Part I: Introduction to Directed Information Measures

Transfer Entropy in Neuroscience	3
<i>Michael Wibral, Raul Vicente, Michael Lindner</i>	
1 Introduction	3
2 Concepts	4
2.1 Physical Systems, Time Series, Random Processes and Random Variables	4
2.2 Basic Information Theory	5
2.3 The Transfer Entropy Functional	7
2.4 Interpretation of TE	8
3 Practical Application	12
3.1 Signal Representation and State Space Reconstruction	12
3.2 Transfer Entropy Estimators	13
3.3 A Graphical Summary of the TE Principle	16
3.4 Information Transfer Delay Estimation	18
3.5 Practical TE Estimation and Open Source Tools	20
4 Common Problems and Solutions	23
4.1 Statistical Testing to Overcome Bias and Variance Problems	23
4.2 Multivariate TE and Approximation Techniques	24
4.3 Observation Noise	25
4.4 Stationarity and Ensemble Methods	26
5 Relation to Other Directed Information Measures	27
5.1 Time-Lagged Mutual Information	27
5.2 Transfer Entropy and Massey's Directed Information ...	28
5.3 Momentary Information Transfer	30
6 Summary and Outlook	31
References	32

Efficient Estimation of Information Transfer	37
<i>Raul Vicente, Michael Wibral</i>	
1 Introduction	37
2 Why Information Theory?	38
2.1 Transfer Entropy	40
3 A Zoo of Estimators	41
3.1 Parametric Estimators	42
3.2 Non-parametric Estimators	43
4 Estimating Transfer Entropy from Time Series via Nearest Neighbor Statistics: Step by Step	49
4.1 Step 1: Reconstructing the State Space	49
4.2 Step 2: Computing the Transfer Entropy Numerical Estimator	50
4.3 Step 3: Using Transfer Entropy as a Statistic	51
4.4 Toolboxes	51
5 Coping with Non-stationarity: An Ensemble Estimator	52
6 Discussion	54
References	55

Part II: Information Transfer in Neural and Other Physiological Systems

Conditional Entropy-Based Evaluation of Information Dynamics in Physiological Systems	61
<i>Luca Faes, Alberto Porta</i>	
1 Introduction	62
2 Information Dynamics in Coupled Systems	63
2.1 Self Entropy, Cross Entropy and Transfer Entropy in Bivariate Systems	63
2.2 Self Entropy, Cross Entropy and Transfer Entropy in Multivariate Systems	65
2.3 Self Entropy, Cross Entropy and Transfer Entropy as Components of System Predictive Information	66
3 Strategies for the Estimation of Information Dynamics Measures	68
3.1 Corrected Conditional Entropy	69
3.2 Corrected Conditional Entropy from Non-uniform Embedding	73
3.3 Parameter Setting and Open Issues	75
4 Applications to Physiological Systems	78
4.1 Applications of Self Entropy Analysis	78
4.2 Applications of Cross Entropy Analysis	80
4.3 Applications of Transfer Entropy Analysis	81
5 Conclusions and Future Directions	83
References	84

Part III: Recent Advances in the Analysis of Information Processing

Measuring the Dynamics of Information Processing on a Local Scale in Time and Space	161
<i>Joseph T. Lizier</i>	
1 Introduction	161
2 Information-Theoretic Preliminaries	164
3 Local Information Theoretic Measures	167
3.1 Shannon Information Content and Its Meaning	168
3.2 Local Mutual Information and Conditional Mutual Information	170
3.3 Local Information Measures for Time Series	172
3.4 Estimating the Local Quantities	173
4 Local Measures of Information Processing	175
4.1 Local Information Storage	175
4.2 Local Information Transfer	176
5 Local Information Processing in Cellular Automata	180
5.1 Blinkers and Background Domains as Information Storage Entities	182
5.2 Particles, Gliders and Domain Walls as Dominant Information Transfer Entities	183
5.3 Sources Can Be Locally Misinformative	185
5.4 Conditional Transfer Entropy Is Complementary	185
5.5 Contrasting Information Transfer and Causal Effect	186
6 Discussion: Relevance of Local Measures to Computational Neuroscience	187
References	188

Parametric and Non-parametric Criteria for Causal Inference from Time-Series	195
<i>Daniel Chicharro</i>	
1 Introduction	195
2 Non-parametric Approach to Causal Inference from Time-Series	197
2.1 Non-parametric Criteria for Causal Inference	197
2.2 Measures to Test for Causality	198
3 Parametric Approach to Causal Inference from Time-Series	200
3.1 The Autoregressive Process Representation	201
3.2 Parametric Measures of Causality	202
3.3 Parametric Criteria for Causal Inference	208
3.4 Alternative Geweke Spectral Measures	210
3.5 Alternative Parametric Criteria Based on Innovations Partial Dependence	211
4 Comparison of Non-parametric and Parametric Criteria for Causal Inference from Time-Series	213
5 Conclusion	215
6 Appendix: Fisher Information Measure of Granger Causality for Linear Autoregressive Gaussian Processes	215
