Contents

Forword 5

1 The Beginnings of the Application of Inorganic Binder Systems 9

2 The Development and State of the Application up to the Year 2000 11

3 Overview of Currently Available Inorganic Binder Systems 14

3.1 Alkali silicate binder (water glass binder) 14

3.2 Silica sol for investment casting 31

3.3 Cement as a binder system 32

3.4 Geopolymer binder 36

3.5 Salt binder systems 37

3.6 Gypsum as binder 39

4 Classification of Moulding Processes with Inorganic Binder Systems 42

4.1 Hardening by gasification process 43

4.1.1 Water glass CO₂ process 43

4.1.2 Water glass warm air process 61

4.1.3 Warm air drying in water glass powder systems 65

4.2 Cold self-curing processes 69

4.2.1 Cement moulding process 72

4.2.2 Water glass ester process 89

4.2.3 Geopolymer process 108

4.3 Warm or hot curing processes 114

4.3.1 Processeses with tempered mould tools 114
