An Explicit Integration Finite Element Method for Impact Noise Generation at a Squat .................................................. 63
Z. Yang, Z. Li, R.P.B.J. Dollevoet

Poster Session 1: Prospects, Legal Regulation, Perception/Wheel and Rail Noise/Prediction, Measurements, Monitoring

Future European Noise Emission Ceilings: Threat or Solution? A Review Based on Swiss and Dutch Ceilings .............................................. 71
E. Verheijen, F.B.J. Elbers

Comparison between Road and Rail Noise Cost per Transported Ton of Cargo ................................................................. 79
M. Ögren, H. Andersson, T. Jerson

A Survey of Freight Locomotive Passby Noise Emissions ...................... 85
B.E. Croft, B. Dowdell, D. Hanson, D.C. Anderson

On the Importance of Accuracy of Geographic Model Data for Noise Impact Studies ................................................................. 93
A.H.W.M. Kuijpers, M.S. Roovers, G.H. Groenveld

The Efficiency of Noise Reduction Measures on Railway Infrastructure in Normal Operating Conditions - NOVIBRAIL .................. 101
J. Hlavdček, L. Hejzlar, R. Kolmačka

Characterizing Wheel Flat Impact Noise with an Efficient Time Domain Model ........................................................................ 109
J. Yang, D.J. Thompson, Y. Takano

Study on the Sound Radiation Directivity of a Railway Wheel and the Relationship between Directivity and Mode Shape .................. 117
J. Han, X.B. Xiao, R.Q. Wang, X. Zhao, G.T. Zhao, X.S. Jin

Empirical Modeling of Railway Aerodynamic Noise Using One Microphone Pass-By Recording ........................................... 125
X. Zhang

Localizing Noise Sources on a Rail Vehicle during Pass-By ..................... 133
J. Gomes, J. Hald, B. Ginn

Experimental Characterization of the Vibro-Acoustic Behaviour of a Switch ........................................................................ 141
B. Faure, E. Bongini, A. Renoncourt, A. Pouzet
Experimental Comparison of Maximum Length Sequence (MLS) and Impact Hammer Methods to Evaluate Vibration Transfer Functions in Soil ...................................................... 149
G. Coquet, A. Kengni Kengang

sonRAIL Web Tool – A New Web Application of the Swiss Method on Railway Noise Calculation RELEASED IN 2013 .................................................. 157
C. Czolbe, J.-M. Wunderli, F. Fischer

Concept for Measuring Aeroacoustic Noise Transmission in Trains Derived from Experience Gained in Aircraft Testing .................................................. 165
J. Galuba (formerly Kokavec), C. Spehr

Session 3: Wheel and Rail Noise – Part 2

Innovative Measures for Reducing Noise Radiation from Track .................. 173
M. Beier, T. Lölgen, M. Starnberg

Innovative Noise Mitigation Measures in the Framework of “Konjunkturprogramm II” in Germany ...................................................... 181
U. Moehler, M. Liepert, A. Martens

Session 3: Prediction, Measurements, Monitoring – Part 1

Indirect Method of Rail Roughness Measurement – VUKV Implementation and Initial Results ...................................................... 189
L. Phamová, P. Bauer, J. Malinský, M. Richter

Background for a New Standard on Pass-By Measurement of Combined Roughness, Track Decay Rate and Vibroacoustic Transfer Functions .......... 197
M.G. Dittrich, F. Létourneaux, H. Dupuis

Monitoring Rail Condition Based on Sound and Vibration Sensors Installed on an Operational Train ...................................................... 205
T. Jensen, S. Chauhan, K. Haddad, W. Song, S. Junge

Session 4: Prediction, Measurements, Monitoring – Part 2

Transposition of Noise Type Test Data for Tracks and Vehicles ................. 213
H.W. Jansen, M.G. Dittrich, G. Squicciarini, D.J. Thompson, B. Betgen

Virtual Testing within the TSI Noise: How to Introduce Numerical Simulation into a Certification Process? ...................................................... 221
E. Bongini, R. Cordero

A Study of the Measurement Technology of Noise Sources of High-Speed Trains ...................................................... 229
H.I. Koh, A. Nordborg, H.M. Noh
Determination of Insertion Losses for Vibration Mitigation Measures in Track by Artificial Vibration Excitation ............................................. 237
R. Garburg, D. Heiland, M. Mistler

The Prediction of Vibration Transfer for Railway Induced Ground Vibration ....................................................................................... 245
H. Verbraken, N. Veirman, V. Cuellar, G. Lombaert, G. Degrande

Session 5: Ground-Borne Vibration – Part 1

G. Lombaert, G. Degrande, S. François, D.J. Thompson

Prediction of Railway Induced Vibration and Ground Borne Noise Exposure in Building and Associated Annoyance .................................. 289
M. Villot, S. Bailhache, C. Guigou, P. Jean

Attenuation of Railway Noise and Vibration in Two Concrete Frame Multi-storey Buildings ................................................................. 297
D.E.J. Lurcock, D.J. Thompson, O.G. Bewes

Session 6: Ground-Borne Vibration – Part 2

Developing a Good Practice Guide on the Evaluation of Human Response to Vibration from Railways in Residential Environments ............. 305
J.S. Woodcock, E. Peris, D.C. Waddington, A.T. Moorhouse

Vibration Control at Sound Transit .......................................................... 313
J.T. Nelson, D.L. Watry

Recent Developments in the Pipe-in-Pipe Model for Underground-Railway Vibration Predictions .......................................................... 321
K.A. Kuo, S.W. Jones, M.F.M. Hussein, H.E.M. Hunt

Prediction of Railway-Induced Ground Vibrations: The Use of Minimal Coordinate Method for Vehicle Modelling ................................. 329
G. Kouroussis, G. Alexandrou, J. Florentin, O. Verlinden

Poster Session 2: Interior Noise, Sound Barrier/Grinding, Corrugation, Roughness/Resilient Track Forms

Transfer Path Analysis on a Siemens Combino-Plus Tram in Almada – Seixal (Lisbon) ................................................................. 337
G. Schleinzer, T. Kern
Characteristics of Sound Insulation and Insertion Loss of Different Deloading Sound Barriers for High-Speed Railways

B. He, X.B. Xiao, X. Zhou, J. Han, X.S. Jin

Optimizing Capacity of Railroad Yards within Noise Limits Using a Dynamic Noise Model

S.N. Hoogzaad, M.S. Roovers

Modeling of Wheel-Track Interaction with Rail Vibration Damper and Its Application for Suppressing Short Pitch Rail Corrugation

T.X. Wu, Y.R. Wang

Investigating the Effects of a Network-Wide Rail Grinding Strategy on Wayside Noise Levels

N.J. Craven, O.G. Bewes, B.A. Fenech, R.R.K. Jones

Acoustic and Dynamic Characteristics of a Complex Urban Turnout Using Fibre-Reinforced Foamed Urethane (FFU) Bearers

S. Kaewunruen

Ensuring Acceptable Vibration Levels in Listed Buildings by Means of Precise Vibration Measurements and Highly-Efficient Floating Slab Track

T. Jaquet

An Assessment of the Effectiveness of Replacing Slab Track to Control Groundborne Noise and Vibration in Buildings above an Existing Railway Tunnel

O.G. Bewes, L.J. Jakielaszek, M.L. Richardson

Mitigation Measures against Vibration for Ballasted Tracks – Optimisation of Sleepers, Sleeper Pads and the Substructure by Combined Finite-Element Boundary-Element Calculations

L. Auersch, W. Rückner

Session 7: Squeal Noise, Structure-Borne Noise

Innovative Measures for Reducing Noise Radiation from Steel Railway Bridges

D. Stiebel, T. Lölgen, C. Gerbig

Modelling of Railway Curve Squeal Including Effects of Wheel Rotation

A. Pieringer, L. Baeza, W. Kropp

FASTSIM with Falling Friction and Friction Memory

E.A.H. Vollebregt

Towards an Engineering Model for Curve Squeal

### Poster Session 3: Ground-Borne Vibration/High-Speed Trains, Aerodynamic Noise/Squeal Noise, Structure-Borne Noise

**Ground-Borne Vibration Mitigation Measures for Turnouts:**
State-of-the-Art and Field Tests .......................... 547
*R. Müller, J.C.O. Nielsen, B. Nélain, A. Zemp*

**Reducing Railway Induced Ground-Borne Vibration by Using Trenches and Buried Soft Barriers** .......................... 555
*J. Jiang, M.G.R. Toward, A. Dijckmans, D.J. Thompson, G. Degrande, G. Lombaert, J. Ryue*

**Pantograph Area Noise and Vibration Transmission Characteristics and Interior Noise Reduction Method of High-Speed Trains** .................. 563
*J.Q. Guo, J.M. Ge, Z.J. Sun, S.Q. Liu, Y.J. Zhao, J.S. Lin*

**Micro-Pressure Wave Emissions from German High-Speed Railway Tunnels – An Approved Method for Prediction and Acoustic Assessment** .... 571
*C. Gerbig, M. Hieke*

**Three Noise Mitigation Measures for Steel Railway Bridges** .................. 579
*H. Venghaus*

**The Mechanisms of Curve Squeal** .................................. 587
*J. Jiang, D.C. Anderson, R. Dwight*

**Proposals for Improved Measurement Methods for Curve Squeal and Braking Noise** .................................. 595
*M.G. Dittrich, H.W. Jansen*

**Curve Squeal in the Presence of Two Wheel/Rail Contact Points** .................. 603
*G. Squicciarini, S. Usberti, D.J. Thompson, R. Corradi, A. Barbera*

### Session 10: Resilient Track Forms

**A Review of Measurement Data on the Performance of a Resilient Track Form as a Mitigation Measure for Ground-Borne Noise** .................. 611
*S.J. Cox, D. Herron*

**Challenges in the Design and Fabrication of Elastomeric Springs for Floating Slab Tracks** .................. 619
*S. Rajaram, H.J. Saurenman*

**Vibration Mitigation by Innovative Low Stiffness Rail Fastening Systems for Ballasted Track** .................. 627
*B. Faure, E. Bongini, G. Lombaert, C. Guigou-Carter, D. Herron*
Control of Railway Induced Ground Vibrations: Influence of Excitation Mechanisms on the Efficiency of Resilient Track Layers ................................. 635
B. Nélain, N. Vincent, G. Lombaert, G. Degrande

Session 11: Grinding, Corrugation, Roughness

Measurement of Long Wavelength Irregularities on Rails .................... 643
S.L. Grassie

Statistical Description of Wheel Roughness ..................................... 651
G. Squicciarini, M.G.R. Toward, D.J. Thompson, C.J.C. Jones

Rail Corrugation Growth on Curves – Measurements, Modelling and Mitigation ........................................ 659
P.T. Torstensson, J.C.O. Nielsen

Effects of Track Stiffness and Tuned Rail Damper on Rail Roughness Growth and Rail Vibration Levels on Metro System ............................ 667
A. Wang, Z. Wang, Z. Zhao, Y. Zhang, Y. Duan, T. Lei, M. Du

Session 11: Interior Noise, Sound Barrier – Part 1

Prediction of Acoustical Wall Pressure Levels of Rolling Stock Vehicles .... 675
A. Bistagnino, A. Vallespin, J. Sapena

Session 12: Interior Noise, Sound Barrier – Part 2

Study on Effective Sound Barriers for High Speed Trains .................... 683
T. Kitagawa, K. Nagakura, S. Tanaka, K. Murata

Study on Abnormal Interior Noise of High-Speed Trains ..................... 691
J. Zhang, X.B. Xiao, G. Han, Y. Deng, X.S. Jin

Interior Noise Prediction of High-Speed Train Based on Hybrid FE-SEA Method ................................................................. 699

Attractive Train Interiors: Minimizing Annoying Sound and Vibration .... 707
U. Orrenius, U. Carlsson

Author Index ................................................................................. 715
