Table of Contents

Foreword to this Volume.................................................................9
Uche C. Amalu

I. Global climate change impacts on Sub-Saharan Africa

Climate change phenomenon: Causes, consequences, mitigation
and some adaptation strategies in Nigeria........................................13
Chukwuemeka Christopher Opara

Awareness of the causes and environmental implications of
climate change phenomena in select-countries of Sub-Saharan Africa........37
Gabriel O. Ihejirika

Rainfall variabilities in Sub-Sahara Africa: Observations
and implications in Ilorin, Southwest Nigeria......................................51
Amidu Owolabi Ayeni

Global climate change impacts on Sub-Sahara Africa:
The case of Nigeria’s shorelines..........................................................61
C. U. Oyegun

II. Measures and strategies for facing climate change in Sub-Sahara Africa

Information and communication technologies for creating
awareness of climate change phenomenon in Nigeria..............................77
Emmanuel Uzoma Onweremadu

Strategies adopted in preserving plant and animal species
endangered by climate change in Sub-Saharan Africa............................91
Cyril Ifeanyi Duruigbo

Global climate change in Sub-Saharan Africa: The situation in
Karamoja sub-region, Uganda..........................................................99
Cyprian Osinde, Bateganya Najib and Gastone Habarugaba
Table of Contents

Adaptation measures taken to preserve animal species affected by climate change in Karamoja sub-region, Uganda ........................................... 111
Cyprian Osinde and Joseph Okello Onen

Physical and economic consequences of climate change in select-countries of Sub-Sahara Africa ................................................................. 119
Etiosa Uyigue

Sustaining endangered species in a period of climatic anomaly in Sub-Saharan Africa: Examples from Nigeria ........................................... 131
Emmanuel Uzoma Onweremadu

III. Actions implemented in facing climate change

Protection of animal species endangered by climate change in Sub-Saharan Africa ......................................................................................... 151
A.O. Adeyina, O.A. Adeyina and T. R. Feyeye

Climate change and montane biodiversity management in Sub-Saharan Africa: A Study of the Cameroon highlands ecoregion .......... 165
Ndenecho Emmanuel Neba and Lambi Cornelius Mbifung

Protective measures taken for preserving species endangered by climate change in Sub-Saharan Africa: Case of Yongka Western Highlands Research Garden-Park, Nkwen-Bamenda, Nw Region, Cameroon ................................................................. 181
Bernard P. K. Yerima
