Content

Preface

Lectures

Sustainable Construction Materials

P. Van den Heede, N. De Belie
Service life based assessment of the global warming potential of concrete with supplementary cementitious materials.......................... 5

J.L. Provis
Alkali-activated binders and concretes: Reactions, structure and durability leading to sustainable construction............................. 9

H.J.H. Brouwers
Development of Eco-concretes............................................................... 13

M. De Schepper, E. Arvaniti, S. Van Haute, N. De Belie
Influence of raw material fineness on clinker produced from Completely Recyclable Concrete...................................................... 19

Physical-chemical upgrading and use of bio-energy fly ashes as building material................................................................. 23

K. Rübner, B. Peplinski, S. Hempel, A. Schnell, A. Müller
Novel lightweight aggregates from masonry rubble............................ 27

Q.L. Yu, P. Spiesz, H.J.H. Brouwers
Design of ultra-lightweight concrete: towards monolithic concrete structures.............................................................................. 31

J. Schoon, K. De Buysser, I. Van Driessche, N. De Belie
MgO as fluxing agent for a sustainable Portland clinker production....................................................................................... 35

M. Zajac, M. Ben Haha
Hydration of limestone slag composite cement...................................... 39
Hydration and Chemical Admixtures

H. Pöllmann
New phases formed during the hydration of CAC under the influence of different organic additives .......................................................... 45

W. Schmidt, H. J. H. Brouwers, H.-C. Kühne, B. Meng
Interactions between PCE and different polysaccharides and influences on the early hydration of cement ........................................... 49

R. Baumann, C. Brumaud, H. Bessaies-Bey, N. Roussel, C. Mohler, M. Radler, M. Schmitz
The Effects of Cellulose Ethers on the Interstitial Fluid in Cement Mortars...................................................................................... 53

S. Baueregger, M. Perello, J. Plank
A Kinetic and Mechanistic Investigation on the Film Formation of a Carboxylated Styrene-Butadiene Latex........................................ 57

F. Brunei, C. Labbez, I. Pochard
Controlled Interaction in C-S-H/Polycation Composites: Effect on Mechanical Properties.............................................................. 61

Analytical and Mechanical Methods

M. C. Schlegel, A. Sarfraz, U. Müller, U. Panne, F. Emmerling
In-situ SyXRD Analysis of Cement Hydration on the ms-Scale ...... 65

L. Nicoleau, A. Nonat
The C₃S Dissolution.............................................................................. 69

M. A. Chavda, S. A. Bernal, D. C. Apperley, J. L. Provis, H. Kinoshita
An NMR study of the hydration phases of sodium polyphosphate-modified calcium aluminate cement........................................... 73

G. Wilsch
Laser Induced Breakdown Spectroscopy (LIBS) – alternative to wet chemistry and micro-XRF......................................................... 77

C. Glotzbach, A. Wetzel, B. Middendorf
Spatial Distribution of Superplasticizer in Cementitious Mortar Studied with FITC Labeling............................................................. 79
T. A. Bier
Comparison of pore structures of hardened mortars based on various cementitious binders and curing conditions ............................. 83

Calcium Aluminate Cement Hydration

S. R. Klaus, J. Neubauer, F. Goetz-Neunhoeffer
Calculation of heat flow from QXRD data for the hydration of a synthetic calcium aluminate cement .................................................. 89

G. Le Saout, B. Lothenbach, P. Taquet, H. Fryda, F. Winnefeld
Hydration study of a Calcium Aluminate Cement blended with anhydrite ......................................................................................... 93

Influence of calcium sulfate on the early hydration of a calcium aluminate cement ............................................................................... 97

H. Fryda, B. Touzo, S. Berger, D. Gauthier, R. Kwasny-Echterhagen
Impact of CAC mineralogy on hydration in ettringitic systems ...... 101

T. Westphal, T. A. Bier
Phase and structure development in rapid setting mortars .......... 105

J. Herisson, E.D. van Hullebusch, M. Guéguen-Minerbe, P. Taquet, C. Eychenne-Baron, T. Chaussadent
Better durability of calcium aluminate cement regarding biocorrosion in sewer networks ....................................................... 109

Properties of Cement Pastes

C. Labbez
Solute Adsorption on cement hydrates from a statistical mechanics point of view ................................................................................ 115

W. Kunther, Z. Dai, S. Ferreiro, D. Herfort, J. Skibsted
Thermodynamic Modeling of Portland Cement – Metakaolin – Limestone Blends: Potential Factors Affecting the Strength Performance .................................................................................. 117
| S. Mantellato, M. Palacios, R. J. Flatt | Fresh cement pastes – A systematic study on their specific surface area .................................................. 121 |
| C. Schröfl, A.-E. Brüdern, V. Mechtcherine | Direct visualization of water migration into composite specimens made of strain-hardening cement-based composite (SHCC) and cracked hydrophobized ordinary concrete by neutron radiography .................................................. 125 |
| **Low Energy Cements** | |
| M. Ben Haha, F. Bullerjahn, M. Zajac, D. Schmitt | Effect of Belite content on the hydration mechanisms of calcium sulfoaluminate ........................................................................ 135 |
| F. Bullerjahn, D. Schmitt, M. Ben Haha | Effect of raw mix design and clinkering procedure on the formation and mineralogical composition of (ternesite) belite calcium sulfoaluminate ferrite clinker ........................................................................ 139 |
| **Surface Functionalization** | |
| R. Zurbriggen, L. Huwiler | Early mechanisms at mortar surfaces: Skin formation and adhesion properties .................................................. 145 |
| T. Flassak, G. Bolte | Numerical simulation of the effectiveness of photocatalytic active concrete surfaces ........................................................................ 149 |
| A. Wetzel, S. Piotrowski | Dense and durable tailor-made surfaces of UHPC .................................................. 153 |
| A. Sobolkina, V. Mechtcherine, C. Bellmann, A. Leonhardt | Investigation of the surface properties of carbon nanotubes .................................................. 157 |
Nanostructured Construction Materials

J. Skibsted
Aluminum Incorporated in Calcium Silicate Hydrate (C-S-H)
Phases Studied by Solid-State NMR Spectroscopy ......................... 163

F. Bellmann, J. Leppert, M. Görlach, M. Krbetschek
Analysis of disorder in tricalcium silicate .................................. 167

J. Plank, H. Keller
Synthesis of CaCO₃-PCE-Nano Composites Utilized for
Strength Enhancement of Portland Cement ............................... 171

G. Land, D. Stephan
Nucleation seeding in cementitious systems .............................. 175

G. Quercla, G. Hüskens, H.J.H. Brouwers
Effect of olivine nano-silica additions on the fresh and
hardened behaviour of cement pastes and mortars .................... 179

H. Manzano, I. Lopez-Arbeloa
Mechanical behavior of the Calcium Silicate Hydrates under
shear strain: atomic scale view on creep ................................ 183

A. Trapote-Barreire, J. Cama, J. Soler L. Fernández-Carrasco
C-S-H gel dissolution kinetics. Effect of the dissolution in the
microstructure of the gel .................................................... 187

Alkali Activated Cement

E. Kavalerova, P. Krivenko, V. Petranek, J. Zach
Alkali activated cements- sustainable cementitious materials ...... 193

Rupert J. Myers, Susan A. Bernal, John L. Provis
Sublattice Thermodynamic Model for C-(N)-A-S-H gel: Solid
Phase Assemblages and Gel Chemistry in Alkali-Activated
Slag Cements ................................................................. 197

S. A. Bernal, R. San Nicolas, J. L. Provis, D. G. Brice,
J. S. J. van Deventer
Structural development of sodium carbonate activated slag
binders ............................................................................... 201

Posters

Adhesives, Sealants and Coating
- Chemistry & Application -

S. Guzii, Y. Tsapko
The study of some aspects of the impact on the stability of wood protection wood structures
209

D. Burgard, M. Herold, K. Steingröver
Nanoparticles in elastomeric roof coatings – Increased performance by non-covalent cross linking
213

P. Gonnon, Mm Skovby, A. Bouille
Microfiller performance evaluation
217

J. Suessmuth, P. G. Weidler, A. Gerdes
Impact of the Treatment with Silici umorganic Compounds on Hardened Cement Paste
221

Analytical and Mechanical Methods

D. Ectors, F. Götz-Neunhoeffer, J. Neubauer
Hydration of Synthetic Brownmillerite in an Portland Cement Near Environment
227

S. H. Unterberger, A. Saxer, A. Reinisch, T. Meinschad, R. Lackner
Near-surface concrete properties affected by formwork-concrete interaction – An experimental study
231

S. P. Sivkov
Thermodynamic study of phase assemblage in system CaO – Al2O3 – Fe2O3 – CaSO4 – H2O
233

K. Enemark-Rasmussen, J. Skibsted
Fluoride Ions as Structural Probe-Ions in 19F MAS NMR Studies of Thermally Activated SCMs
237

A. Taher, A.J.J. van der Zanden, H.J.H. Brouwers
A hygroscopic method to measure the adsorption isotherm of porous construction materials
241

Construction Materials and Health

R. Rühl, K. Kersting
Alternatives for high solvent flooring adhesives.......................... 315

K. Kersting, R. Rühl, K. Heine, F. Kalberlah
Ranking of epoxy resin compounds based on their sensitising potency ................................................................. 317

J. Strigáč, P. Martauz, L' Varečka
The antimicrobial activity of metallurgical slags and their potential for using as antimicrobially active agents for building materials .................................................................................. 319

Dry-Mix Mortar Technologies

S. P. Sivkov, Y. V. Ustinova, D. Mendeleyev
Crystallization of CaSO4·2H2O in presence of polymer additives and their influence on properties of gypsum .............. 325

L. Van Nes Blessing
Ultra fast Setting - High early strength Cement based on Amorphous Calcium Aluminate ......................................................... 327

L. Ostrovska, O. Kovalchuk
White and decorative cements based on slag alkali activated binders ................................................................................... 331

R. Runova, I. Rudenko, O. Konstantynovsyi, A. Gergalo
Dry-mix mortars based on slag alkaline cements ................................ 333

Mechanical Properties and Durability

R. Tänzer, T. Bohne, D. Stephan
Investigations on the Resistance of Alkali-Activated Ground Granulated Blast-Furnace Slag to Alkali-Silica Reaction ........... 339

S. Schuler, C. Rieck, R. Röben, R. Hüttl
Attack of Groundwater on Young Concrete .......................................................... 343

R. Röben, R. Stadie, R. Hüttl, J. Waschnewski
Long Term Material Testing in the "Sewer Research Facility Berlin" ODOCO II .......................................................... 347
P. Spiesz, H.J.H. Brouwers
Application of the conductivity sensor as a chloride detector in concrete...

V. Troyan, P. Krivenko
Prediction of durability of plasticized concrete...

N. Mobasher, S. A. Bernal, H. Kinoshita, C. A. Sharrard, J. L. Provis
Long term stability of BaSO₄ – BFS composite cement system for encapsulation of sulphate bearing nuclear waste...

T. Gutberlet, H. Hilbig, R. E. Beddoe
Acid Attack on Concrete – Structure of the Corroded Surface Layer...

Nanostructured Construction Materials

E. Potapova, E. G. Rakov, V. Volubkov
Use of a metakaolin as a substrate for growing of carbon nanofibers...

S. Kamaruddin, D. Stephan
Coating of silica fume with TiO₂ for application in photocatalytic building materials...

V. Butters, T. Kowald, R. Trettin
Coating of CNTs by SiO₂ and their influence on hydrating tricalcium silicate...

Š. Lorenčik, Q.L. Yu, H.J.H. Brouwers
Development of a wall covering for indoor air purification: Design, characterization and photocatalytic efficiency assessment...

J. Plank, H. Keller
Stability of Ca₂Al-PCE-LDH Organo-Mineral Phases against Anions Occurring in Cement Pore Solution...

G. Jakowlew, G. Pervushin, I. Maeva, I. Pudov
Physical and chemical researches of structure and properties of a cement matrix the modified dispersion multilayered carbon nanotubes...
Surface Functionalization – Macro & Micro

K. Amrhein, D. Stephan
Photocatalytic Building Materials and their Ability to Degrade Nitric Oxide ................................................................. 395

S.G. Erzengin, A. Güvenç, Ö. U. Erzengin
Investigation of the Fracture Pores in Cement Paste Microstructure by SEM and Image Analysis ............................................. 399
