Introduction

1 Introduction: from quantifying nouns to binominal quantifiers — 3
1.1 Aim 1: Towards a constructional network model of the development of BQs — 5
1.2 AIM 2: Towards a cognitive-functional model of the organization of BQs — 6
1.3 Aim 3: Towards a reassessment of persistence and analogy — 7

Part 1 Preliminaries

2 Framework, state of the art and methodology — 11
2.1 Description of the framework — 11
2.1.1 Definition of five interrelated key-concepts — 12
2.1.1.1 Iconicity — 13
2.1.1.2 Construal — 14
2.1.1.3 Schematicity — 15
2.1.1.4 Subjectivity — 17
2.1.1.5 Construction — 21
2.1.2 Towards a cognitive-functional model of binominal quantifiers — 24
2.1.2.1 Nouns and noun phrases — 24
2.1.2.2 Quantification and quantifiers in noun phrases — 26
2.1.2.3 A cognitive-functional model of binominal quantifiers — 27
2.2 State of the art — 33
2.2.1 Description of QNs in GDLE (Bosque 1999) and in NGLE (RAE 2009) — 34
2.2.2 Synchronic case-studies — 37
2.2.3 Diachronic case-studies — 40
2.2.4 Identification of the head of the construction — 42
2.2.5 Gradient boundaries between partitive, pseudopartitive and appositional binominals — 47
2.2.5.1 Partitive and pseudopartitive constructions — 48
2.2.5.2 Pseudopartitive and appositional constructions — 51
2.3 Methodology — 53
4.3.3.1 Head uses of *montón de* in Modern Spanish — 134
4.3.3.2 Quantifying uses of *montón de* in Modern Spanish — 138
4.3.3.3 Specifying uses of *montón de* in Modern Spanish — 140
4.3.3.4 The combinatorial pattern of *montón de* in Modern Spanish — 143
4.3.4 Present-Day Spanish: advanced grammaticalization stage — 145
4.3.4.1 Head uses of *montón de* in Present-Day Spanish — 146
4.3.4.2 Quantifying uses of *montón de* in Present-Day Spanish — 151
4.3.4.3 Specifying uses of *montón de* in Present-Day Spanish — 156
4.3.4.4 Conventionalization of the grammaticalized uses — 159
4.3.5 Intermediary conclusion — 162
4.4 Conclusions — 167

5 The role of conceptual persistence and analogy in the development of BQs — 173
5.1 Methodological background — 175
5.2 The development of binominal quantifiers — 178
5.2.1 Outline of the history of *pila de* — 180
5.2.2 Outline of the history of *aluvión de* — 184
5.2.3 Outline of the history of *letanía de* — 188
5.2.4 Outline of the history of *(h)atajo de* — 192
5.2.5 Outline of the history of *barbaridad de* — 198
5.2.6 Outline of the history of *mar de* — 202
5.2.7 Concluding remarks — 219
5.3 The role of persistence and analogy — 225
5.3.1 Persistence and analogy in the extension towards new N1s — 226
5.3.2 Persistence and analogy in the extension towards new N2s — 228
5.3.3 Concluding remarks — 240
5.4 Conclusion — 244

6 Theoretical reflection: a constructional network model of the development of BQs — 247
6.1 The challenges for the diachronic account of BQs — 249
6.1.1 The complex frequency pattern — 249
6.1.2 The formal and semantic persistence — 253
6.1.3 The exceptional role of *(un) montón de* N2 — 259
6.2 The explanatory scope of existing accounts — 264
6.3 The constructional network model revisited — 269
6.3.1 Revisiting the analogical model(s) — 271
6.3.2 The explanatory scope of the redefined analogical model — 274
6.3.3 Revisiting the macro-constructional level — 277
6.3.3.1 Binominal quantity and quality assessment as comparison construals — 277
6.3.3.2 Co-extensiveness as the motivation of the comparison construal — 281
6.3.4 The explanatory scope of the revisited macro-constructional level — 284

6.4 The grammaticalization of the BQ-construction — 291
6.4.1 BQs as the locus of grammaticalization — 291
6.4.2 GR of the binominal quantifier macro-construction — 296
6.5 Conclusion — 298

Part 3 Synchronic case-studies – towards a constructional network model

7 QN-related schematization and N2-profiling — 303
7.1 Methodological background — 305
7.2 Quantification construal in BQs — 307
7.2.1 Construal difference in the minimal pair un alud / aluvión de N2 — 312
7.2.1.1 Lexicographical accounts — 312
7.2.1.2 The conceptual image of alud and aluvión de — 313
7.2.1.3 The conceptual images broken down into conceptual facets — 316
7.2.1.4 Differences in the image schemas of alud de and aluvión de — 331
7.2.1.5 Context and combinatorial pattern of alud de and aluvión de — 333
7.2.1.6 Concluding remarks — 338
7.2.2 Construal difference in the minimal pairs una pila/un montón de N2 and un montón/mogollón de N2 — 339
7.2.2.1 Lexicographical accounts — 340
7.2.2.2 Conceptual image of (una) pila de N2 — 342
7.2.2.3 Conceptual image of (un) montón de N2 — 347
7.2.2.4 Conceptual image of (un) mogollón de N2 — 359
7.2.3 Outline of the conceptual images of the remaining QNs — 368
7.2.3.1 Conceptual image of (un) racimo de N2 — 369
7.2.3.1.1 Lexicographical accounts — 369
7.2.3.2 The conceptual image of (un) hatajo de N2 — 369
7.2.3.2.1 Lexicographical accounts — 374
7.2.3.2.2 The conceptual image of (un) hatajo de N2 — 374
7.2.3.3 Conceptual image of (una) tetania de N2 — 381
7.2.3.3.1 Lexicographical accounts — 381
7.2.3.3.2 The conceptual image of (una) tetania de N2 — 381
7.2.3.4 Conceptual image of (una) barbaridad de N2 — 387
7.2.3.4.1 Lexicographical accounts — 387
7.2.3.4.2 The conceptual image of (una) barbaridad de N2 — 388
7.2.4 The contribution of the plural morpheme — 392
7.3 Conclusion — 397

8 The motivated nature of the QN-related co-selection patterns — 400
8.1 Morphosyntactic description of the BQ in the literature — 401
8.1.1 Collective or distributive reading — 404
8.1.2 Pluralization of N1 — 406
8.1.3 Suffixation of N1 — 408
8.1.4 Determiner pattern of N1 and N2 — 408
8.1.5 Adjectival modification to N1 and N2 — 411
8.1.6 (Lexical) restriction on N2 — 412
8.1.7 Verb agreement — 413
8.1.7.1 Traditional account of the verb agreement of collective nouns — 413
8.1.7.2 Studies on verb agreement of (pseudo-)partitive constructions — 416
8.1.8 Topicalization and extraposition of the prepositional phrase — 421
8.1.9 The scope of quantification by BQs — 422
8.1.10 Conclusion — 425
8.2 Morphosyntactic variation of BQs in the corpus data — 426
8.2.1 Fluctuation in the N1-determiner pattern — 426
8.2.2 Fluctuation in the premodification pattern — 432
8.2.3 Fluctuation in the N2-pattern — 435
8.2.4 Fluctuation as to verb agreement — 443
8.2.4.1 Methodological note — 445
8.2.4.2 Explanatory scope of the existing accounts — 446
8.2.4.3 Towards the case-study — 449
8.2.4.3.1 Definiteness of N1 — 450
8.2.4.3.2 Distance between the subject and the verb — 451
8.2.4.3.3 Position of the subject with respect to the verb — 452
8.2.4.3.4 Partitive versus pseudopartitive constructions — 453
8.2.4.3.5 Verb agreement in relative clauses — 455
8.2.4.3.6 Type of verb and contextual cues — 456
8.2.4.3.7 Function of N2 — 459
8.2.4.3.8 Concluding remarks — 460
8.2.4.4 CIP as a complementary factor in verb agreement — 461
8.2.4.5 Agreement hierarchy of BQ-constructions — 463
8.3 Conclusion — 465

9 Theoretical reflection: the notion of CIP revisited — 468
9.1 The notion of CIP revisited — 468
9.1.1 CIP as a gradual phenomenon — 468
9.1.2 CIP as an unpredictable phenomenon — 475
9.1.3 CIP as two-way discourse phenomenon — 477
9.2 Theoretical implications for the notion of analogy — 482
9.2.1 The concept of analogy in a nutshell — 483
9.2.2 The notion of analogy revisited — 485
9.2.2.1 The usage-based model of analogy (De Smet 2013) — 485
9.2.2.2 Discourse level as an additional motivation for analogy — 488
9.3 Conclusion — 490

Part 4 Conclusions

10 Conclusion — 495
10.1 Concluding remarks — 495
10.2 Further research — 498

References — 503
