Preface ................................................................................................................................. 9

1. Introduction .................................................................................................................... 11

2. Discussing Central Concepts and Definitions ............................................................ 21
   2.1 Knowledge Transfer: Economic Action and Knowledge Economy ...................... 21
      2.1.1 The Emergence of Knowledge Economy ......................................................... 21
      2.1.2 What Is “Knowledge” and How Can It Be “Transferred”? ............................. 22
   2.2 The Institutional Embeddedness of Innovation and Learning ............................... 29
      2.2.1 Defining Innovation ......................................................................................... 29
      2.2.2 The Systemic Character of Innovation and Knowledge Transfer ............... 32
      2.2.3 A Sociological Perspective on Innovation Systems ....................................... 35
      2.2.4 The “Governance” of Social Systems of Innovation and Production ............ 37
   2.3 Production Regimes: Institutional Frameworks for Knowledge Transfer ............... 41
      2.3.1 National Production Regimes—The Varieties-of-Capitalism-Approach .......... 43
      2.3.2 Liberal and Coordinated Market Economies ............................................... 44
      2.3.3 Institutional Coherence, Complementarity and Modes of Innovation .......... 47
      2.3.4 Criticizing the Varieties-of-Capitalism-Approach ........................................ 50
   2.4 The Innovation Systems Approach—Spatial Dimensions of Innovation .............. 55
      2.4.1 National Innovation Systems .......................................................................... 56
      2.4.2 Regional Innovation Systems—Approaching a Fuzzy Concept ....................... 59
   2.5 A Heuristic Model of Regional Knowledge Transfer Systems ............................ 86
3. Hypothesizing Structures and Mechanisms of Knowledge Transfer in Varieties of Capitalism ................................................. 94
   3.1 Hypothesized Structures and Mechanisms in CMEs .................. 95
   3.2 Hypothesized Structures and Mechanisms in LMEs .................. 101
   3.3 Hypothesized Structures and Mechanisms in MMEs .................. 104
   3.4 Summary ........................................................................... 108

4. A Qualitative Approach to Innovation System Analysis .................. 110
   4.1 Conceptualizing an Internationally Comparative Qualitative Case Study: The Choice for a Qualitative Approach .................. 110
   4.2 Sampling Strategies and Selection Criteria ............................ 114
   4.3 Selecting the National and Regional Cases ............................ 120
   4.4 The Guideline-Based Expert Interview as Research Method .......... 123
   4.5 Selection of Experts as Units of Observation ......................... 125
   4.6 Evaluation Methods: Aggregation and Triangulation ................ 127
   4.7 Quality Criteria and Analytical Generalization of the Results ...... 132

5. Germany—Knowledge Transfer Systems in a Coordinated Economy .......... 137
   5.1 The German Economy—Conserving Industrial Structures .......... 137
   5.2 The Case of Baden-Württemberg ........................................ 144
      5.2.1 Locating Baden-Württemberg in the German Context ......... 144
      5.2.2 Structures and Mechanisms of Knowledge Transfer in Baden-Württemberg: Six Governance Dimensions ...................... 151
      5.2.3 Summary ....................................................................... 183
   5.3 The Case of the Metropolitan Region Hannover Braunschweig Göttingen Wolfsburg ......................................................... 188
      5.3.1 Locating the Metropolitan Region HBGW in the German Context ................................................................. 188
      5.3.2 Structures and Mechanisms of Knowledge Transfer in the Metropolitan Region HBGW: Six Governance Dimensions .......... 196
      5.3.3 Summary ....................................................................... 230
   5.4 Lessons from the German Case ............................................. 236
6. Spain—Knowledge Transfer Systems in a Mediterranean Economy .............................................. 243
   6.1 The Spanish Economy—Some Structural Facts ................................................................. 243
   6.2 The Case of Catalonia ...................................................................................................... 250
       6.2.1 Locating Catalonia in the Spanish Context ............................................................ 250
       6.2.2 Structures and Mechanisms of Knowledge Transfer in Catalonia: Six Governance Dimensions ................................................................. 256
       6.2.3 Summary .................................................................................................................. 285
   6.3 The Case of the Madrid Community ............................................................................. 292
       6.3.1 Locating the Madrid Community in the Spanish Context .................................... 292
       6.3.2 Structures and Mechanisms of Knowledge Transfer in the Madrid Community: Six Governance Dimensions ................................................................. 298
       6.3.3 Summary .................................................................................................................. 327
   6.4 Lessons from the Spanish Case ................................................................................... 332

7. UK—Knowledge Transfer Systems in a Liberal Market Economy ......................... 340
   7.1 The UK Economy—A Service Dominated Economy ................................................. 340
   7.2 The East of England Case ........................................................................................... 348
       7.2.1 Locating the East of England in the UK Context .................................................. 348
       7.2.2 Structures and Mechanisms of Knowledge Transfer in the East of England: Six Governance Dimensions ................................................................. 355
       7.2.3 Summary .................................................................................................................. 382
   7.3 The Greater London Case ............................................................................................ 388
       7.3.1 Locating the Greater London Region in the UK Context .................................. 388
       7.3.2 Structures and Mechanisms of Knowledge Transfer in Greater London: Six Governance Dimensions ................................................................. 395
       7.3.3 Summary .................................................................................................................. 415
   7.4 Lessons from the UK Case ............................................................................................ 421
