Preface 1

I. Causal Inference Using Individual-Level Data: Economics of Education 5

1 INTRODUCTION 6

2 SAARLAND UNIVERSITY PANEL 8
   2.1 Integrated Employment Biographies (IEB) 8
   2.2 University Student Records 9
   2.3 Merging Process 12
   2.4 Sample Selection 14
   2.5 Discussion of Potential Selection Problems 14

3 ANALYZING STARTING SALARIES 18
   3.1 Basic Setup 18
      3.1.1 A Basic Mincerian Wage Equation 18
      3.1.2 Variable Description 19
      3.1.3 First Estimation Results 22
   3.2 Analysis I: Returns to Different Types of Student Employment 25
      3.2.1 Literature Overview 25
      3.2.2 Estimation Strategy 27
      3.2.3 OLS Estimation Results and Discussion 29
      3.2.4 Addressing the Endogeneity Problem 32
   3.3 Analysis II: Gender Pay Gap 35
      3.3.1 Literature Overview 35
      3.3.2 First Descriptive Analysis 37
      3.3.3 Regression Results 42
      3.3.4 Blinder-Oaxaca Decomposition 42
      3.3.5 Gender Pay Gap Over Time 44
II. Causal Inference Using Aggregate-Level Data: Synthetic Control Methods

1 INTRODUCTION

2 SYNTHETIC CONTROL METHODS
   2.1 Concept and Implementation
   2.2 Inference Using Synthetic Control Methods
   2.3 A Review on Recent Literature Applying Synthetic Control Methods

3 PITFALLS AND CAVEATS USING SYNTHETIC CONTROL METHODS
   3.1 Introduction
   3.2 Pitfalls and Caveats in the Two-Stage Optimization Problem
      3.2.1 Inner Optimization — Matching on Economic Predictors
      3.2.2 Outer Optimization — Reproducing the Outcome Variable Prior to the Intervention
   3.3 Algorithms for Synthesizing Correctly
      3.3.1 Auxiliary Results
      3.3.2 Inner Optimization — Matching on Economic Predictors
      3.3.3 Outer Optimization — Reproducing the Outcome Variable Prior to the Intervention
   3.4 Empirical Application to Abadie et al. (2010)
      3.4.1 The Problem of Solving the Inner Optimization Problem Approximately
      3.4.2 Ambiguous Synthetic Control Units
      3.4.3 The Importance of Starting Values
      3.4.4 A Discussion of Follow-Up Observations in Practice Using Rhode Island as an Example
   3.5 Discussion

APPENDIX II.A

4 APPLICATION OF SYNTHETIC CONTROL METHODS: THE IMPACT OF GRAPHIC WARNING LABELS ON SMOKING PREVALENCE IN CANADA
   4.1 Introduction
   4.2 A Discussion of Huang et al. (2013)
      4.2.1 Replication of Results
      4.2.2 Analyzing the Difference-in-Differences Approach
   4.3 Data
