Contents

Special Issue: Robot Control Architectures
Guest Editors: Karsten Berns, Rüdiger Dillmann, Erik Maehle

Editorial
Karsten Berns, Rüdiger Dillmann, Erik Maehle
Robot control architectures — 73

Special Issue
Max Reichardt, Tobias Föhst, Karsten Berns
An overview on framework design for autonomous robots — 75

Christian Schlegel, Alex Lotz, Matthias Lutz, Dennis Stampfer, Juan F. Inglés-Romero, Cristina Vicente-Chicote
Model-driven software systems engineering in robotics: Covering the complete life-cycle of a robot — 85

Nikolaus Vahrenkamp, Mirko Wächter, Manfred Kröhnert, Kai Welke, Tamim Asfour
The robot software framework ArmarX — 99

Elizaveta Shpieva, Iman Awaad
Integrating task planning, execution and monitoring for a domestic service robot — 112

Jan Frost, Walter Stechele, Erik Maehle
Self-reconfigurable control architecture for complex mobile robots — 122

Self-Portrayals of GI Junior Fellows
Rainer Gemulla
Data analysis at scale — 130

Dominik Herrmann
Online privacy: Attacks and defenses — 133

Distinguished Dissertations
Markus Steinberger
An overview of dynamic resource scheduling on graphics processors — 138

Acknowledgment
Paul Molitor
Reviewers 2013–2014 — 144
