1 Introduction 1
1.1 Motivation – Customer Competences as Potential Driver for Innovation Capability 1
1.2 Research Gap – Missing Explanations about Effects of Customer Competences on Innovation Capability 7
1.3 Objectives – Descriptive, Analytic, Pragmatic 19
1.4 Research Design – Theoretically Grounded as well as Empirically Assessed 24
1.5 Course of Research – Aligned to the Measure-Theoretic Development Process for an Operationalization 29

2 Links Between Customer Competences and Innovation Capability – A Dynamic Capabilities-based Integration 33
2.1 Objectives and Structure of Section 2 33
2.2 Innovation as a Driver of Development and Performance in the Video Games Industry 37
2.3 Innovation Capability as a Dynamic Capability of a Company 62
2.4 Customer Competences in the Dynamic Capabilities Framework 97

3 Hypothesized Effects of Customer Competences on Innovation Capability – A Causal Model 115
3.1 Objectives and Structure of Section 3 115
3.2 Specification of Innovation Capability and Customer Competences 118
3.3 Measurement Models for Innovation Capability and Customer Competences 142
3.4 Hypothesized Interrelations between Customer Competences and Innovation Capability ............................................. 160

4 Interrelations between Customer Competences and Innovation Capability
   – An Empirical Investigation ............................................. 177
   4.1 Objectives and Structure of Section 4 ............................. 177
   4.2 Methodological Design of the Empirical Investigation ........ 180
   4.3 Practical Execution of the Empirical Investigation ............ 202
   4.4 Result Assessment of the Empirical Investigation ............. 245

5 Conclusions ................................................................. 265
   5.1 Main Findings ......................................................... 265
   5.2 Implications for Theory and Practice ............................ 270
   5.3 Critical Reflection and Additional Research Demand ........ 273

A Content Analysis on Existing Video Game Definitions ............... 285

B Financial Information on Selected Companies of the Video Games Industry ......................................................... 293

C Literature Research on Innovation Definitions .................... 297

D Literature Research on the Antecedents of Innovation Capability ................................................................. 299

E Literature Research on Customer Competences Definitions .......... 303

F Literature Research on the Interrelations between Innovation Capability and Customer Competences ....................... 307

G Results of the Indicator Pre-Test ..................................... 309

H Statistics Results of the Empirical Data ............................. 311

I Questionnaire of the Empirical Investigation ........................ 329

Bibliography ................................................................. 351

## 3 Hypothesized Effects of Customer Competences on Innovation Capability - A Causal Model

### 3.1 Objectives and Structure of Section 3

### 3.2 Specification of Innovation Capability and Customer Competences

#### 3.2.1 Dynamic Capabilities-based Conceptualization of Innovation Capability

- **3.2.1.1** Innovation Capability Dimensions Deduced from Coordination / Integration Processes
- **3.2.1.2** Innovation Capability Dimensions Deduced from Learning Processes
- **3.2.1.3** Innovation Capability as a Multidimensional Higher-Order Dynamic Capability

#### 3.2.2 Knowledge-based Conceptualization of Customer Competences

- **3.2.2.1** Competences Deduced from Knowing-That
- **3.2.2.2** Competences Deduced from Knowing-How
- **3.2.2.3** Competences Deduced from Knowing-What
- **3.2.2.4** Particular Customer Competences Derived from Specific Knowledge Facets

### 3.3 Measurement Models for Innovation Capability and Customer Competences

- **3.3.1** Correspondence Rules Elaboration for Systematically Guiding the Indicator Development
- **3.3.2** Measurement Model Development for Assessing the Innovation Capability Dimensions
- **3.3.2.1** Indicator Development for the Innovation Capability Dimensions
- **3.3.2.2** Integration of the Developed Indicators for Measuring the Innovation Capability Dimensions

### 3.4 Hypothesized Interrelations between Customer Competences and Innovation Capability
3.4.1 Elaboration of Hypothetical Effects between Innovation Capability and Customer Competences ........................................... 160
3.4.2 Model-based Integration of the Hypothesized Interrelations between Innovation Capability and Customer Competences ................... 167
  3.4.2.1 Selecting a Method for Representing the Formulated Interrelations ................................................................. 167
  3.4.2.2 Introducing Modeling Approaches for Assessing Interrelations between Latent Constructs ............................. 170
  3.4.2.3 Integrating the Formulated Interrelations Into one Causal Model ................................................................. 172

4 Interrelations between Customer Competences and Innovation Capability
   - An Empirical Investigation ............................................... 177
  4.1 Objectives and Structure of Section 4 ............................................. 177
  4.2 Methodological Design of the Empirical Investigation .............. 180
    4.2.1 Identifying a Method for Creating a Suitable Data Sample .......... 180
      4.2.1.1 Introducing Sampling Methods for Creating Data Samples ........................................................................... 180
      4.2.1.2 Selecting a Suitable Method to Create a Data Sample .............................................................................. 182
    4.2.2 Identifying a Suitable Data Collection Method for Gathering Required Empirical Data ........................................ 183
      4.2.2.1 Introducing Potential Methods to Collect Empirical Data .............................................................................. 187
      4.2.2.2 Presenting Evaluation Criteria to Select a Suitable Data Collection Method ............................................. 188
      4.2.2.3 Testing the Criteria to Select the Most Suitable Data Collection Method .................................................. 191
    4.2.3 Presenting Methods to Analyze Structural Equation Models ..... 195
      4.2.3.1 Introducing Evaluation Criteria for Selecting a Suitable Analysis Method ............................................... 195
      4.2.3.2 Criteria-based Evaluation and Selection of a Suitable Analysis Method .................................................. 197
    4.2.4 Introducing the Idea of Variance-based Analysis Methods .... 200
  4.3 Practical Execution of the Empirical Investigation ..................... 202
    4.3.1 Creation of the Relevant Empirical Data Base ......................... 202
      4.3.1.1 Definition of the Total Population ................................................................................................................. 202
      4.3.1.2 Definition of the Applied Sample ............................................................................................................... 204
    4.3.2 Creation of the Questionnaire as an Electronic Interview .......... 206
      4.3.2.1 Formulation of Questions and Answers ...................................................................................................... 206
      4.3.2.2 Scaling of Answers ...................................................................................................................................... 207
4.3.2.3 Structure of the Questionnaire ............................................. 211
4.3.3 Conducting Pre-Tests for Ensuring the Quality of the Data
Collection Methods ................................................................. 214
4.3.3.1 Applying a Pre-Test for Validating the Quality of the
Indicators ............................................................................... 214
4.3.3.2 Applying a Pre-Test for Assessing the Quality of the
Questionnaire ........................................................................... 217
4.3.4 Conducting the Main Empirical Data Collection .................. 218
4.3.4.1 Execution of Main Empirical Data Collection ................. 218
4.3.4.2 Quality Assurance During the Survey ......................... 219
4.3.4.3 Return Rate of the Applied Sample ............................. 219
4.3.4.4 Evaluation of the Representativeness of the Sample .... 222
4.3.4.5 Testing the Obtained Data for Normal Distribution ... 223
4.3.5 Preparation of the Data Set for the Evaluation ................. 224
4.3.5.1 Content-related and Logical Analysis of the Data Set .... 224
4.3.5.2 Handling Missing Values in the Data Set ................... 224
4.3.5.3 Socio-Demographic Information on the Data Set ....... 226
4.3.6 Formal Quality Evaluation of the Applied Models .......... 228
4.3.6.1 Evaluating the Quality of the Applied Formative
Measurement Models ............................................................... 230
4.3.6.2 Evaluating the Quality of the Applied Reflective
Measurement Models ............................................................. 235
4.3.6.3 Evaluating the Quality of the Structural Equation
Model .................................................................................... 240
4.3.6.4 Evaluating the Quality of the Total Model ................. 243
4.4 Result Assessment of the Empirical Investigation ............... 245
4.4.1 Analyzing the Hypothesized Effects between Customer
Competences and Innovation Capability .................................. 245
4.4.2 Theoretical Implications Deduced from the Empirical Findings 248
4.4.3 Practical Implications Deduced from the Empirical Findings 250
4.4.3.1 Design Options for the Innovation Capability
Dimensions ........................................................................... 251
4.4.3.2 Analyzing Specific Effects of Particular Customer
Competences ........................................................................... 255

5 Conclusions ........................................................................... 265
5.1 Main Findings ..................................................................... 265
5.2 Implications for Theory and Practice ............................... 270
5.3 Critical Reflection and Additional Research Demand ......... 273
