# Table of Contents

## 25th Anniversary Talk

Laws of Programming: The Algebraic Unification of Theories of Concurrency .................................................. 1  
*Tony Hoare*

## Invited Talks

The Benefits of Sometimes Not Being Discrete ................................. 7  
*Jane Hillston*

Deterministic Negotiations: Concurrency for Free .......................... 23  
*Javier Esparza*

Generalized Bisimulation Metrics ............................................. 32  
*Konstantinos Chatzikokolakis, Daniel Gebler, Catuscia Palamidessi, and Lili Xu*

## Process Calculi

Choreographies, Logically .......................................................... 47  
*Marco Carbone, Fabrizio Montesi, and Carsten Schürmann*

Deadlock Analysis of Unbounded Process Networks .......................... 63  
*Elena Giachino, Naoki Kobayashi, and Cosimo Laneve*

Trees from Functions as Processes .......................................... 78  
*Davide Sangiorgi and Xian Xu*

Bisimulations Up-to: Beyond First-Order Transition Systems .......... 93  
*Jean-Marie Madiot, Damien Pous, and Davide Sangiorgi*

## Model Checking and Abstraction

Parameterized Model Checking of Rendezvous Systems .................... 109  
*Benjamin Aminof, Tomer Kotek, Sasha Rubin, Francesco Spegni, and Helmut Veith*

On the Completeness of Bounded Model Checking for Threshold-Based Distributed Algorithms: Reachability ............ 125  
*Igor Konnov, Helmut Veith, and Josef Widder*

</table>
Complexity

A Linear-Time Algorithm for the Orbit Problem over Cyclic Groups.... 327
Anthony Widjaja Lin and Sanming Zhou

A Nearly Optimal Upper Bound for the Self-Stabilization Time in
Herman's Algorithm ................................................. 342
Yuan Feng and Lijun Zhang

Bounds on Mobility ................................................. 357
Reiner Hüchting, Rupak Majumdar, and Roland Meyer

Process Calculi and Types

Typing Messages for Free in Security Protocols: The Case of
Equivalence Properties ............................................. 372
Remy Chrétien, Véronique Cortier, and Stéphanie Delaune

Using Higher-Order Contracts to Model Session Types
(Extended Abstract) .................................................. 387
Giovanni Bernardi and Matthew Hennessy

A Semantic Deconstruction of Session Types ......................... 402
Massimo Bartoletti, Alceste Scalas, and Roberto Zunino

Timed Multiparty Session Types .................................... 419
Laura Bocchi, Weizhen Yang, and Nobuko Yoshida

Categories, Graphs and Quantum Systems

A Categorical Semantics of Signal Flow Graphs ....................... 435
Filippo Bonchi, Paweł Sobociński, and Fabio Zanasi

Generic Forward and Backward Simulations III:
Quantitative Simulations by Matrices .............................. 451
Natsuki Urabe and Ichiro Hasuo

A General Framework for Well-Structured Graph Transformation
Systems ............................................................... 467
Barbara König and Jan Stückrath

(Un)decidable Problems about Reachability of Quantum Systems .... 482
Yangjia Li and Mingsheng Ying

Automata and Time

Ordered Navigation on Multi-attributed Data Words ................. 497
Normann Decker, Peter Habermehl, Martin Leucker, and
Daniel Thoma
Verification for Timed Automata Extended with Unbounded Discrete Data Structures .................................................. 512
    Karin Quaas

Reducing Clocks in Timed Automata while Preserving Bisimulation .... 527
    Shibashis Guha, Chinmay Narayan, and S. Arun-Kumar

Games

Qualitative Concurrent Parity Games: Bounded Rationality .......... 544
    Krishnendu Chatterjee

Adding Negative Prices to Priced Timed Games .......................... 560
    Thomas Brihaye, Gilles Geeraerts, Shankara Narayanan Krishna,
    Lakshmi Manasa, Benjamin Monmege, and Ashutosh Trivedi

Tight Game Abstractions of Probabilistic Automata .............. 576
    Falak Sher Vira and Joost-Pieter Katoen

Author Index ................................................................. 593
