## Contents

1 Introduction ......................................................... 1

2 Adsorbents .......................................................... 3
   2.1 Graphite / Graphitized Carbon Black ...................... 3
   2.2 Activated Carbon ............................................... 4

3 Correlation of Single-Component Adsorption Equilibria ........... 7
   3.1 Langmuir Isotherm ............................................. 8
   3.2 Brunauer, Emmett and Teller (BET) Isotherm ................. 12
     3.2.1 Determination of BET Surface Areas ..................... 14
   3.3 Hill-de Boer Isotherm ......................................... 17
     3.3.1 Van-der-Waals Equation of Gases ....................... 18
     3.3.2 Derivation and Properties of the Hill-de Boer Isotherm 20
   3.4 Freundlich Isotherm ............................................ 23
   3.5 Sips Isotherm .................................................. 25
   3.6 Tóth Isotherm ................................................ 26
   3.7 Dubinin-Astakhov Isotherm .................................... 27
   3.8 Summary and Discussion ...................................... 31

4 Prediction and Correlation of Henry Coefficients ................. 35
   4.1 Prediction of Henry Coefficients on Graphite .............. 36
   4.2 Prediction of Henry Coefficients on Activated Carbon ...... 43
   4.3 Correlation of Henry Coefficients Involving the Critical Constant Expression 46
5 A New Model for Henry Coefficient Predictions

5.1 Henry Coefficient Predictions on Graphite

5.2 Henry Coefficient Predictions on Activated Carbon

5.2.1 Empirical Equations for Adsorption Isotherm Predictions

6 Determination of Hamaker Constants

6.1 Wetting - Contact Angle Measurement

6.2 Dielectric Method

6.3 Surface Forces Apparatus (SFA) and Atomic Force Microscope (AFM)

6.4 Summary and Discussion

7 Experimental Methods

7.1 Gravimetric Method

7.2 Volumetric Method

7.3 Chromatographic Method

8 Experimental Data Analysis

8.1 Equilibrium Data on Graphite

8.2 Equilibrium Data on Activated Carbon

8.2.1 Own Measurements

8.2.2 Data Collection and Analysis

9 Results and Discussion

9.1 Prediction Results of Adsorption Equilibria on Graphite

9.1.1 Performance of the Steele Model

9.1.2 Performance of the New Henry Coefficient Model
Contents

9.2 Prediction Results of Adsorption Equilibria on Activated Carbon

9.2.1 Performance of the New Henry Coefficient Model

9.2.2 Performance of the Empirical Equations for Adsorption Isotherm Predictions

10 Summary

11 Nomenclature

12 References

13 Appendix

13.1 Equilibrium Data on Graphite

13.2 Equilibrium Data on Activated Carbon
