Invited Talks

Keynote Talk

What is Computation: An Epistemic Approach .............................. 1
   Jiří Wiedermann and Jan van Leeuwen

Foundations of Computer Science

Progress (and Lack Thereof) for Graph Coloring Approximation
Problems .................................................................................. 14
   Magnús M. Halldórsson

Recent Results in Scalable Multi-Party Computation ..................... 24
   Jared Saia and Mahdi Zamani

Online Bipartite Matching in Offline Time (Abstract) ..................... 45
   Piotr Sankowski

Software and Web Engineering

Quo Vadis Explicit-State Model Checking .................................. 46
   Jiří Barnat

The Dos and Don'ts of Crowdsourcing Software Development .......... 58
   Brian Fitzgerald and Klaas-Jan Stol

Data, Information and Knowledge Engineering

Adaptively Approximate Techniques in Distributed Architectures ...... 65
   Barbara Catania and Giovanna Guerrini

Back to the Future – Should SQL Surrender to SPARQL? .............. 78
   Rainer Manthey
Regular Papers

Foundations of Computer Science

Balancing Energy Consumption for the Establishment of Multi-interface Networks .................................................. 102
  Alessandro Aloisio and Alfredo Navarra

The Maximum k-Differential Coloring Problem ........................................ 115
  Michael A. Bekos, Michael Kaufmann, Stephen Kobourov, and Sankar Veeramoni

Exact Algorithms for 2-clustering with Size Constraints in the Euclidean Plane .................................................. 128
  Alberto Bertoni, Massimiliano Goldwurm, and Jianyi Lin

Local Routing in Convex Subdivisions .................................................. 140
  Prosenjit Bose, Stephane Durocher, Debdnyoti Mondal, Maxime Peabody, Matthew Skala, and Mohammad Abdul Wahid

Nondeterministic Modal Interfaces .................................................. 152
  Ferenc Bujtor, Sascha Fendrich, Gerald Lüttgen, and Walter Vogler

Group Search on the Line .................................................. 164
  Marek Chrobak, Leszek Gąsieniec, Thomas Gorry, and Russell Martin

Online Makespan Scheduling with Sublinear Advice ........................................ 177
  Jérôme Dohrau

Deterministic Rendezvous in Restricted Graphs ........................................ 189
  Ashley Farrugia, Leszek Gąsieniec, Lukasz Kuszner, and Eduardo Pacheco

Fastest, Average and Quantile Schedule ........................................ 201
  Armin Fügenschuh, Konstanty Junosza-Szaniawski, Torsten Klug, Slawomir Kwasiborski, and Thomas Schlechte

Machine Characterizations for Parameterized Complexity Classes
Beyond Para-NP .................................................. 217
  Ronald de Haan and Stefan Szeider

Maximally Permissive Controlled System Synthesis for Modal Logic .......... 230
  Allan C. van Hulst, Michel A. Reniers, and Wan J. Fokkink

Approximation Hardness of the Cross-Species Conserved Active Modules Detection Problem ........................................ 242
  Thomas Hume, Hayssam Soueidan, Macha Nikolski, and Guillaume Blin

Software and Web Engineering

A Model-Driven Approach to Generate External DSLs from Object-Oriented APIs ................................................. 423
Valerio Cosentino, Massimo Tisi, and Javier Luis Cánovas Izquierdo

Function Based Requirements Engineering and Design – Towards Efficient and Transparent Plant Engineering .................. 436
Florian Himmler

Software Developer Activity as a Source for Identifying Hidden Source Code Dependencies ........................................... 449
Martin Konopka and Mária Bieliková

Discovering Motifs in Real-World Social Networks .......................................................... 463
Lotte Romijn, Breanndán Ó Nuallaín, and Leen Torenvliet

Data, Information, and Knowledge Engineering

Exploiting Semantic Activity Labels to Facilitate Consistent Specialization of Abstract Process Activities .......................... 475
Andreas Bögl, Michael Karlinger, Christoph Schütz, Michael Schreft, and Gustav Pomberger

Efficient Similarity Search by Combining Indexing and Caching Strategies .......................................................... 486
Nieves R. Brisaboa, Ana Cerdeira-Pena, Veronica Gil-Costa, Mauricio Marin, and Oscar Pedreira

Retrieving Documents Related to Database Queries ........................................................ 498
Vladimir Soares Catão, Marcus Costa Sampaio, and Ulrich Schiel

Advantages of Dependency Parsing for Free Word Order Natural Languages ........................................................................ 511
Seyed Amin Mirlohi Falavarjani and Gholamreza Ghassem-Sani

Detecting Identical Entities in the Semantic Web Data ........................................................................ 519
Michal Holub, Ondřej Proksa, and Mária Bieliková

Conducting a Web Browsing Behaviour Study – An Educational Scenario ......................................................... 531
Martin Labaj and Mária Bieliková

A Uniform Programming Language for Implementing XML Standards ......................................................... 543
Pavel Labath and Joachim Niehren
OntoSDM: An Approach to Improve Quality on Spatial Data Mining Algorithms ........................................... 555
Carlos Roberto Valêncio, Diogo Lemos Guimarães, Geraldo F.D. Zafalon, Leandro A. Neves, and Angelo C. Colombini

Cryptography, Security, and Verification
Attribute-Based Encryption Optimized for Cloud Computing ........... 566
Máté Horváth

Trustworthy Virtualization of the ARmv7 Memory Subsystem .......... 578
Hamed Nemati, Roberto Guanciale, and Mads Dam

Maciej Skorski

Java Loops Are Mainly Polynomial ........................................ 603
Maciej Zielenkiewicz, Jacek Chrząszcz, and Aleksy Schubert

Author Index .......................................................... 615
