Table of Contents ............................................................................................................. i
List of Tables ...................................................................................................................... iv
List of Figures ...................................................................................................................... vi
List of abbreviations and acronyms.................................................................................. viii

1. INTRODUCTION ........................................................................................................... 1
   1.1 Background to the research issue ........................................................................... 1
   1.2 Problem statement and research objectives .......................................................... 3
   1.3 Rationale of the study and methodological approaches .......................................... 8
   1.4 Organisation of the study ....................................................................................... 12

2. POLICY PLANS AND THE FRUIT AND VEGETABLE SUB-SECTOR... 13
   2.1 Definition of concepts and their interpretation ..................................................... 13
       2.1.1 Micro, small and medium-scale enterprises (MSEs) .................................... 13
       2.1.2 Economic organisation ................................................................................. 15
       2.1.3 Coordination and motivation ...................................................................... 15
       2.1.4 Organisational and functional structure of enterprises ............................... 16
       2.1.5 Supply chain management ......................................................................... 17
       2.1.6 Market access .............................................................................................. 18
   2.2 Private sector economy in Tanzania ..................................................................... 19
   2.3 Importance of micro, small and medium-scale enterprises .................................. 25
   2.4 Potential bottlenecks in the development of the sub-sector .................................... 27
   2.5 Fruit and vegetable sub-sector in Tanzania .......................................................... 34
       2.5.1 Fruit and vegetable processing ..................................................................... 36
       2.5.2 Business environment and product pricing .................................................. 38
       2.5.3 Organisation and supply chain characteristics .............................................. 44
           2.5.3.1 Organisational perspectives ................................................................. 44
           2.5.3.2 Supply chain architecture and characteristics of the surveyed enterprises ........................................................................................................... 48
           2.5.3.3 Supply chain process and the levels of effectiveness .......................... 61
       2.5.4 Performance measurement system (PMS) ....................................................... 64

3. THEORETICAL AND METHODOLOGICAL APPROACHES ................. 67
   3.1 Conceptual consideration ....................................................................................... 67
   3.2 Growth theories regarding small-scale enterprises .............................................. 68
   3.3 Research design .................................................................................................... 71
   3.4 Sampling survey and procedures of data collection ............................................. 73
   3.5 Methods of analysis for the sample MSEs ............................................................ 76
      3.5.1 Descriptive analysis ....................................................................................... 76
3.5.2 Econometric analysis .................................................. 77
  3.5.2.1 Modelling of growth hazard functions ...................... 82
  3.5.2.2 Description of growth outcomes, covariates and tested hypotheses .................................................. 88
3.5.3 Return on Investment (ROI) analyses ................................ 93

4. ANALYSIS AND FINDINGS .................................................. 95

4.1 Descriptive analyses and findings of field study .................. 95
  4.1.1 Socio-economic characteristics of the respondents ........... 95
    4.1.1.1 Gender status of the respondents ......................... 95
    4.1.1.2 Age distribution of the respondents ...................... 97
    4.1.1.3 Education level of the respondents:
      A gender perspective ............................................... 98
    4.1.1.4 Respondents’ perceptions on key problems facing their businesses ........................................... 100
  4.1.2 General characteristics of the study enterprises ............. 103
    4.1.2.1 Employment structure of the enterprises:
      Respondents’ perceptions ........................................ 103
    4.1.2.2 Relationship between staff numbers and operational capital .................................................. 106
    4.1.2.3 Labour and capital investment productivities ............ 107
    4.1.2.4 Relationship of MSE staff numbers and revenue ......... 108
    4.1.2.5 Relationship between MSE staff numbers and profits .... 109
  4.1.3 Business experience of manager-owners and MSE's ownership . 111
  4.1.4 Respondents’ perception of MSE concentrations in an area ... 111
  4.1.5 Growth indicators for the aggregate study MSEs .............. 113
    4.1.5.1 Labour, capital investment and production level ....... 113
    4.1.5.2 Capital in machinery and financial performance
      of MSEs .................................................................. 117
    4.1.5.3 Growth values of MSEs for analysis in this study ....... 118
    4.1.5.4 Set growth outcome statuses and dummy covariates ..... 119
    4.1.5.5 Accessibility of service points: Spatial distances ...... 123
    4.1.5.6 Summary of the descriptive analyses ...................... 127

4.2 Econometric analysis of growth performance ....................... 128
  4.2.1 MSE growth performance in terms of revenues ............... 128
  4.2.2 Study MSEs growth performance in terms of capital
      investment in machinery ............................................. 133
  4.2.3 Forecast time for study MSEs to achieve standard
      growth levels .......................................................... 136
  4.2.4 Summary about study MSEs’ growth in a view of tested hypotheses .................................................. 138

4.3 Return on investment (ROI) for the study MSEs .................. 141
  4.3.1 Background information to the ROI analyses of the study enterprises ........................................... 141
4.3.2 ROI analyses of the study enterprises ........................................ 144
4.3.2.1 ROI scenario analysis for the study MSEs ......................... 147
4.3.2.2 Summary on ROI results for the study MSEs ..................... 147
4.4 Summary regarding ROI, descriptive and regression-Cox PH analyses of the study MSEs .................................................. 148

5. PROPOSED WORKING FRAMEWORK FOR THE STUDY ENTREPRENEURS ................................................................. 151
5.1 Narrative and theoretical perspective on the study MSEs ............. 151
5.2 Analysis of manager-owners' willingness to form cooperatives .... 158
  5.2.1 Data description for manager-owners' cooperation analysis ...... 158
  5.2.2 Modelling manager-owners' level of willingness to cooperate... 163
5.3 Descriptive findings for willingness to cooperate .................... 166
  5.3.1 Willingness to cooperate among the study manager-owners .... 166
  5.3.2 Relation of manager-owners' age, education and cooperative decision .......................................................... 167
  5.3.3 Manager-owners' cooperation decisions across the study regions ............................................................................. 168
  5.3.4 Number of owners in an enterprise and the decision to cooperate .................................................................................. 169
5.4 Logit regression findings of the manager-owners' willingness to cooperate model (n=130) ......................................................... 170
5.5 Reasons for cooperative mechanism proposition ..................... 174
5.6 Organisational form of the proposed cooperative system .......... 180
5.7 Linkage formation for fruit and vegetable processing vendors ...... 183

6. CONCLUSIONS AND RECOMMENDATIONS .................................. 186
6.1 Conclusions and discussions ..................................................... 186
6.2 Recommendations .................................................................... 190
  6.2.1 Policy suggestions ............................................................... 190
  6.2.2 Managerial suggestions ....................................................... 192

ZUSAMMENFASSUNG ..................................................................... 193
