**Prologue by Adolf Ogi: Success and sustainability** .......................... 7
**Introduction: Taming the great outdoors** ........................................ 8

---

**IN THE BEGINNING WAS THE LIGHT**

Tuberculosis patients travelled to the Alps to benefit from its winter climate, and winter sports enthusiasts soon followed.

**Switzerland:** Land of freedom, paradise on earth .................................. 13
**Johannes Badrutt:** A technophile who believed in god, guests and the climate .............. 14

---

**TWO BOARDS CREATE A REVOLUTION**

How skiing made more out of a winter in the mountains.

**Ski fashion:** From long skirts to stirrup pants ......................................... 47
**Victor de Beauclair:** A ski pioneer from Brazil ......................................... 50
**Henry Lunn:** The ski pioneer who never skied ......................................... 53
**The founding years:** The 1920s was the decade that launched the classic ski races ........ 58
**Ski school:** Skiing goes to school .............................................................. 65

---

**GETTING UP THE MOUNTAIN**

No winter tourism without railways and cableways.

**Rosa Dahinden:** The woman behind the Rigibahn’s winter service ......................... 77
**Arnold Annen:** A farmer builds a cable car ............................................. 81
**Aeroport St. Moritz:** The airport on a lake .............................................. 82

---

**WINTER SPORTS GO OLYMPIC**

The Winter Olympics held in St. Moritz in 1928 and 1948 were a sign of the increasing social recognition of winter sports.

**Ice hockey:** Tour de Suisse in the eternal ice ........................................... 94
**1948 Olympics:** The memories of legendary sports reporter Sepp Renggli ............... 99
**Nino Bibbia:** A delivery boy won Olympic gold in skeleton racing – the sport of the rich .. 102

---

**WINTER SPORTS EVERYWHERE**

How winter leisure activities and competitions became a national pastime and part of the country’s defence strategy.

**Bobsled racing:** Bob on the tracks and on the streets .................................. 110
**Hollywood in Switzerland:** Charlie Chaplin and other stars visit St. Moritz .............. 117
**Alpine neighbours:** Winter tourism takes over the entire Alpine region ............... 122
**Giovanni Testa:** The saddler who developed a new skiing technique and new business models .. 125
GREETINGS FROM PARADISE

Posters were the medium of choice for attracting people to winter sports resorts.

Badrutt's bet: A good story makes history ................................................................. 133
St. Moritz's directors of tourism: Shining guardians of the brand ............................. 137

WINTER SPORTS – A WEALTH OF DESIGN

How the production of sports equipment developed from a craft to an industry.

Association for Osteosynthesis: Plates and screws instead of disability benefits ........ 155
Karl Molitor: Ski racer and shoe manufacturer ......................................................... 156
The Davos sledge: Plain and simply a sledge ......................................................... 160
Architecture: Form follows function ......................................................................... 164

A NEVER-ENDING BOOM

Following the Second World War, winter sports experienced a boom that lasted for decades, with skiing at the forefront.

Zermatt: One village's late arrival as a winter sports hot spot ..................................... 174
Fridli Wyss: The reminiscences of a ski instructor .................................................. 181
The Engadin Ski Marathon: A marathon lasts the distance ....................................... 186
Walter Gurtner: The master butcher who developed a ski resort ......................... 191
Art Furrer: A cowboy on skis ................................................................................. 195
Sapporo is at the heart of Switzerland ....................................................................... 196

EXTENDING THE WINTER

Glacier summer ski areas and snow-making machines extend the winter season, which in some locations is all about luxury.

Polo on snow: A summer event adapted to winter .................................................. 205
Hartly Mathis: The pioneer of gourmet gastronomy on the slopes ......................... 208
Gstaad vs. St. Moritz: What unites and distinguishes the two high-society destinations 210
Leo Jeker: The Alpine snow-making pioneer ......................................................... 215

BACK TO THE ROOTS

The snowboard reinvents snow sport, while sleds, ski tours and winter hiking experience a revival.

Evelyne Vuilleumier: Snowboarding as a way of life .................................................. 225
Xtreme: How much ice and rock can you handle? ..................................................... 228
Patrouille des Glaciers: An ironman in the snow ...................................................... 233

Epilogue: Two sides to every story ................................................................. 237
A look ahead: Trend researcher David Bosshart on the future of winter tourism ...... 240
Afterword by David Moran: Britain’s fascination with Switzerland was crucial for winter tourism 243
