Volume 118, No. 3, March 2016
Special Issue: Contaminants in fats and oils

Editorial
337 Contaminants in edible fats and oils – Fresh news
Bertrand Matthäus, Florence Lacoste and Ludger Brühl

Review Articles
339 Analytical approaches for measuring pesticides, mycotoxins and heavy metals in vegetable oils: A review
Fei Ma, Rao Wu, Peiwu Li and Li Yu
353 Fate of contaminants during the refining process of vegetable oils and fats: A calculation model
Gerrit van Duijn
361 Occurrence, determination, and assessment of mineral oils in oilseeds and vegetable oils
Ludger Brühl

Research Articles
373 International validation of the determination of saturated hydrocarbon mineral oil in vegetable oils
Florence Lacoste
382 Analysis and occurrence of dichloropropanol fatty acid esters and related process-induced contaminants in edible oils and fats
Jan Kuhlmann
396 3-MCPD- and glycidyl esters can be mitigated in vegetable oils by use of short path distillation
Frank Pudel, Patrick Benecke, Klaus Vosmann and Bertrand Matthäus
406 Development of analytical methods for the determination of free and ester bound 2-, 3-MCPD, and esterified glycidol in fishery products
Horst Karl, Sybille Merkle, Jan Kuhlmann and Jan Fritsche
418 Degradation of glycidyl esters in RBD palm oil as a function of storage conditions
Bertrand Matthäus, Klaus Vosmann, Petra Weitkamp, Dominik Grundmann and Hans Josef Kersting
425 Epoxy fatty acids in used frying fats and oils, edible oils and chocolate and their formation in oils during heating
Ludger Brühl, Rüdiger Weisshaar and Bertrand Matthäus
435 Amounts of the reactive aldehydes, malonaldehyde, 4-hydroxy-2-hexenal, and 4-hydroxy-2-nonenal in fresh and oxidized edible oils do not necessary reflect their peroxide and anisidine values
Michèle Viau, Claude Genot, Lucie Ribourg and Anne Meynier

Regular Articles

Research Articles

445 Synthesis of two new arsenolipids and their identification in fish
Uriel Arroyo-Abad, Zehan Hu, Matthias Findeisen, Dietmar Pfeifer, Jürgen Mattusch, Thorsten Reemtsma, and Christian Piechotta

Supporting information available online http://dx.doi.org/10.1002/ejlt.201400502

453 Cholesteryl esters from squid oil contain only saturated fatty acids, whereas the oil is rich in EPA and DHA and contains almost no saturated fatty acids
Guido Galliani and Marta Anna Brucka

Supporting information available online http://dx.doi.org/10.1002/ejlt.201400390

461 Antioxidant activity and anti-inflammatory effect of fruit extracts from blackcurrant, chokeberry, hawthorn, and rosehip, and their mixture with linseed oil on a model lipid membrane
Paulina Strugała, Witold Gładkowski, Alicja Z. Kucharska, Anna Sokół-Łętowska and Janina Gabrielska

475 A novel colorimetric assay coupled with clustering algorithms and genetic algorithm partial least squares can simultaneously determine cholesterol and monounsaturated/polyunsaturated fatty acids in biological samples
Gerard G. Dumancas, Mary Muriuki, Neil Purdie and Robin Purdie

486 Synthesis and physical properties of novel estolides from dicarboxylic acids and methyl ricinoleate
Arukali Sammaiah, Koriipara V. Padmaja and Rachapudi B. N. Prasad

Supporting information available online http://dx.doi.org/10.1002/ejlt.201500109

495 Tribology and oxidation studies of fatty acid sulfide derivatives synthesized via thiol-ene “Click” additions
Arukali Sammaiah, Koriipara V. Padmaja and Rachapudi B. N. Prasad
