# Table of contents

**Preface** ................................. 1

1  Introduction ........................................... 1
1.1  Classification of industries ......................... 1
1.2  Reference documents, requirements .................. 2

2  Wastewater treatment in the food industry .......... 7
2.1  General overview .................................... 7
2.2  Sugar refineries ..................................... 9
2.2.1  Characterisation of the sector .................. 9
2.2.2  Wastewater volume / composition, plus requirements .. 11
2.2.3  Wastewater treatment ............................ 11
2.2.4  Sugar-processing industry: confectionery .......... 12
2.3  Starch factories .................................... 13
2.3.1  Characterisation of the sector .................. 13
2.3.2  Wastewater volume / composition, plus requirements .. 14
2.3.2.1  Potato starch .................................. 14
2.3.2.2  Corn starch .................................... 14
2.3.2.3  Wheat starch ................................... 15
2.3.3  Wastewater treatment ............................ 15
2.4  Edible oil and fat production ....................... 16
2.4.1  Characterisation of the sector .................. 16
2.4.2  Wastewater volume / composition, plus requirements .. 17
2.4.3  Wastewater treatment ............................ 19
2.4.4  Modification: transesterification .................. 19
2.5  Potato processing industry ......................... 20
2.5.1  Characterisation of the sector .................. 20
2.5.2  Wastewater volume / composition, plus requirements .. 20
2.5.3  Wastewater treatment ............................ 21
2.6  Fruit and vegetable processing industry ............ 22
2.6.1  Characterisation of the sector .................. 22
2.6.2  Wastewater volume / composition, plus requirements .. 24
2.6.3  Wastewater treatment ............................ 25
2.6.4  Fruit juice production ............................ 26
2.7  Breweries ........................................... 27
2.7.1  Characterisation of the sector .................. 27
2.7.2  Wastewater volume / composition, plus requirements .. 29
2.7.3  Wastewater treatment ............................ 29
2.8  Distilleries ......................................... 31
2.8.1  Characterisation of the sector .................. 31
2.8.2  Wastewater volume / composition, plus requirements .. 32
2.8.3  Wastewater treatment ............................ 33
2.9  Dairy-processing industry .......................... 33
2.9.1  Characterisation of the sector .................. 33
2.9.2  Wastewater volume / composition, plus requirements .. 34
2.9.3  Wastewater treatment ............................ 35
2.10 Abattoirs .......................................... 36
2.10.1  Characterisation of the sector .................. 36
2.10.2  Wastewater volume / composition, plus requirements .. 37
2.10.3  Wastewater treatment ............................ 40
3 Other industries using predominantly organic constituents

3.1 Textile industry

3.1.1 Characterisation of the sector

3.1.2 Wastewater volume / composition, plus requirements

3.1.3 Wastewater avoidance / treatment

3.2 Wastewater from leather manufacturing

3.2.1 Characterisation of the sector

3.2.2 Wastewater volume / composition, plus requirements

3.2.3 Wastewater treatment

3.3 Wastewater from paper and cellulose manufacturing

3.3.1 Paper consumption and the paper industry in Germany

3.3.2 The use and processing of raw materials

3.3.2.1 Cellulose production

3.3.2.2 Production of groundwood pulp

3.3.2.3 Waste paper processing

3.3.2.4 Other additives

3.3.3 Description of the paper manufacturing process

3.3.4 Water cycles and in-house measures

3.3.4.1 Types of water cycle

3.3.4.2 Circulation systems and characterisation of water cycles

3.3.4.3 Optimising the water cycles: in-house measures

3.3.5 Volume and composition of residual wastewater, plus discharge conditions

3.3.5.1 Wastewater composition in general

3.3.5.2 Wastewater accumulation: evolution of specific wastewater volume

3.3.5.3 Grade-specific wastewater composition

3.3.5.4 Discharge conditions

3.3.5.5 Type of water cycle

3.3.5.6 Wastewater treatment processes

3.3.6 Example of two-stage aerobic / aerobic wastewater treatment

3.3.6.1 Mechanical pre-purification / separation of solids

3.3.6.2 Biological processes

3.3.6.3 Example of two-stage anaerobic / aerobic wastewater treatment

4 Overview of water management in the chemical industry

4.1 General overview

4.2 Production processes

4.3 Wastewater constituents, requirements, and treatment

4.3.1 Wastewater constituents and requirements

4.3.2 In-house measures

4.3.3 Wastewater treatment

5 Wastewater treatment in the metal industry

5.1 General overview

5.2 Wastewater constituents / treatment, plus requirements

5.3 Electroplating shops

5.3.1 Characterisation of the sector

5.3.2 Degreasing

5.3.3 Pickling

5.3.4 Electrochemical metal deposition

5.3.5 Wastewater volume / composition, plus requirements

5.3.6 In-house measures to reduce wastewater (according to volume and composition), wastewater treatment

6 Overview of wastewater treatment in heavy industry

6.1 General overview

6.2 Smelting works

6.2.1 Iron and steel industry – semi-finished goods plants

6.2.1.1 Pig iron extraction

6.2.1.2 Steel production

6.2.1.3 Steel forming

6.2.2 Non-ferrous metal industry

6.3 Non-metallic mineral processing

6.4 Glass industry
