

DNA- and Protein-based Analytical Methods for Identification and Differentiation of Indonesian Fish and Seafood

Dissertation

in fulfilment of the requirements for the degree "Dr. rer. nat."

of the Faculty of Mathematics and Natural Sciences

at Kiel University

Submitted by

Asadatun Abdullah

Kiel, 2015

TABLE OF CONTENTS

Summary	i
Zusammenfassung	iii
GENERAL INTRODUCTION	1
Fish and seafood products in the global market	1
Circumstances of Indonesian fisheries	2
Fish and seafood products labelling	4
Analytical methods of fish species authentication and determination	7
Protein analysis	8
Isoelectric focusing (IEF) method	9
DNA analysis	11
Mitochondrial DNA (mt-DNA) and nuclear DNA for fish species identification	11
Polymerase Chain Reaction (PCR) analysis for fish species identification	12
PCR-Sequencing	13
PCR-Restriction fragment length polymorphism (RFLP)	13
PCR-single-stranded conformation polymorphism (SSCP)	14
Aims and Objectives of Dissertation	15
DISSERTATION STRUCTURE	23
CHAPTER 1	27
Authentication of Raw and Processed Tuna from Indonesian Markets using DNA Barcoding, Nuclear Gene and Character-based Approach	
CHAPTER 2	49
Differentiation of Tuna (Family: Scombridae) Products by PCR-Based Analysis of the Cytochrome b Gene and Parvalbumin Introns	
CHAPTER 3	73
Authentication of Closely Related Fish Species by PCR-Based Analysis and Isoelectric Focusing of Parvalbumin	
CHAPTER 4	101
DNA barcoding for the species identification of commercially important fishery products in Indonesian markets	
CHAPTER 5	129
Identification of commercially important fish species from the Indonesian market using cytochrome b (cyt b) and 16S ribosomal RNA (16S rRNA) genes	
GENERAL DISCUSSION	163
Comparison of mitochondrial DNA (mt-DNA) with nuclear DNA (nDNA)	163
Isoelectric focusing (IEF) of water-soluble muscle proteins	165
Evaluation of DNA- and protein-based analysis methods	166
Application and possibility of the adoption of DNA- and protein-based analysis methods in Indonesian seafood control laboratories	173

Limitation of Dissertation	174
Implications and Future Study	174
CONCLUSION	178
APPENDICES	179
Appendix I.A. Additional Results	179
Appendix I.B. Additional Results	195
Appendix II. Summary of PCR-sequencing results	198
Appendix III. Compilation of Dissertation Analytical Methods	230
LIST OF PUBLICATIONS	241
CONTRIBUTION OF AUTHORS	243
ACKNOWLEDGEMENT	244
