1	Introduction	1
1.1	Motivation	1
1.2	Approach and Delimitations	4
1.3	Contributions	6
1.4	Thesis Overview	7
2	Foundations	9
2.1	Artificial Neural Networks for Control	9
2.2	Evolutionary Algorithms	12
2.3	Mid-Scale Networks and the Scaling Problem	14
2.4	State of the Art in Neuro-Evolution	15
3	Interactively Constrained Neuro-Evolution	21
3.1	Overview	21
3.2	Genome	24
3.2.1	Neural Network Encoding	24
3.2.2	Neurons and Synapses	26
3.2.3	Neuron-Groups and Neuro-Modules	27
3.2.4	Network Tags	31
3.2.5	Constraints	32
3.2.6	Final Genome Encoding	33
3.3	General Algorithm	34
3.3.1	Offspring Generation and Variation Chain	35
3.3.2	Constraint Resolver	38
3.3.3	Inheritance and Modular Crossover	39
4	Functional Constraints	43
4.1	Cloning	45
4.2	Symmetry	45
4.3	Connection Symmetry	46
4.4	Offset Symmetry	46
4.5	Network Equations	47
4.6	Prevent Connections	48
4.7	Enforce Directed Path	48

4.8	Restrict Number of Neurons	49
4.9	Enforce Connectivity Pattern	49
4.10	Connect Groups with Pattern	50
4.11	Restrict Weight and Bias Range	50
4.12	Synchronize Network Tags	51
4.13	Connectivity Density	52
4.14	Custom Constraints	52
5	Neuro-Evolution with the ICONE Method	55
5.1	Constrained Modularization and Network Shaping	58
5.1.1	Preparation of Initial Networks	59
5.1.1.1	Basic Modularization	59
5.1.1.2	Preparation of Peripheral Structures	60
5.1.1.3	Low-Level Constraints with Network Tags	62
5.1.1.4	Preparation for Modular Crossover	62
5.1.1.5	High-Level Constraints	62
5.1.1.6	Testing	63
5.1.2	Module Refinement	63
5.1.3	Neuro-Module Library	65
5.2	Interactive Evolution	65
5.3	Iterative Evolution and Shaping	67
6	ICONE Extensions	69
6.1	Synaptic Pathways	69
6.2	Typed Connections	70
6.3	Hidden Elements	71
6.4	Expiring Constraints	72
6.5	Automatic Parameter Scheduling	72
6.6	Mutation Plans for Individuals	73
6.7	Evolving Constrained Learning Rules	73
6.8	Morphology Co-Evolution	74
6.9	Order Dependent Neurons	75
7	Application: Walking with a Humanoid Robot	77
7.1	Experiment Description	77
7.1.1	Approach	77
7.1.2	Involved Techniques	79
7.1.3	Search Space	79
7.2	Marching in Place	80
7.2.1	Experiment	81
7.2.2	Modularization	82
7.2.3	Parameter Settings	85
7.2.4	Results	87
7.2.5	Experiment Variants	90

7.3	Humanoid Walking	91
7.3.1	Experiment	91
7.3.2	Modularization	92
7.3.3	Parameter Settings	94
7.3.4	Results	94
7.4	Transfer to Physical Robot	96
7.4.1	Modularization	98
7.4.2	Parameter Settings	98
7.4.3	Results	99
8	Application: Evolving Controller Variants for a Closed-Chain Animat	103
8.1	Experiment Description	103
8.1.1	Approach	103
8.1.2	Involved Techniques	105
8.1.3	Experiment	106
8.1.4	Parameter Settings	108
8.1.5	General Modularization	110
8.1.6	Overview on Experiments	111
8.2	Interconnectivity Variations	112
8.2.1	Experiment 1: Prevented Segment Connections	112
8.2.2	Experiment 2: Direct Neighbor Communication	114
8.2.3	Experiment 3: Enforced Neighbor Communication Variants	118
8.2.4	Experiment 4: Connecting Every Second Segment	121
8.2.5	Experiment 5: Arbitrary Symmetric Connections	126
8.3	Sensor Variations	130
8.3.1	Experiment 6: Sensor-Rich Heterogeneous Controller	131
8.3.2	Experiment 7: A Gyroscope per Segment-Triplet	135
8.4	Peripheral Structure Variations	140
8.4.1	Experiment 8: An Oscillator as Pattern Generator	141
8.4.2	Experiment 9: Coordination via Token Passing	145
8.4.3	Experiment 10: A Feed-forward Processing Column	149
9	Discussion	155
9.1	ICONE Features	155
9.1.1	Search Space Restriction	155
9.1.2	The Power of Peripheral Structures	156
9.1.3	Structure Evolution vs. Fixed Topology Evolution	157
9.1.4	Local Coexistence and Mixing of NE Approaches	157
9.1.5	Control of Evolution Parameters	158
9.2	Evolvability and Performance	159
9.2.1	Increased Success Rate	159
9.2.2	Performance of the ICONE Method	160
9.2.3	Modularization with the Network Editor	162
9.2.4	Bootstrapping the Evolution	162

9.3	Quality of Evolved Neuro-Controllers	164
9.3.1	Influencing and Biasing the Network Topology	164
9.3.2	Comprehension of Evolved Neural Structures	164
9.4	Future Work	165
9.4.1	Increasing Control Over Weight Mutations	166
9.4.2	Onion Skin Evolution	167
9.4.3	Evolving More Controllers for Complex Robot Hardware	168
10	Conclusion and Impact on the Field of Neuro-Evolution	170
A	Network Symbols	175
B	Mutation Operators	177
C	Network Tags	185
D	NERD Toolkit	193
D.1	NERD Simulator	194
D.2	Neural Network Editor	195
D.3	Evolution Framework and ICONE Implementation	197
	Bibliography	201
	Glossary	221
	Index	225
