

Contents

1. Introduction	13
1.1. Anisotropy in seismic imaging	13
1.2. Traveltime computation for seismic imaging	13
1.3. Scope and technical challenges of this study	14
2. Theoretical background	17
2.1. The elastic wave equation in anisotropic media	17
2.1.1. The equation of motion	17
2.1.2. Hooke's law and the elastic wave equation	19
2.2. Seismic velocities and traveltimes	20
2.2.1. Plane waves in homogeneous media	20
2.2.2. The high-frequency approximation	25
2.3. Symmetries of the stiffness tensor	29
2.3.1. Hooke's law in Voigt notation	30
2.3.2. Isotropy	32
2.3.3. Transverse isotropy	34
2.3.4. Orthotropy	37
2.3.5. Monoclinic and triclinic media	39
2.4. Pre-stack depth imaging in anisotropic media	39
2.4.1. Introduction	39
2.4.2. Kirchhoff pre-stack depth migration	41
2.4.3. Focusing pre-stack depth migration	43
2.4.4. Anisotropic Kirchhoff-type migration	45
3. Traveltime computation in isotropic media	47
3.1. Introduction	47
3.1.1. Historical development of eikonal solvers for isotropic media	47
3.1.2. Common characteristics of eikonal solvers	49
3.2. Principles of the EFD, FMM and FSM eikonal solvers	50
3.2.1. Iteration strategies	50
3.2.2. Finite Difference schemes in comparison	52
3.3. Numerical accuracy and computational performance	64
3.3.1. The testing models	64
3.3.2. Numerical accuracy tests	65
3.3.3. Computational performance	76
3.4. Conclusion on isotropic eikonal solvers	78
4. Traveltime computation in transversely isotropic media	79
4.1. Previous studies on the computation of anisotropic traveltimes	79

4.2.	Kinematics in VTI media	80
4.2.1.	VTI velocities in terms of the phase angle	80
4.2.2.	The Thomsen notation and approximation	82
4.2.3.	The pseudo-acoustic approximation	87
4.2.4.	Weakly-anisotropic vs pseudo-acoustic approximation	90
4.3.	FD modelling of VTI traveltimes	94
4.3.1.	Modelling the VTI eikonal equation	94
4.3.2.	Numerical accuracy and performance	96
4.4.	Kinematics in TTI media	104
4.4.1.	Generalizing VTI to TTI symmetry	104
4.4.2.	Analytical traveltimes in TTI media	106
4.5.	FD modelling of TTI traveltimes	107
4.6.	Conclusion on TI eikonal solvers	114
5.	Anisotropic Kirchhoff pre-stack depth migration	117
5.1.	A synthetic VTI/TTI experiment	118
5.1.1.	The recorded wavefield	118
5.1.2.	First QC: wavefield comparison	119
5.2.	Kirchhoff imaging of the VTI/TTI dataset	119
5.2.1.	Migrated images	119
5.2.2.	Common image gathers	121
5.3.	Kirchhoff imaging using VTI and isotropic models	122
5.3.1.	Migration using VTI traveltimes	122
5.3.2.	Migration using isotropic traveltimes	124
5.3.3.	Determining the best-fitting isotropic model	124
6.	Pre-stack depth imaging for geothermal exploration	129
6.1.	Geothermal exploration in southern Tuscany	129
6.1.1.	Motivation	129
6.1.2.	Geologic setting and previous studies	130
6.2.	Pre-stack depth imaging of the Tuscany data	132
6.2.1.	Reflection seismic data and pre-processing	133
6.2.2.	Near-surface velocity model building	133
6.2.3.	Migration velocity analysis	135
6.2.4.	Application of focussing depth migration	141
6.2.5.	Joint results of profiles 1 and 2	143
6.3.	Discussion and conclusion	144
7.	Conclusions	145
A.	Elliptical anisotropy	149
B.	Group velocity in VTI media	151
B.1.	Group velocity in terms of the phase angle	151
B.2.	Exact group velocity in VTI media	152
C.	Comparing traveltimes to wavelets	155
