1	INTRODUCTION	1
2	NANOPARTICLE-POLYMER-COMPOSITES – A STATE OF THE ART	4
2.1	Terminology	5
2.1.1	Nanomaterials	5
2.1.2	Polymers	7
2.1.3	State of Dispersion	8
2.2	Composite Synthesis/Preparation	9
2.2.1	Separate Synthesis of Particles and Polymers	9
2.2.2	Synthesis of Nanoparticles within the Polymer	12
2.2.3	Synthesis of the Polymer with the Presence of Nanoparticles	13
2.3	Industrial Products	14
3	THESIS MOTIVATION – DEVELOPMENT OF A MODULAR PROCESS CHAIN FOR COMPOSITE PREPARATION	16
3.1	Process Steps	16
3.1.1	Nanoparticle Synthesis	17
3.1.2	Liquid-Liquid Phase-Transfer	17
3.1.3	Polymer Addition	18
3.1.4	Spray Drying	19
3.1.5	Powder Agglomeration	20
3.2	Composition	21
3.2.1	Composite Composition	21
3.2.2	Colloid Composition	24
4	FOCUS ON THE PHASE TRANSFER OF NANOPARTICLES	26
4.1	Theory	26
4.1.1	Phase Transfer	26
4.1.2	Adsorption of Surfactants	27
4.1.3	Steric Stabilization	30

4.2	Physical Model of Deagglomeration at the Interface	33
4.2.1	Gedankenexperiment	33
4.2.2	Geometrical Model	34
4.2.3	Numerical Results	36
4.3	Experimental Results	38
4.3.1	Visualization of the Phase Transfer	38
4.3.2	Particle (Agglomerate) Size Distribution	40
4.3.3	Primary Particle Concentration	41
4.3.4	Inert Decomposition of Chemisorbed Ricinoleic Acid on Magnetite Nanoparticles	44
5	NANOPARTICLES AND POLYMERS IN AN ORGANIC SOLVENT	51
5.1	Theory	52
5.1.1	Polymers in Solution	52
5.1.2	Solubility	57
5.1.3	Phenomena in Nanoparticle Polymer Mixtures	59
5.2	Pair Interactions – DLVO-like Consideration	60
5.3	Experimental Results	64
5.3.1	Influence of the Polymer	65
5.3.2	Influence of the Surfactant	73
5.3.3	Stabilization by Adsorption of PVB	77
5.3.4	Influence of Mechanical Dispersing Methods on the Stability	83
5.3.5	Kinetics of Flocculation at Low Nanoparticle Concentration and high PMMA concentrations	86
5.3.6	Influence of the Solvent	88
6	HIGHLY FILLED COMPOSITES	94
6.1	Theory	94
6.1.1	Spray Drying	94
6.1.2	(Micro) Injection Molding	101
6.1.3	Image Processing and the Mathematical Description of the State of Dispersion	101
6.1.4	Filler Concentration – Agglomerate Concentration – Stability Relation	104
6.2	Experimental Results – Spray-Dried Microparticle Composites	107
6.2.1	Compositional Separation	107
6.2.2	Yield of Product	111
6.2.3	Influence of the Polymer	112

6.2.4	Influence of the Surfactant	113
6.2.5	Increasing Filler Concentration <i>F</i>	116
6.3	Experimental Results – Injection Molded Composites	119
6.3.1	PMMA vs. PC vs. PVB	120
6.3.2	Increasing Filler Concentration – PMMA composite	126
6.3.3	Identity of Agglomerates	128
6.3.4	Solution and Spray Drying Process vs. Melt Mixing	130
7	GENERAL CONCLUSIONS AND OUTLOOK	132
