

Contents

Plenary Speeches	1
Transplantation of micro- and nanostructured coatings by means of thermal spraying and PVD <i>Knödler, Otten, Freiburg, Möhwald, Maier, Biermann</i>	3
Surface modifications for adaption of tribological conditions in sheet-bulk metal forming processes <i>Löffler, Andreas, Engel, Weikert, Tremmel, Wartzack, Stangier, Tillmann, Merklein</i>	13
Session 1 - Properties	21
Influence of PVD-coating manufacturing steps on the subsurface integrity of hardened and soft AISI M3:2 high speed steel <i>Denkena, Grové, Lucas, Tillmann, Stangier</i>	23
Applications of high frequency induction thermography in the megahertz range for material characterization of turbine components <i>Frackowiak, Bruchwald, Reimche, Maier</i>	31
Application of high frequency eddy current technology for material Characterization of thin coatings <i>Bruchwald, Frackowiak, Reimche, Maier</i>	37
Investigation of Arc PVD Nitride and Oxy-nitride Hard Coatings for the Application in Plastics Processing <i>Bobzin, Brögelmann, Brugnara, Kalscheuer, Naderi</i>	45
Effect of the temperature-dependent residual stresses of diamond coated tools with different adhesion qualities on their interfacial fatigue strength <i>Skordaris</i>	53
Adhesion of TiC and MoN PVD coatings determined by innovative test methods directly on coated bearings <i>Bouzakis, Charalampous, Skordaris, Dimofte, Ene, Anderson, Chavez, Ekstrom, Fetty</i>	61
Correlation between the wear behavior of coated cemented carbide tools and coating's properties assessed by nano-indentations, nano and micro-impact tests <i>Bouzakis, Charalampous, Bouzakis, Kotsanis, Skordaris, Michailidis, Klocke, Bergs, Ottersbach, Busch</i>	69
Effect of PVD residual stresses on the film mechanical properties, brittleness and adhesion <i>Bouzakis, Kotsani, Charalampous, Skordaris, Breidenstein, Bergmann, Denkena</i>	79
Corrosion fatigue behavior of a coated high-strength steel <i>Michailidis, Stergioudi, Maliaris, Tsouknidas</i>	87
Session 2 – Coating Technology	95
Advances in deposition equipment and Process Technology for HIPIMS coatings for cutting tools <i>Leyendecker, Lemmer, Kölker, Schiffers</i>	97
Deposition and Characterization of (Ti,Al,Si)N Coatings by High Speed Physical Vapor Deposition for the Protection of Compressor Blades against Erosion <i>Bobzin, Brögelmann, Kalscheuer, Liang</i>	107
Machine Hammer Peening of Wear Resistant Thermally Sprayed Coatings <i>Rausch, Wiederkehr, Biermann</i>	115

PVD Coatings as a protection against degradation of Zirconia <i>Greuling, Winkel, Stiesch, Möhwald, Stemme, Dellinger, Hübsch</i>	123
Session 3 – Tribology	135
Manufacturing-induced Boundary Layers in Rolling Contacts <i>Brecher, Löpenhaus, Greschert</i>	137
Tribological investigation of silicon-modified DLC coatings for the dry forming of aluminum alloys <i>Abraham, Bräuer, Kretz, Groche</i>	145
Investigation of Tribological Behavior of Carbon Coatings in Dry Sheet Metal Forming <i>Steiner, Zhao, Tremmel, Merklein</i>	153
Influence of the Chemical Composition on the Properties of HPPMS (Cr _{1-x} Al _x)N/WS _y Coatings for the Application in Dry Cold Forging Processes <i>Bobzin, Brögelmann, Brugnara, Kruppe, Bastuerk, Klocke, Mattfeld, Hild, Trauth</i>	161
Dry strip drawing test on tool surfaces reinforced by hard particles <i>Freiße, Langebeck, Köhler, Seefeld, Vollertsen</i>	169
Selectively Oxidised Tool Steel Surfaces for Sheet Metal Forming <i>Yilkiran, Wulff, Almohallami, Holländer, Hübner, Möhwald, Behrens, Maier</i>	179
Advances in dry metal forming of low alloyed steels for cold forging using a (Cr,Al)N tool coating and surface structures on workpieces <i>Trauth, Hild, Mattfeld, Bastuerk, Broegelmann, Bobzin, Klocke</i>	185
PVD-/PECVD-DLC Thin Coatings as a Potential Solution for Tailored Friction Conditions for Dry Sheet Metal Forming Tools <i>Zhao, Tremmel</i>	193
Tool Optimization for Dry Forming Applications <i>Kunze, Mousavi, Stucky, Böttcher, Roch, Schomäcker, Lasagni, Brosius</i>	201
Session 4 – Machining Applications	209
Investigation of the Physical and Chemical Interactions between Optical Glasses and PtIr and (Cr,Al)N PVD coatings for Precision Glass Molding <i>Bobzin, Brögelmann, Kalscheuer, Engels</i>	211
Influence of the interlayer material selection for PtIr-coatings on the degradation mechanisms for use in Precision Glass Molding <i>Friedrichs, Dambon, Bernhardt, Dong, Klocke</i>	219
Investigations on load spectrum and adhesive wear development in hot stamping operations <i>Wieland, Neubauer, Andreas, Merklein</i>	227
Influence of residual stresses in PVD-coatings on cutting performance in turning of AISI 4140 <i>Breidenstein, Denkena, Richter, Vetter</i>	235
Coating wear behavior in dry HPC milling of carbon steel with thin TiAlN, AlTiSiN and AlCrN PVD-coatings <i>Grove, Denkena, Krödel, Hess</i>	241
Tool wear simulation of multilayer coated cutting tools <i>Klocke, Doebbler, Binder</i>	253
