1 Introduction

2 The assessment approach

2.1 Qualitative information procurement for the socio-economic model

2.2 Quantitative Methods as decision aids

2.2.1 Multi-Criteria Decision Analysis (MCDA)

2.2.2 Selection of the appropriate aggregation method

3 Socio-economic model – design

3.1 Technical Dimension

3.1.1 Publication/ Patent activity

3.1.2 Research & Development activities for realization

3.1.3 Life Cycle

3.1.4 Security Relevance

3.1.5 Application Potential

3.1.6 Misuse of Technology

3.1.7 Current Utilization

3.2 Economical Dimension

3.2.1 Market Potential

3.2.2 Time Frame and Maturity

3.2.3 Substitution Effects

3.2.4 Indirect Costs of Development

3.2.5 Direct Costs of Development

3.2.6 Public Funding of Development

3.2.7 Private Funding of Development

3.2.8 Qualified and Trained People

3.3 Societal Dimension

3.3.1 Privacy Issues

3.3.2 Physical or Mental Harms – Misuse

3.3.3 Acceptance - Perceived Ease of Use

3.3.4 Acceptance – Perceived Usefulness

3.3.5 Aspects Concerning Health Issues
3.4 Ecological Dimension
  3.4.1 Recycling & Waste Disposal
  3.4.2 Resource Efforts and Consumption of Critical Resources

3.5 Legal & Political Dimension
  3.5.1 Subvention
  3.5.2 Regulation
  3.5.3 Standardization for European Market Potential

3.6 Scenario Dimension - Drivers and Barriers
  3.6.1 The Scenarios and their characteristics for the different dimensions
  3.6.2 Short Description of the emerging security technologies
  3.6.3 Homomorphic Encryption - Drivers and Barriers
  3.6.4 Cognitive Radio - Drivers and Barriers
  3.6.5 Small-Scale Energy Harvesting - Drivers and Barriers
  3.6.6 Indoor Navigation - Drivers and Barriers
  3.6.7 Smart Textiles - Drivers and Barriers
  3.6.8 Sensor Technologies - Drivers and Barriers

4 Results and Conclusions
  4.1 Results of the qualitative assessment
    4.1.1 Ranking of the emerging security technologies
    4.1.2 Sensitivity Analysis
  4.2 Results of the quantitative assessment
    4.2.1 Ranking of the emerging technologies
    4.2.2 Sensitivity Analysis
  4.3 Results of the quantitative assessment under the additional consideration of general drivers and barriers
    4.3.1 Ranking of the emerging security technologies
    4.3.2 Sensitivity Analysis
  4.4 Comparison of the qualitative and quantitative results
    4.4.1 Global results of the socio-economic model combining the qualitative and quantitative assessment
    4.4.2 Scenario Influence Analysis concerning the emerging security technologies
  4.5 Conclusion

5 Literature
## 6.1 Online Survey

## 6.2 Assessed Dimensions for the emerging security technologies
