XII Preface
Muenke, M.; Kruszka, P.S. (Bethesda, Md.); Sable, C.A. (Washington, D.C.); Belmont, J.W. (Houston, Tex.)

XIII Foreword
Noonan, J.A. (Lexington, Ky.)

1 Overview

2 Congenital Cardiovascular Anomalies: A Historical Overview
Moller, J.H. (Minneapolis, Minn.)

1 Abstract
2 Early Descriptions of Anomalies
3 Correlating Anatomic and Clinical Features
4 Diagnostic Procedures
5 Extracardiac Operations
6 Intracardiac Operations
7 Interventional Catheterization Procedures
8 Other Advances
9 References

11 Normal Development of the Heart
Sylva, M.; Moorman, A.F.M. (Amsterdam)

11 Abstract
11 Formations of the Linear Heart Tube
12 Origination of the Cardiac Mesoderm
12 Folding of the Embryo and Formation of the Heart Tube
12 Growth of the Linear Heart Tube
15 From One Tube to Four Chambers
15 The Ballooning Model of Chamber Formation
15 Formation of the Atrial Chambers
17 Formation of the Ventricular Chambers
18 Building the ECG
18 The Earliest ECG Recordings
18 Sinus Node
18 Atrioventricular Node
18 Peripheral Venticular Conduction System
19 Septation
19 Atrial Septation
19 Ventricular Septation
19 Septation of the Atrioventricular Canal and Primary Foramen
21 Separation of the Outflow Tract
21 The Cardiac Connective Tissues
21 Development of the Cardiac Vasculature
21 The Insulating Plane
22 Development of the Valves
22 Unidirectional Flow in the Primitive Heart
22 The Atrioventricular Valves
22 The Semilunar Valves
22 Remodeling of the Embryonic Valves
22 Future Perspective
24 References

28 Epidemiology

28 Epidemiology and Prevention of Congenital Heart Defects
Botto, L.D. (Salt Lake City, Utah)

28 Abstract
29 Understanding the Problem
29 Common, Costly, and Critical: Epidemiology as an Incentive for Action
29 How Common Are Congenital Heart Defects?
30 What Drives the Variations in Reported Birth Prevalence?
32 How Many People Are Living with Congenital Heart Defects – Including Adults?
32 How Costly Are Congenital Heart Defects?
33 Short-Term Assessment: Cross-Sectional Costs
3 Chromosomal Disorders

82 Down Syndrome
Kruszka, P.S. (Bethesda, Md.)

82 Abstract
82 Epidemiology
83 Genetics
84 Embryogenesis
85 Clinical Presentation
85 Cardiac Phenotype
87 Treatment
88 Prognosis
88 Gene Therapy for Future Directions
88 References

91 Congenital Cardiovascular Defects in
Monosomy X or Turner Syndrome
Bondy, C. (Bethesda, Md.)

91 Abstract
92 Spectrum of Congenital Cardiovascular Malformations
in Turner Syndrome
92 Aortic Valve
93 Aortic Dilation
93 Aortic Arch
94 Partial Anomalous Pulmonary Venous Return
94 Other Cardiovascular Defects
94 Theories of the Cause of Congenital Cardiovascular
Defects in Turner Syndrome
94 Association with Fetal Lymphedema
95 Neural Crest
95 Parallels with the 22q11.2 Deletion (DiGeorge
Syndrome)
96 Genes Implicated in Turner Syndrome
97 X-Chromosome Genomic Imprinting
97 Conclusion
97 References

100 The 22q11.2 Deletion Syndrome
Goldmuntz, E. (Philadelphia, Pa.)

100 Abstract
101 Molecular Characteristics of the 22q11.2 Deletion
Syndrome
101 Clinical Characteristics of the 22q11.2 Deletion
Syndrome
101 Congenital Heart Disease in the 22q11.2 Deletion
Syndrome
4 Single Gene Disorders

122 Noonan Syndrome and Other RAS/MAPK Pathway Syndromes
  Gelb, B.D. (New York, N.Y.); Roberts, A.E.
  (Boston, Mass.); Tartaglia, M. (Rome)

122 Abstract
123 RASopathy-Associated Cardiovascular Involvement
123 The Noonan Syndrome
125 The Noonan Syndrome with Multiple Lentigines
125 The Cardiofaciocutaneous Syndrome
125 The Costello Syndrome
126 The Noonan Syndrome with Loose Anagen Hair
126 RASopathy Genetics
127 Genotype-Phenotype Associations
127 Pathogenesis of Cardiovascular Disease in the
RASopathies
127 The Noonan Syndrome
128 The Noonan Syndrome with Multiple Lentigines
128 The Costello Syndrome
128 Concluding Remarks
128 Acknowledgments
128 References

131 The Holt-Oram Syndrome and Other
Transcription Factor-Related Heart
Diseases
  Borlak, J. (Hannover); Cilibbi, Y. (Mattarello)

131 Abstract
131 The Holt-Oram Syndrome
132 Transcription Factors and Embryogenesis
134 Germline Mutations
136 Somatic Mutations
138 Gene Reporter Assays to Evaluate the Clinical
Significance of Mutations
139 'Isogenic Nature'
140 'Chromatin Environment'
140 'Reporter Constructs'
141 'Rheostatable Promoters'
141 'Mutant Protein Assays'
142 Conclusion
142 References

145 CHARGE Syndrome
  Corsten-Janssen, N.; van Ravenswaaij-Arts, C.M.A.
  (Groningen)

145 Abstract
146 Diagnosis
146 Clinical Diagnosis
147 Molecular Diagnosis
148 Other Causes of the CHARGE Syndrome
149 Broad Phenotypic Spectrum of CHD7 Mutations
149 Clinical Features of Patients with a CHD7 Mutation
149 CHD7 Mutations in Other Syndromes
149 Genotype-Phenotype Associations
150 Heart Defects in the CHARGE Syndrome
151 CHD7 Function in the Heart
152 Clinical Surveillance and Genetic Counseling
152 Concluding Remarks
153 References

155 Alagille Syndrome
  Lin, H.C.; Falsey, A.; Krantz, I.; Spinner, N.
  (Philadelphia, Pa.)

155 Abstract
156 Pathophysiology
156 Clinical Features
157 Hepatic Manifestations
158 Cardiac Manifestations
159 Musculoskeletal Manifestations
159 Ocular Manifestations
160 Facial Features
160 Renal Manifestations
161 Vascular Manifestations
161 Cognitive Function
161 Diagnosis
162 Management
163 Genetic Counseling
163 Conclusion
163 References
Heterotaxy

Abstract
Classification of Heterotaxy: Atrial Isomerisms and Other Laterality Defects
Association of Complex Congenital Heart Disease with Heterotaxy
Left-Right Patterning and Regulation of Cardiac Looping
Genetic Etiology of Heterotaxy
Ciliopathies and Heterotaxy
Airway Cilium Dysfunction Associated with Primary Ciliary Dyskinesia and Heterotaxy
Respiratory Symptoms and Disease in Ciliopathy and Heterotaxy Patients
Respiratory Complications and Worse Outcome in Heterotaxy Patients
Summary and Future Prospects for Improving Clinical Care and Outcome
Acknowledgments
References

Molecular Genetics of Isolated Cardiovascular Malformations
Lee, T.M.; Chung, W.K. (New York, N.Y.)

Abstract
Monogenic Cardiovascular Malformations
Atrial Septal Defects
Ventricular Septal Defects
Bicuspid Aortic Valves
Supravalvar Aortic Stenoses
Additional Lesions
Recent Advances
Copy Number Variants
De novo Variants
Genome-Wide Association Studies
Clinical Genetic Evaluation and Testing
Conclusion

Other Single-Gene Disorders Causing Congenital Heart Disease

Abstract
VACTERL Association
Diagnosis/Evaluation
The Kabuki Syndrome
Diagnosis/Evaluation
The Ellis-van Creveld Syndrome
Diagnosis/Evaluation
The Cornelia de Lange Syndrome
Diagnosis/Evaluation
The Mowat-Wilson Syndrome
Diagnosis/Evaluation
The Smith-Lemli-Opitz Syndrome
Diagnosis/Evaluation
Treatment

5 Arrhythmias, Cardiomyopathies, and Connective Tissue Disorders

Genetic Arrhythmias (Channelopathies)
Mazzanti, A.; Ng, K. (Pavia); Priori, S.G. (Pavia/New York, N.Y.)

Abstract
Long QT Syndrome
Epidemiology
Genetic Variants
Diagnosis
Clinical Manifestations
Risk Stratification
Management
Short QT Syndrome
Epidemiology
Genetic Variants
Diagnosis
Clinical Manifestations
Risk Stratifications and Management
Brugada Syndrome
Epidemiology
Genetic Variants
Diagnosis
Clinical Manifestations
Risk Stratification
Management
Catecholaminergic Polymorphic Ventricular Tachycardia
Epidemiology
Genetic Variants
Diagnosis
Clinical Manifestations
Risk Stratifications
Management
Conclusions

Contents
VIII
6 Evaluation

238 The Genetic Workup for Congenital Structural Heart Disease: From Clinical to Genetic Evaluation
Kruszka, P.S. (Bethesda, Md.); Sable, C.A. (Washington, D.C.); Belmont, J.W. (Houston, Tex.); Muenke, M. (Bethesda, Md.)

238 Abstract
240 Genetic Testing Algorithm
248 Aneuploidy
248 Copy Number and Structural Variants
250 Targeted Gene Sequencing
252 Whole Genome and Whole Exome Sequencing
254 Genetic Counseling
254 Concluding Remarks
254 References

257 Imaging of Congenital Heart Defects for the Noncardiologist
Sable, C.A. (Washington, D.C.)

257 Abstract
257 Types of Imaging
257 Ultrasound Physics
259 Echocardiography Examination
260 . Indications
260 Timing of Imaging
260 Where/Who Does the Echocardiography
261 Common Lesions
261 Atrial Septal Defects

262 Ventricular Septal Defects
264 Atrioventricular Septal Defects
265 Tetralogy of Fallot
266 Pulmonary Valve Stenosis
267 Concluding Remarks
268 References

269 Prenatal Evaluation of Congenital Heart Defects and Fetal Intervention
Weinberg, J.G.; Krishnan, A. (Washington, D.C.)

269 Abstract
269 Indications for Fetal Cardiac Evaluation
270 Timing and Performance of Fetal Echocardiography
271 Prenatal Diagnosis of Congenital Heart Defects Associated with Specific Genetic Defects
271 Fetal Intervention
275 Importance of Fetal Diagnosis and Outcomes following Prenatal Detection of Congenital Heart Defects
276 References

7 Treatment

280 Surgical Management

280 Abstract
280 Trisomy 21 – Down Syndrome
283 The 22q11.2 Deletion – DiGeorge Syndrome
284 Trisomy 13 (Patau Syndrome) and Trisomy 18 (Edwards Syndrome)
285 Marfan Syndrome
285 Turner Syndrome
285 Noonan Syndrome
286 Other Syndromes
286 Special Considerations
287 References

289 Interventional Cardiology
Morgan, G.J.; Qureshi, S.A. (London)

289 Abstract
289 Interventional Cardiac Catheterisation in Paediatric Cardiology
289 Neonatal Intervention
290 Atrial Septostomy
290 Aortic Valvoplasty
291 Pulmonary Valvoplasty
292 Infant and Paediatric Procedures
292 Atrial Septal Defect Occlusion
293 Ventricular Septal Defect Occlusion
294 Transcatheter Pulmonary Valve Implantation
294 Coarctation Stent Implantation
295 Stent Technology
295 Fetal Interventions
295 Hybrid Techniques
296 Hybrid Palliation of Hypoplastic Left Heart Disease
296 Muscular Ventricular Septal Defect Closure
297 Paravalvar Leak Occlusion

Contents IX
297 Conclusion
297 References

298 Ethical Considerations in Congenital Heart Disease
Boss, R.D.; Shapiro, M.C. (Baltimore, Md.)

298 Abstract
299 Social Justice and Congenital Heart Disease Risk
299 Prenatal Diagnosis: Promises and Harms
300 A Life Worth Living – Can We Agree?
301 Survivors of Congenital Heart Disease and Demand for Destination Therapies
302 Palliative Care – Clinicians’ Personal Choices versus Professional Recommendations
303 Conclusions
303 References

306 The Future of Therapeutics: Stem Cells, Tissue Plasticity, and Tissue Engineering
Tao, G.; Martin, J.F. (Houston, Tex.)

306 Abstract
306 Cardiac Tissue Engineering
307 Supportive Matrix in Favor of Tissue Formation
307 Tissue-Forming Cell Population
308 Mechanical Load and Electrical Stimulation
308 Bioreactors – A Breeding Ground for Engineered Heart Tissue
309 Current Challenges for Engineered Heart Tissue Production
309 Cardiomyocyte Maturation
310 Host Immune Response
310 Ischemia within Engineered Heart Tissue
310 Decellularized Heart as an Artificial Scaffold for Engineered Heart Tissue
311 Stem Cells in Engineered Heart Tissue
312 Reentry of Mature Cardiomyocytes into the Cell Cycle
313 Novel Possibilities for Treating Hypertrophic Cardiomyopathy
313 Gene Therapy as Early Intervening Strategies
314 Perspectives
314 References
