
Self-stabilizing Algorithm for Maximal Graph Partitioning into Triangles	31
<i>Brahim Neggazi, Mohammed Haddad, and Hamamache Kheddouci</i>	
Brief Announcement: Self-stabilizing Synchronization of Arbitrary Digraphs in Presence of Faults	43
<i>Mahyar R. Malekpour</i>	
Brief Announcement: Self-stabilizing Silent Disjunction in an Anonymous Network	46
<i>Ajoy K. Datta, Stéphane Devismes, and Lawrence L. Larmore</i>	
On the Self-stabilization of Mobile Oblivious Robots in Uniform Rings	49
<i>Fukuhito Ooshita and Sébastien Tixeuil</i>	
Optimal Grid Exploration by Asynchronous Oblivious Robots	64
<i>Stéphane Devismes, Anissa Lamani, Franck Petit, Pascal Raymond, and Sébastien Tixeuil</i>	
Terminating Population Protocols via Some Minimal Global Knowledge Assumptions	77
<i>Othon Michail, Ioannis Chatzigiannakis, and Paul G. Spirakis</i>	
Brief Announcement: The Degrading Effect of Forgetting on a Synchronizer	90
<i>Matthias Függer, Alexander Kößler, Thomas Nowak, and Martin Zeiner</i>	
Brief Announcement: Mobile Agent Rendezvous on Edge Evolving Rings	92
<i>Tomoko Izumi, Yukiko Yamauchi, and Sayaka Kamei</i>	
High-Level Executable Specifications of Distributed Algorithms	95
<i>Yanhong A. Liu, Scott D. Stoller, and Bo Lin</i>	

Formal Verification of Security Preservation for Migrating Virtual Machines in the Cloud	111
<i>Yosr Jarraja, Arash Eghtesadi, Mourad Debbabi, Ying Zhang, and Makan Pourzandi</i>	
Evaluating Practical Tolerance Properties of Stabilizing Programs through Simulation: The Case of Propagation of Information with Feedback	126
<i>Jordan Adamek, Mikhail Nesterenko, and Sébastien Tixeuil</i>	
Self-stabilizing End-to-End Communication in (Bounded Capacity, Omitting, Duplicating and non-FIFO) Dynamic Networks (Extended Abstract)	133
<i>Shlomi Dolev, Ariel Hanemann, Elad Michael Schiller, and Shantanu Sharma</i>	
Self-stabilizing Distributed Data Fusion	148
<i>Bertrand Ducourthial, Véronique Cherfaoui, and Thierry Denoeux</i>	
From Self- to Self-stabilizing with Service Guarantee 1-hop Weight-Based Clustering	163
<i>Colette Johnen and Fouzi Mekhaldi</i>	
<i>Brief Announcement:</i> Verification of Stabilizing Programs with SMT Solvers	179
<i>Jingshu Chen and Sandeep Kulkarni</i>	
<i>Brief Announcement:</i> MP-State: State-Aware Software Model Checking of Message-Passing Systems	183
<i>Can Arda Muftuoglu, Péter Bokor, and Neeraj Suri</i>	
Oblivious Assignment with m Slots	187
<i>Giuseppe Ateniese, Roberto Baldoni, Silvia Bonomi, and Giuseppe Antonio Di Luna</i>	
BLIP: Non-interactive Differentially-Private Similarity Computation on Bloom filters	202
<i>Mohammad Alaggan, Sébastien Gambs, and Anne-Marie Kermarrec</i>	
DQMP: A Decentralized Protocol to Enforce Global Quotas in Cloud Environments	217
<i>Johannes Behl, Tobias Distler, and Rüdiger Kapitza</i>	
<i>Brief Announcement:</i> KARYON: Towards Safety Kernels for Cooperative Vehicular Systems	232
<i>António Casimiro, Jörg Kaiser, Johan Karlsson, Elad Michael Schiller, Philippos Tsigas, Pedro Costa, José Parizi, Rolf Johansson, and Renato Librino</i>	

<i>Brief Announcement: Arbitrators in the Security Infrastructure</i>	236
<i>Shlomi Dolev, Niv Gilboa, and Ofer Hermoni</i>	
Optimization in a Self-stabilizing Service Discovery Framework for Large Scale Systems	239
<i>Eddy Caron, Florent Chuffart, Anissa Lamani, and Franck Petit</i>	
Scalable Byzantine Agreement with a Random Beacon	253
<i>Olumuyiwa Oluwasanmi and Jared Saia</i>	
On Finding Better Friends in Social Networks	266
<i>Philipp Brandes and Roger Wattenhofer</i>	
<i>Brief Announcement: Detecting Users' Connectivity on Online Social Networks</i>	279
<i>Na Li, Sajal K. Das, and Nan Zhang</i>	
<i>Brief Announcement: Discovering and Assessing Fine-Grained Metrics in Robot Networks Protocols</i>	282
<i>François Bonnet, Xavier Défago, Franck Petit, Maria Gradinariu Potop-Butucaru, and Sébastien Tixeuil</i>	
All-to-All Gradecast Using Coding with Byzantine Failures	285
<i>John F. Bridgman III and Vijay K. Garg</i>	
Fault-Tolerant Exploration of an Unknown Dangerous Graph by Scattered Agents	299
<i>Paola Flocchini, Matthew Kellett, Peter C. Mason, and Nicola Santoro</i>	
A Theory of Fault Recovery for Component-Based Models	314
<i>Borzoo Bonakdarpour, Marius Bozga, and Gregor Gössler</i>	
Author Index	329
