

LIST OF CONTENTS

Editor's Preface	xxv
Preface – German/South African Scientific Collaboration	xxvii
Executive Summary.....	xxix
1. Economic Aspects of IWRM – an Introduction to the MOSA Pilot Project.....	1
1.1 Integrated Water Resources Management.....	1
1.1.1 Conceptual background	1
1.1.2 IWRM – a ‘fuzzy concept’?	2
1.2 The MOSA Project – Integrated Water Resources Management in the ‘Middle Olifants’ river basin, South Africa, Phase II.....	4
1.2.1 BMBF funding priority.....	4
1.2.2 MOSA project region	4
1.2.3 MOSA concept	6
1.2.4 Outlook	8
A. Middle Olifants South Africa (MOSA) and Kruger National Park Co-operation.....	14
2. MOSA Intervention Measures	17
2.1 Planning and Decision Support Tools for Integrated Water Resource Management on the river basin level in South Africa using the example of the Middle Olifants sub-basin.....	17
2.1.1 Objective.....	17
2.1.2 Research Design and Activities.....	19
2.1.3 Data quality and Data management.....	19
2.1.4 Administration/Laws	21
2.1.5 Methods	22
2.1.5.1 Project area	22
2.1.5.2 Planning level concept and river sub-catchments.....	26
2.1.5.3 Method, Planning and Decision Support Tools.....	27
2.1.6 Outcome and Impact.....	68

B.	Water Quality Planning in the Olifants River Catchment	74
2.2	Modelling and Capacity Building	82
2.2.1	Objective.....	82
2.2.2	Research Design and Activities.....	83
2.2.2.1	General Concept	84
2.2.2.2	Water Resources and Water Quality	84
2.2.2.3	Information System	96
2.2.2.4	Serious Game.....	106
2.2.3	Outcome and Impact.....	113
2.3	Online Water Quality Monitoring in the Olifants River Catchment	118
2.3.1	Objective.....	118
2.3.2	Research Design and Activities.....	120
2.3.2.1	Practical optimisation of the Mobile Monitoring Station.....	124
2.3.2.2	Measurement campaigns and measurement points	128
2.3.3	Outcome and Impact.....	142
2.3.4	Conclusion.....	144
C.	MOSA – WADER Cooperation	146
2.4	Economic analysis of water policy reforms in South Africa: The case of the Olifants river basin	149
2.4.1	Introduction	149
2.4.2	Transaction costs in water policy reforms.....	151
2.4.3	Water policy reforms and water use efficiency.....	155
2.4.4	Water policy reforms and water quality	157
2.4.5	Conclusion and policy implications	158
2.5	Water Market Value Chain Approach	163
2.5.1	Research objective and research design	163
2.5.2	Enhancing the Value Chain for Production and Services in the Water sector.....	165
2.5.2.1	Introduction/initial situation	165
2.5.2.2	Financial Analyses of refurbishment measures for the Groblersdal WWTPs in the Middle Olifants.....	167
2.5.2.3	Conceptual Design of a Value Chain Model for the water sector.....	169
2.5.2.4	Water Sector Value Chain Models	174

2.5.3	Analysis of the water sector in South Africa (and Middle Olifants)	175
2.5.4	Strategies of private sector involvement and Internationalisation.....	180
2.5.5	Sustainable water finance	188
2.5.5.1	Challenges of Financing in the Water Sector	188
2.5.5.2	Forfeiting to Finance Water Infrastructure Project Investments	189
2.5.5.3	A Vision of Sustainable Water Finance	189
2.5.5.4	Hybrid Finance with a Forfeiting Component as Pragmatic Approach	189
2.6	Operation and Maintenance of Water Facilities.....	195
2.6.1	Introduction	195
2.6.2	The Refurbishment Concept	198
2.6.3	Case Study: Modernisation of the Sewage Treatment Plant Groblersdal	201
2.6.3.1	Introduction to the STP Groblersdal.....	201
2.6.3.2	Modernisation Concept I: Replacement of missing equipment.....	206
2.6.3.3	Modernisation Concept II: Refurbishment: Installing aeration blowers	210
2.6.3.4	Modernisation Concept III: Refurbishment plus extension.....	214
2.6.3.5	Modernisation Concept IV: MBR Conversion with water reuse	218
2.6.3.6	Financial Summary.....	222
2.7	MBR Pilot Plant Development and Demonstration	225
2.7.1	Objective.....	225
2.7.2	Research Design and Activities.....	226
2.7.2.1	MBR Pilot Plant	226
2.7.2.2	Results of the MBR pilot plant in Germany.....	230
2.7.2.3	Results of the MBR pilot plant in South Africa	233
2.7.2.4	E-Learning	238
2.7.3	Outcome and Impact.....	239
3.	The need of Water Management Efficiency for successful IWRM Implementation – a short MOSA Project Summary	242
3.1	MOSA Findings.....	242
3.2	Water loss reduction as an example of efficient water management	245
3.3	Conclusion.....	246
