Preface	7	2.4.2.2 Chemical sensing: the nose and Jacobson's organ	46
1. Introduction	10	2.4.2.3 Radiation sensing: paired eyes and the parietal eye	47
1.1 Who's who in the reptiles	10	2.4.2.3.1 The paired eyes	47
1.1.1 Macroevolution and the "tree of life"	10	2.4.2.3.2 Eyelids: protecting the eyes	47
1.1.1.1 What are we talking about?	10	2.4.2.3.3 Eye size and pupil size	48
1.1.1.2 Basic features of reptiles	10	2.4.2.3.4 Eye function: sight	49
1.1.1.3 History of the reptiles	11	2.4.2.3.5 The third eye: pineal eye	50
1.1.1.4 The world of reptiles today	12	2.4.2.3.6 From reception to transmission: visual signals	51
1.1.2 <i>Sphenodon</i>	13	2.4.2.3.7 From transmission to communication: visual communication	51
1.2 Systematics	14	2.4.2.4 Mechanical sensing: the ear and the sense of touch	51
1.2.1 Microevolution	14	2.4.2.4.1 The ear	51
1.2.1.1 The species and the niche	14	2.4.2.4.2 Tactile sense	54
1.2.1.2 Using morphology for classifying and studying reptiles	15	2.4.3 The brain and the central nervous system	55
1.2.1.3 Intra-specific, geographic, genetic and environmental variation	15	2.4.4 Hormones	56
1.2.1.4 Species or subspecies	17	2.4.5 Behaviour	57
1.2.2 Taxa—nested units	18	2.4.5.1 General	57
1.2.3 Chromosomes, genes and genomes	18	2.4.5.2 Defensive behaviour	57
1.2.4 Taxonomy and systematics	20	2.4.5.3 Aggressive behaviour	57
1.3 Identification keys (structure and use)	22	2.4.6 Sounds	58
1.4 Reptilian nomenclature	22	2.4.7 Camouflage and mimicry	62
1.5 Vernacular names and Hebrew names	23	2.5 Size, shape and variation	63
2. The Life of Reptiles	25	2.5.1 Size	63
2.1 The mechanical substructure: the skeleton and the muscles	25	2.5.2 Morphology	64
2.1.1 General	25	2.5.3 Morphological variation	64
2.1.2 Skeletal tissues	25	2.5.3.1 Individual variation: asymmetry	64
2.1.2.1 Cartilage	25	2.5.3.2 Variation between individuals in a population, systematics and the Seligmann effect	65
2.1.2.2 Bone	25	2.5.3.3 Ontogenetic and phylogenetic variation: isometry and allometry	66
2.1.2.3 Cartilage-bone and dermal bone	25	2.5.3.4 Geographic variation	66
2.1.3 Principles of embryonic development	26	2.5.3.5 Sexual dimorphism	67
2.1.4 Segmentation	26	2.5.3.6 Sexual diergism	69
2.1.5 Muscle tissue	26	2.6 Reproduction	69
2.1.6 Principles of functional structure	27	2.6.1 Cyclicity	69
2.2 The body cover: integument	27	2.6.2 Courtship	70
2.2.1 Integument structure and moult	27	2.6.3 Copulation	70
2.2.1.1 Integument structure	27	2.6.4 Eggs	71
2.2.1.2 The moulting process	28	2.6.5 Clutch and oviposition	72
2.2.2 Scale types and osteoderms	29	2.6.6 Incubation and sex determination	74
2.2.2.1 Scale types	29	2.6.7 Embryonic development and ovoviviparity (live birth)	75
2.2.2.2 Osteoderms	30	2.7 The population and its survival	77
2.2.3 Colouration	31	2.7.1 Population size	77
2.2.3.1 General	31	2.7.1.1 Measuring population size	77
2.2.3.2 Chromatophores and changing colour	31	2.7.1.2 Effects on population size	78
2.2.3.3 Colour patterns	32	2.7.1.3 Social structure and population density	78
2.2.3.4 Polymorphism	33	2.7.2 Life span	78
2.3 Body requirements	34	2.7.3 Enemies in natural systems	79
2.3.1 Temperature and activity	34	2.7.3.1 Predators	79
2.3.1.1 Species-specific body temperature	34	2.7.3.2 Parasites and disease	81
2.3.1.2 Thermoregulation at a given time	35	2.7.3.3 Wounds	82
2.3.1.3 Daily activity and its annual variations	36	2.7.4 Autotomy and regeneration	82
2.3.1.4 Local adaptations of daily activity	38	2.7.4.1 Autotomy	82
2.3.2 The respiratory system and gas exchange	39	2.7.4.2 Regeneration	84
2.3.3 The circulatory system	40	2.7.4.3 Population aspects	85
2.3.4 Osmoregulation	40	2.8 Community ecology	85
2.3.5 Feeding	41	2.8.1 Individual competition	85
2.3.5.1 Food, feeding and digestive systems	41	2.8.2 Interspecific competition	86
2.3.5.2 Foraging for prey	42	2.8.3 Community and guild	87
2.3.5.3 Nocturnal reptiles by moonlight	44	Overview maps	88
2.4 Communication	44	3. The Reptiles of the Land of Israel	92
2.4.1 Diversity and common principles	44	3.1 Class Reptilia	92
2.4.2 Signals, senses and principal sensory organs	45	3.2 Order Testudines	92
2.4.2.1 General	45		

3.3 Order Crocodylia . . . . .	125	4.3.2 Institutions . . . . .	326
3.4 Order Squamata . . . . .	129	4.3.2.1 Museums and research . . . . .	326
3.4.1 General about the Squamata . . . . .	129	4.3.2.2 Universities and studies . . . . .	327
3.4.2 Suborder Lacertilia (Sauria) . . . . .	130	4.3.2.3 Organizations and conferences . . . . .	327
3.4.3 Suborder Amphisbaenia . . . . .	227	4.3.3 Literature and journals . . . . .	328
3.4.4 Suborder Ophidia (Serpentes) . . . . .	229	4.4 The relationship between people and reptiles . . . . .	329
3.4.5 Venoms and venomosity . . . . .	310	4.4.1 Awareness of reptiles . . . . .	329
3.5 A biogeographical aspect . . . . .	311	4.4.2 Reptiles as a resource . . . . .	330
3.5.1 The represented families and their global distribution . . . . .	311	4.4.3 Reptiles as enemies . . . . .	331
3.5.2 Global distribution of Israeli species . . . . .	311	4.4.4 Reptiles as divinities . . . . .	331
3.5.3 Distribution patterns in Israel and their relation to environmental factors . . . . .	313	4.4.5 Reptiles as pets . . . . .	333
3.5.4 Some typical habitats of reptiles in Israel and Sinai . . . . .	316	4.5 Snakebite . . . . .	334
<b>4. Appendices . . . . .</b>	<b>318</b>	4.6 Safety and first aid . . . . .	335
4.1 The history of reptile research in Israel . . . . .	318	4.6.1 Prevention . . . . .	335
4.2 Research—objectives and methods . . . . .	320	4.6.2 Identifying venomous snakes . . . . .	335
4.2.1 Objectives . . . . .	320	4.6.3 First aid for snakebite . . . . .	335
4.2.2 Methods . . . . .	320	4.7 Nature conservation . . . . .	336
4.2.2.1 Planning the study . . . . .	320	4.8 Hebrew names . . . . .	339
4.2.2.2 Techniques . . . . .	321	<b>5. Epilogue and Apologia . . . . .</b>	<b>342</b>
4.2.3 Equipment . . . . .	324	<b>A Special Photographic Appendix by the Publisher . . . . .</b>	<b>343</b>
4.3 Organizing activity with reptiles . . . . .	325	<b>References . . . . .</b>	<b>449</b>
4.3.1 The profession of herpetology . . . . .	325	<b>Index to Scientific Names . . . . .</b>	<b>489</b>
