Preface — v

1 Reward approximations for autoregressive log-price processes (LPP) — 1
  1.1 Markov Gaussian LPP — 2
  1.2 Autoregressive LPP — 11
  1.3 Autoregressive moving average LPP — 22
  1.4 Modulated Markov Gaussian LPP — 33
  1.5 Modulated autoregressive LPP — 43
  1.6 Modulated autoregressive moving average LPP — 58

2 Reward approximations for autoregressive stochastic volatility LPP — 74
  2.1 Nonlinear autoregressive stochastic volatility LPP — 75
  2.2 Autoregressive conditional heteroskedastic LPP — 87
  2.3 Generalized autoregressive conditional heteroskedastic LPP — 100
  2.4 Modulated nonlinear autoregressive stochastic volatility LPP — 113
  2.5 Modulated autoregressive conditional heteroskedastic LPP — 127
  2.6 Modulated generalized autoregressive conditional heteroskedastic LPP — 142

3 American-type options for continuous time Markov LPP — 157
  3.1 Markov LPP — 157
  3.2 LPP with independent increments — 162
  3.3 Diffusion LPP — 167
  3.4 American-type options for Markov LPP — 171

4 Upper bounds for option rewards for Markov LPP — 180
  4.1 Upper bounds for rewards for Markov LPP — 180
  4.2 Asymptotically uniform conditions of compactness for Markov LPP — 194
  4.3 Upper bounds for rewards for LPP with independent increments — 206
  4.4 Upper bounds for rewards for diffusion LPP — 215
  4.5 Upper bounds for rewards for mean-reverse diffusion LPP — 239

5 Time-skeleton reward approximations for Markov LPP — 256
  5.1 Lipschitz-type conditions for pay-off functions — 257
  5.2 Time-skeleton approximations for optimal expected rewards — 270
  5.3 Time-skeleton approximations for reward functions — 287
5.4 Time-skeleton reward approximations for LPP with independent increments — 294
5.5 Time-skeleton reward approximations for diffusion LPP — 298

6 Time-space-skeleton reward approximations for Markov LPP — 308
6.1 Time-space-skeleton reward approximations for Markov LPP — 309
6.2 Time-space-skeleton reward approximations for LPP with independent increments — 329
6.3 Time-space-skeleton reward approximations for diffusion LPP — 354

7 Convergence of option rewards for continuous time Markov LPP — 371
7.1 Convergence of rewards for continuous time Markov LPP — 372
7.2 Convergence of rewards for LPP with independent increments — 376
7.3 Convergence of rewards for univariate Gaussian LPP with independent increments — 391
7.4 Convergence of rewards for multivariate Gaussian LPP with independent increments — 405

8 Convergence of option rewards for diffusion LPP — 427
8.1 Convergence of rewards for time-skeleton approximations of diffusion LPP — 427
8.2 Convergence of rewards for martingale-type approximations of diffusion LPP — 431
8.3 Convergence of rewards for trinomial-tree approximations of diffusion LPP — 435
8.4 Rewards approximations for mean-reverse diffusion LPP — 441

9 European, knockout, reselling and random pay-off options — 456
9.1 Reward approximations for European-type options — 457
9.2 Reward approximations for knockout American-type options — 463
9.3 Reward approximations for reselling options — 469
9.4 Reward approximations for American-type options with random pay-off — 484

10 Results of experimental studies — 496
10.1 Binomial- and trinomial-tree reward approximations for discrete time models — 496
10.2 Skeleton reward approximations for discrete time models — 504
10.3 Reward approximations for continuous time models — 513
10.4 Reward approximation algorithms for Markov LPP — 520
