

Investigations on the Shielding Function of Task Sets and its Underlying Mechanism

Inaugural-Dissertation zur Erlangung der Doktorwürde der
Philosophischen Fakultät II
(Psychologie, Pädagogik und Sportwissenschaft)
der Universität Regensburg

vorgelegt von

Renate Wolf geb. Reisenauer

aus Heltau

Regensburg 2014

CONTENTS

- Abstract..... 8
- I. Theoretical Background 9
 - Cognitive Control..... 10
 - An Introduction to Cognitive Control..... 10
 - Cognitive Control and the Prefrontal Cortex 11
 - The Representation of Task Sets..... 13
 - The Stability and Flexibility of Behavior 14
 - Task Switching 16
 - The History of Task Switching 16
 - Rediscovery of the Task Switching Paradigm..... 20
 - Typical Effects in the Task Switching Paradigm 24
 - Task switching: A summary..... 32
 - The Shielding Function of Task Sets 32
 - Task Sets vs. Stimulus-Response-Mappings..... 33
 - Definitions..... 37
 - First Findings on the Shielding Function 38
 - Relaxation of the Shielding Function 44
 - Scope of the Present Work 45
- II. The Shielding Function of Task Sets in the Presence of Task-Related Distracters 48
 - Introduction 49
 - Experiment 1 52
 - Method 52
 - Results..... 55
 - Discussion..... 56
 - Experiment 2 58

	Method	58
	Results.....	61
	Discussion.....	62
	Experiment 3	64
	Method	64
	Results.....	65
	Discussion.....	66
	Experiment 4	67
	Method	67
	Results.....	67
	Discussion.....	68
	Conclusions	68
III.	Shielding in the Context of Random Task Switching	72
	Introduction	73
	Experiment 5	77
	Method	77
	Results.....	80
	Discussion.....	83
	Experiment 6	85
	Method	86
	Results.....	88
	Discussion.....	89
	Conclusions	90
IV.	Shielding in the Context of Predictable Task Switching.....	94
	Introduction	95
	Experiment 7	97
	Method	97
	Results.....	98

	Discussion.....	101
V.	General Discussion	104
	Summary of the Current Findings	105
	Shielding and task-related distracters.....	108
	Shielding in a switching context.....	109
	The mechanism underlying the shielding function	112
	Implications of the shielding function.....	117
	Future Directions.....	119
	References	122
