

## Table of contents

<b>1 General Introduction.....</b>	<b>1</b>
1.1 Lemon balm ( <i>Melissa officinalis</i> L.).....	1
1.2 Quality criteria and uses.....	3
1.3 Drying in praxis .....	4
1.4 Drying methods.....	6
1.5 Equilibrium moisture content .....	7
1.6 Problem statement and objectives.....	8
1.7 Organization of the thesis .....	9
References .....	10
 <b>2 Moisture sorption isotherms and isosteric heat of sorption of leaves and stems of lemon balm (<i>Melissa officinalis</i> L.) established by dynamic vapor sorption .....</b>	<b>15</b>
2.1 Abstract .....	15
2.2 Introduction.....	15
2.3 Materials and methods .....	17
2.3.1 Material .....	17
2.3.2 DVS apparatus.....	18
2.3.3 Experimental procedure .....	18
2.3.4 Mathematical description of sorption isotherms .....	19
2.3.5 Determination of the isosteric heat of sorption .....	20
2.3.6 Statistical analysis .....	20
2.4 Results and discussion .....	21
2.4.1 Moisture sorption profiles .....	21
2.4.2 Adsorption isotherms .....	22
2.4.3 Fitting of sorption models to experimental data.....	25
2.4.4 Isosteric heat of sorption .....	27
2.5 Conclusions.....	28
Acknowledgements .....	29
References .....	29
 <b>3 Changes of essential oil content and composition during convective drying of lemon balm (<i>Melissa officinalis</i> L.) .....</b>	<b>35</b>
3.1 Abstract.....	35
3.2 Introduction.....	35
3.3 Materials and methods .....	37
3.3.1 Plant material.....	37
3.3.2 Laboratory hot-air dryer .....	37
3.3.3 Moisture content.....	37
3.3.4 Hydrodistillation.....	38
3.3.5 Analysis of essential oil components by GC/FID .....	38
3.3.6 Multifunctional surface structures.....	38
3.3.7 Kinetic considerations .....	38
3.3.8 Statistical analysis .....	39
3.4 Results and discussion .....	40
3.4.1 Essential oil content losses during drying.....	40
3.4.2 Influence of moisture content during drying.....	42
3.4.3 Modeling of essential oil changes .....	44
3.4.4 Structural alterations of leaves caused by drying.....	45
3.4.5 Effect of drying temperature on essential oil components.....	47

3.5	Conclusions.....	49
	Acknowledgements.....	49
	References.....	49
<b>4</b>	<b>Kinetics of change in color and rosmarinic acid equivalents during convective drying of lemon balm (<i>Melissa officinalis</i> L.).....</b>	<b>53</b>
4.1	Abstract.....	53
4.2	Introduction.....	53
4.3	Materials and methods.....	55
4.3.1	Plant material .....	55
4.3.2	Drying experiments.....	56
4.3.3	Color measurement .....	56
4.3.4	Kinetic considerations.....	57
4.3.5	Image acquisition .....	58
4.3.6	Determination of rosmarinic acid equivalents .....	58
4.3.7	Statistical analysis.....	58
4.4	Results and discussion .....	59
4.4.1	Changes of color parameters during drying.....	59
4.4.2	Evaluation of CIELAB color parameters at 11%.....	64
4.4.3	Effect of drying temperature on rosmarinic acid equivalents.....	67
4.5	Conclusions.....	69
	Acknowledgements.....	69
	References.....	70
<b>5</b>	<b>Effect of convective-, vacuum- and freeze drying on sorption behavior and bioactive compounds of lemon balm (<i>Melissa officinalis</i> L.).....</b>	<b>73</b>
5.1	Abstract.....	73
5.2	Introduction.....	73
5.3	Materials and methods.....	75
5.3.1	Plant material .....	75
5.3.2	Drying systems.....	75
5.3.3	Measurement of equilibrium relative humidity .....	76
5.3.4	Mathematical description of sorption isotherms.....	77
5.3.5	Estimation of the isosteric heat of sorption.....	78
5.3.6	Internal leaf structure.....	78
5.3.7	Hydrodistillation and GC/FID analysis.....	78
5.3.8	Determination of rosmarinic acid by HPLC .....	79
5.3.9	Color measurement and image acquisition .....	79
5.3.10	Statistical analysis.....	80
5.4	Results and discussion .....	80
5.4.1	Moisture sorption data .....	80
5.4.2	Desorption isotherms .....	82
5.4.3	Isosteric heat of sorption.....	84
5.4.4	Volatile oil compounds in dried <i>M. officinalis</i> .....	87
5.4.5	Effect of drying method on structure of <i>M. officinalis</i> .....	89
5.4.6	Rosmarinic acid content in dried <i>M. officinalis</i> .....	91
5.4.7	Color of dried <i>M. officinalis</i> .....	92
5.5	Conclusions.....	93
	Acknowledgements.....	94
	References.....	94

<b>6</b>	<b>General Discussion.....</b>	<b>98</b>
6.1	Dynamic vapor sorption.....	98
6.2	Hygrometric method.....	99
6.3	Modeling of sorption isotherms and isosteric heat of sorption.....	101
6.4	Quality changes during drying.....	102
6.5	Essential oil content.....	103
6.6	Color and rosmarinic acid.....	104
6.7	Optimum drying temperature.....	105
6.8	Drying method.....	106
6.9	Outlook.....	107
	References.....	108
