Contents

Control of Asymmetry in the Radical Addition Approach to Chiral Amine Synthesis ......................................................... 1
Gregory K. Friestad

Stereoselective Formation of Amines by Nucleophilic Addition to Azomethine Derivatives .................................................. 33
André B. Charette and Vincent Lindsay

Transition Metal-Catalyzed Enantioselective Hydrogenation of Enamides and Enamines .................................................. 75
Qi-Lin Zhou and Jian-Hua Xie

Asymmetric Hydrogenation of Imines .............................................. 103
Wei Li and Xumu Zhang

Advances in Transition Metal-Catalyzed Asymmetric Hydrogenation of Heteroaromatic Compounds .................................. 145
Yan-Mei He, Feng-Tao Song, and Qing-Hua Fan

Asymmetric Hydroamination .......................................................... 191

Asymmetric Reductive Amination .................................................... 261
Chao Wang and Jianliang Xiao
