Preface xix  

### PART I  INTERNET CRIME INVESTIGATIONS

1  
Conditional Weighted Transaction Aggregation for Credit Card Fraud Detection  
*Wee-Yong Lim, Amit Sachan, and Vrizlynn Thing*  
3  

2  
Using Fraud Trees to Analyze Internet Credit Card Fraud  
*Clive Blackwell*  
17  

3  
Automated Analysis of Underground Marketplaces  
*Aleksandar Hudic, Katharina Krombholz, Thomas Otterbein, Christian Platzer, and Edgar Weippl*  
31  

4  
An Exploratory Profiling Study of Online Auction Fraudsters  
*Vivien Chan, Kam-Pui Chow, Michael Kwan, Guy Fong, Michael Hui, and Jemy Tang*  
43  

5  
Web User Profiling Based on Browsing Behavior Analysis  
*Xiao-Xi Fan, Kam-Pui Chow, and Fei Xu*  
57  

6  
Validation Rules for Enhanced Foxy P2P Network Investigations  
*Ricci Ieong and Kam-Pui Chow*  
73
PART II  FORENSIC TECHNIQUES

7  Windows Event Forensic Process  
Quang Do, Ben Martini, Jonathan Looi, Yu Wang, and Kim-Kwang Choo  

8  Schema Reconstruction in Database Forensics  
Oluwasola Mary Adedayo and Martin Olivier  

9  Analysis of the Use of XOR as an Obfuscation Technique in a Real Data Corpus  
Carolina Zarate, Simson Garfinkel, Aubin Heffernan, Scott Horras, and Kyle Gorak  

10 Similarity Hashing Based on Levenshtein Distance  
Frank Breitinger, Georg Ziroff, Steffen Lange, and Harald Baier  

11 Using Approximate Matching to Reduce the Volume of Digital Data  
Frank Breitinger, Christian Winter, York Yannikos, Tobias Fink, and Michael Seefried  

12 Active Linguistic Authentication Using Real-Time Stylometric Evaluation for Multi-Modal Decision Fusion  
Ariel Stolerman, Alex Fridman, Rachel Greenstadt, Patrick Brennan, and Patrick Juola  

13 Breaking the Closed-World Assumption in Stylometric Authorship Attribution  
Ariel Stolerman, Rebekah Overdorf, Sadia Afroz, and Rachel Greenstadt  

PART III  MOBILE DEVICE FORENSICS

14 Preserving Dates and Timestamps for Incident Handling in Android Smartphones  
Robin Verma, Jayaprakash Govindaraj, and Gaurav Gupta
Contents

15 An Open Source Toolkit for iOS Filesystem Forensics  
Ahmad Raza Cheema, Mian Muhammad Waseem Iqbal, and Waqas Ali

16 Smartphones as Distributed Witnesses for Digital Forensics  
Heloise Pieterse and Martin Olivier

17 Smartphone Message Sentiment Analysis  
Panagiotis Andriotis, Atsuhiro Takasu, and Theo Tryfonas

18 Forensic Analysis of the TomTom Navigation Application  
Nhien-An Le-Khac, Mark Roeloffs, and Tahar Kechadi

PART IV FORENSIC TOOLS AND TRAINING

19 Performance of a Logical Five-Phase, Multithreaded, Bootable Triage Tool  
Ibrahim Baggili, Andrew Marrington, and Yasser Jafar

20 Towards Fully Automated Digital Alibis with Social Interactions  
Stefanie Beyer, Martin Mulazzani, Sebastian Schrittwieser, Markus Huber, and Edgar Weippl

21 Data Corpora for Digital Forensics Education and Research  
York Yannikos, Lukas Graner, Martin Steinebach, and Christian Winter

22 Educating the Next Generation of Cyberforensic Professionals  
Mark Pollitt and Philip Craiger
