

CONTENTS

<i>Preface</i>	v
--------------------------	---

Introduction

Perspectives of Structural Ceramics and Present R & D Efforts. <i>M. H. Van de Voorde</i>	1
--	---

Engineering Properties

Mechanical Properties of Ceramics <i>G. De Portu and G. N. Babini</i>	21
Fracture Mechanics of Ceramics <i>D. Munz</i>	50
Weakest-Link Failure Prediction for Ceramics <i>L. Dortmans and G. de With</i>	76
Creep of Non-oxide Ceramics Considering Oxidative Influences <i>F. Thümmler</i>	82
Practical Designing Aspects of Engineering Ceramics <i>J. T. van Konijnenburg, C. A. M. Siskens and S. Sinnema</i>	98

Ceramic Matrix Composites

Characteristics of Ceramic Composites <i>G. Ziegler</i>	111
Whisker-Reinforced Composites <i>J. L. Baptista, R. N. Correia and J. M. Vieira</i>	132
Ceramic Matrix Composites: High Performance Damage Tolerant Materials <i>M. Parlier and J. F. Stohr</i>	157

Technological Aspects

Machining Advanced Ceramics: A Challenge in Production Technology	187
<i>W. König and E. Verlemann</i>	
Joining of Ceramics	201
<i>E. Lugscheider, M. Boretius and W. Tillmann</i>	
Nondestructive Testing of Ceramic Engineering Components by X-ray, Ultrasonic and Other Techniques	224
<i>W. Arnold and H. Reiter</i>	
The Processing of Structural Ceramics	243
<i>R. J. Brook</i>	

Industrial Applications

Ceramic Composite Development	251
<i>P. Lamicq, C. Bonnet and S. Chateigner</i>	
Ceramics in Aero-Engines	258
<i>J. Wortmann</i>	
Ceramics in the Automobile Industry	273
<i>C. Razim and C. Kaniut</i>	
Ceramics in Energy Generation Systems	296
<i>F. Forlani</i>	
Applications and Design of Porous Ceramic Structures	312
<i>H. J. Veringa, R. A. Terpstra and A. P. Philipse</i>	

Current Research Activities

Aligned Whisker Reinforcement by Gelled Extrusion	321
<i>D. G. Brandon and M. Farkash</i>	
Intermediate Temperature Bend Strength of 5wt% Yttria Stabilized Zirconia	329
<i>G. Filacchioni, E. Casagrande, U. De Angelis, D. Ferrara, A. Moreno and L. Pilloni</i>	
Ceramic Composite Materials: A Contribution to an Overall Technology Assessment.	336
<i>F. Casteels, J. Sleurs and R. Lecocq</i>	
<i>Index of Contributors</i>	343
