Table of Contents

1. Introduction 9
2. Scientific background 11
2.1 Diabetes mellitus 11
2.1.1 Description and classification 11
2.1.2 Clinical features, diagnosis and risk factors of diabetes mellitus 13
2.1.3 Common diabetes-associated organ lesions 14
2.2 Diabetic nephropathy in mice and men 17
2.2.1 Pathohistological classification of diabetic nephropathy in humans 18
2.2.2 Nephron number and glomerular hypertrophy in diabetic nephropathy 19
2.2.3 Podocytes in health and disease 23
2.3 Mouse models in diabetes research 27
2.3.1 Mouse models of type 1 diabetes 27
2.3.2 Mouse models of type 2 diabetes 29
2.4 Mouse models of diabetic nephropathy 31
2.5 Glucose-dependent insulinotropic polypeptide and its receptor 34
2.6 GIPR<sup>dn</sup> transgenic mice in diabetes research 36
3. Material and Methods 39
3.1 Animals 39
3.1.1 Genotyping 40
3.1.2 Primer 40
3.1.3 DNA extraction 41
3.1.4 Polymerase chain reaction (PCR) 42
3.1.5 Gel electrophoresis 42
3.1.6 Blood pressure measurement 43
3.1.7 Blood and urine glucose testing 43
3.1.8 Serum parameters and urine analysis 44
3.1.9 Determination of food and water consumption and collection of 24-hour urine samples 44
3.1.10 Determination of urine albumin concentrations by enzyme linked immuno-sorbent assay (ELISA) 44
3.2 Kidney perfusion and tissue processing

3.2.1 Kidney perfusion

3.2.2 Tissue processing for plastic histology

3.2.3 Epon embedding and transmission electron microscopy

3.3 Quantitative morphological analyses

3.3.1 Estimation of kidney volume

3.3.2 Tissue shrinkage and section thickness estimation

3.3.3 Estimation of the total nephron number

3.3.4 Estimation of the total glomerular volume per kidney

3.3.5 Estimation of the mean glomerular volume

3.3.6 Estimation of the number of podocytes per glomerulus and the mean podocyte volume

3.3.7 Estimation of the mean glomerular mesangium and capillary volumes

3.3.8 Estimation of the capillary length per glomerulus

3.3.9 Determination of the filtration slit frequency (FSF)

3.3.10 Estimation of the true harmonic mean thickness of the glomerular basement membrane (GBM)

3.4 Semiquantitative evaluation of glomerulosclerosis

3.5 Immunohistochemistry

3.6 Data presentation and statistical analyses

4. Results

4.1 Body weight of GIPR\textsuperscript{dn} transgenic and wild-type mice

4.2 Blood glucose levels

4.3 Data of blood pressure measurements

4.3.1 Systolic blood pressure

4.3.2 Systolic blood pressure in percentage of control

4.4 Water and food consumption of GIPR\textsuperscript{dn} transgenic and control mice

4.5 Serum parameters of GIPR\textsuperscript{dn} transgenic and wild-type mice

4.6 Urine analysis of GIPR\textsuperscript{dn} transgenic and wild-type mice

4.6.1 Daily urine volume

4.6.2 Creatinine concentration in 24-hour urine samples

4.6.3 Urine-albumin excretion in 24-hour urine samples
4.6.4 Albumin-to-creatinine ratio (ACR) 89
4.7 Qualitative histological kidney findings 90
4.8 Results of quantitative morphological investigations 93
4.8.1 Kidney volume of GIPR\textsuperscript{dn} transgenic and wild-type mice 93
4.8.2 Total number of glomeruli in GIPR\textsuperscript{dn} transgenic and wild-type mice 94
4.8.3 Total glomerular volume GIPR\textsuperscript{dn} transgenic and wild-type mice 95
4.8.4 Mean glomerular volume of GIPR\textsuperscript{dn} transgenic and wild-type mice 96
4.8.5 Mean glomerular volume in percentage of control 97
4.8.6 Volume fraction of the mesangium in the glomeruli 98
4.8.7 Mean glomerular mesangium volume 99
4.8.8 Volume fraction of capillaries in the glomeruli 100
4.8.9 Mean glomerular capillary volume 101
4.8.10 Length density of the capillaries in the glomeruli 102
4.8.11 Capillary length per glomerulus 103
4.8.12 Numerical volume density of podocytes in the glomeruli 104
4.8.13 Total number of podocytes per glomerulus 105
4.8.14 Mean podocyte volume 106
4.8.15 Mean podocyte volume in percentage of control 107
4.8.16 Thickness of the glomerular basement membrane (GBM) 108
4.8.17 Filtration slit frequency (FSF) 109
4.9 Qualitative ultrastructural glomerular findings in GIPR\textsuperscript{dn} transgenic and wild-type mice 109
4.10 Determination of the mean thickness of GMA/MMA sections 111
5. Discussion 113
6. Perspectives 127
7. Summary 129
8. Zusammenfassung 131
9. Bibliography 133
10. Appendix 153
10.1 Example for the calculation of the harmonic mean thickness of the GBM 153
10.2 Acknowledgment 155
