Content

Gear Research Activities at WZL, RWTH Aachen University 1
Dr.-Ing. Markus Brumm

Non-Involute Gearing, ist Function and Manufacturing Compared to Established Systems 2
Prof. Dr.-Ing. Hermann J. Stadtfeld, cand. Ing. Jasmin Saewe, Gleason Corporation

Session I: Gear Design and Operating Performance

Virtualization and Cross-linking in Production 3
Prof. Dr.-Ing. Christian Brecher

Pulsating Helical Gears and Calculation of the Tooth Root Load Carrying Capacity 4
Dipl.-Ing. Markus Rüngeler

Load Distribution, Root Stress and Efficiency Analyses of Face-hobbed and Face-milled Hypoid Gears 5
Prof. Ahmet Kahraman, Dr. David Talbot, Ohio State University

Robust Bevel Gear Design via Variational Calculus 6
Dipl.-Ing. Peter Knecht

Tooth Contact Analysis of Asymmetric Planet Gear Stages 7
Dipl.-Ing. Daniel Piel
Dynamic Transmission Error Measurement in Gear Applications
Dr.-Ing. Markus Brumm

Trends in Bevel Gear Development
Dr.-Ing. Markus Brumm

Session II: Manufacturing

Gleason 4.0
Prof. Dr.-Ing. Hermann J. Stadtfeld,
Gleason Corporation

Smart Factories – Challenges and Potentials
Prof. Dr.-Ing. Fritz Klocke

Gear Finish Hobbing - Potentials of Several Cutting Materials
Dipl.-Ing. Deniz Sari

Process Analysis of Gear Honing of Transport Transmission Gears
Dipl.-Ing. Marco Kampka

Development of a Cutting Force Model for Generating Gear Grinding
Dipl.-Ing. Florian Hübner

Improvements in Manufacturing Related Surface Strength Increase and Rolling Contact Fatigue Simulation
Dipl.-Wirt.-Ing. Christoph Lopenhaus

WZL Tool Machines, Test Rigs and Software Solutions
