HEIs as Regional Providers of Highly Skilled Workers.....32

Fighting or spurring the ‘brain drain’ in rural regions through decentralized Higher Education Institutions (HEIs)?
Verena Peer

Introduction ..............................................................33
1. Theoretical Framework – the action-theoretical model ..........35
2. Case study regions and group of investigation ...................35
3. Determinations influencing the decision of young highly qualified persons to stay or to move .........................40
   3.1. The influence of personal-emotional factors on the migration behavior of highly qualified graduates ..............40
   3.2. The perception of regional push and pull factors ..........41
   3.3. Available information as an influencing factor ..............42
   3.4. How does the migration pattern of the graduates look? 42
   3.5. What location qualities are young highly qualified graduates searching for? ........................................44
   3.6. Return migration of highly qualified graduates ..........47
4. Discussion ....................................................................47
5. Conclusion ....................................................................49
# Table of Contents

### Brain Drain or Brain Gain? Graduate Migration in Old Industrial Regions – Analysis of the Central Lower Rhine Area, Germany

*Rüdiger Hamm, Angelika Jäger, Johannes Kopper, Fabian Kreutzer*

- Abstract .................................................................................................................. 54
- Introduction ............................................................................................................ 55
- Methodology .......................................................................................................... 57
- 1. Results ............................................................................................................... 58
  - 1.1 Migration Patterns ....................................................................................... 58
  - 1.2 Variables influencing the Migration Decision of Graduates ..................... 61
  - 1.3 Migration Motives ....................................................................................... 63
- 2. Conclusion .......................................................................................................... 65

### Local labour markets, universities and skill mobility in the knowledge economy: the Italian case

*Ugo Fratesi*

- 1. Human capital, labour mobility and regional development .... 70
- 2. Trajectories for prospective university students: the Italian Case ............ 74
- 3. Labour market dynamism and university location decision .... 80
- 4. Concluding remarks ..................................................................................... 84

### Seeking talent far and near – the regional dimension of campus recruitment

*Nicolas Winterhager*

- 1. Introduction ..................................................................................................... 89
- 2. Methodology ................................................................................................... 91
- 3. Results ............................................................................................................. 97
- 4. Conclusion ..................................................................................................... 104
HEIs and Regional Cooperation ........................................... 18

The spatial perspective of joint research at German universities
*Mirja Meyborg, Axel Schaffer*

1. Introduction ........................................................................ 109
2. Related literature and main hypotheses .......................... 110
3. Method and data ................................................................. 112
   3.1. Measurement of scientific collaborations ......................... 112
   3.2. Sample ........................................................................ 113
   3.3. Weighted contributions of collaborators ........................ 113
   3.4. Categorization of collaborators ................................... 114
4. Main findings ....................................................................... 116
   4.1. Increasing importance of collaborations for knowledge... ................................................................. 116
   4.2. The role of spatial proximity for local, regional and
        interregional partnerships ............................................ 119
5. Conclusions ......................................................................... 121

Intra- and interregional cooperative linkages of Universities and
Universities of Applied Sciences in a German Resarch Network
*Falk Strotebeck*

Introduction ........................................................................... 128
1. Higher Education Institutions in Regional Innovation Networks
   ..................................................................................... 130
2. About the data .................................................................... 132
3. The regional level ................................................................. 133
4. Conclusions and further research ....................................... 139
## Regional Interaction and Regional Research Funding – A Data Envelopment Analysis for Germany

*Matthias Klumpp*

<table>

**Design and Regional contributions of HEIs** .................................. 180

RegTrans by Design: A Closer Look into the Socio-Spatial Dimension of Higher Education Institutions through Strategic Spatial Planning  
*Ozan Hovardaoğlu, Seda Çalışır Hovardaoğlu*

Introduction ................................................................................................. 181

1. Campus as a public space: A theoretical framework .............. 182
2. Assessment of socio-spatial capabilities of the campus area: Results and findings of analyses ................................................. 185
3. Strategic Master Plan of Dzemal Bijedic University of Mostar: Predictions and expectations as a conclusion ................. 191
