J. Utz, V. Lichtenwald, G. Hirt
Short Synchro (STSS) – reduced shift travel for MT’s and DCT’s – Development of a synchronizer system for future demands in transmissions

Komponenten / Components

C. Ott, S. Eisenhuth, F. Jonas, T. Hofmann
New generation of hydraulic control modules with integrated pressure sensors for transmission control

A. Kooy, D. Eireiner, T. Krause, C. Herbers, B. Vögtle
Torsional damping systems for all relevant powertrains – Extending current damping technologies

C. Fouret
Fatigue strength of pendulum components in dual mass flywheel VDI 2016

T. M. Wolf
Optimizing the gearbox efficiency rate by rolling bearings – Six speed manual transmission for front wheel drive cars

Methodik / Methods

W. Geis-Drescher
Challenging flexibility in transmission production

R. Moehlmann
Modular design for driveline mechatronic systems – Global development strategy driven by automotive market demands in the context of global competition

U. Reichert, A. Albers, S. Ott, A. Radimersky
Software supported development of a battery electric vehicle powertrain considering the efficiency
**Antriebsstrang/Drivetrain**

- **M. Maisch,** **M. Homm,** **U. Keller**
  The highly efficient 9GH-Tronic plug-in hybrid transmission by Mercedes-Benz
  (Page 339)

- **S. Heller,** **S. Heppel**
  The new BMW hybrid powertrain with eight speed hybrid module
  (Page 353)

- **R. Kronstorfer,** **F. Kolb,** **U. Pinschmidt**
  Audi quattro – Four wheel drive becomes more efficient
  (Page 369)

**Automatikgetriebe/Automatic transmission**

- **W. Hinz,** **G. Bednarek**
  The new 8-speed FWD automatic transmission for General Motors / A. Opel AG
  (Page 383)

- **M. Seeberger,** **P. Leipold,** **R. Schmelzer**
  8-speed transmission development for motorsport application
  (Page 397)

**Simulation/Simulation**

- **A. Lampe,** **U. Mettin,** **R. Serway**
  Clutch control of stepped automatic transmissions by using a virtual DCT-structure – Power shifts made easy with generic control software
  (Page 405)

- **M. Jordan,** **P. Tenberge**
  Optimized start-stop-control of a P2-hybrid – Identification of critical parameters for comfort and timing
  (Page 421)

**NVH/NVH**

- **Y. Takeda,** **M. Kawaminami,** **M. Tsuchida,** **H. Takekawa**
  Gear whine noise reduction technology of new model transmission for FF-Hybrid Vehicle
  (Page 435)

</table>
R. König, A. Viehmann, S. Rinderknecht
Development of the transmission control for a high-speed multi-gear powertrain concept for electric vehicles

F. Pflüger
Virtual calibration of conventional & hybrid drivetrain strategy – Transfer drive strategy calibration from vehicle in a virtual environment

4. Internationale VDI-Konferenz / 4th International VDI Conference Getriebe in mobilen Arbeitsmaschinen / Transmissions in mobile machines

Legislative Vorgaben / Legislation
L. Frerichs
Voluntary commitment of the agricultural and construction machinery manufacturer – Continuous efficiency increase to reduce fuel consumption and CO₂ emissions

Aktuelle Getriebekonzepte / Transmission concepts
M. Graf, M. Brenninger, R. Heindl
CVDT – advanced hydrostatic power-split drivetrain – The next level in tractor transmission technology

Aktuelle Getriebekonzepte / Transmission concepts
G. Miller, W. Rebholz, R. Morrison
Introduction of cPower for Skidders

D. J. Franco, L. Dalla Palma, P. Rossi, F. Panizzolo
HVT high dynamics and power management strategies for wheel loader application
G. Jacobs, F. Straßburger, C. Pelger  
Power split drives with mechanical variators for small mobile machines  

J. Furmaniak  
Gearbox technology in a state of the art header drive for a combine harvester (in combination with belt drives)  

Systeme mit elektrischen Antrieben (1) / Systems with electric drives (1)  

D. Jünemann, M. Eghtessad  
Evaluation of electric working drives in agricultural machines  

G. Stempfer  
System optimization through electrification in agricultural – (and construction-) machinery – How to find goal oriented way of electrification?  

Komponenten und Subsysteme / Components and subsystems  

F. Markowsky  
Efficient friction – Use of modern tools in friction system development  

M. Weigel, U. Hafner, R. Mauch  
Advanced oil level switch technology for mobile equipment  

P. Shepherd  
Optimised flow control for lubrication and actuation of medium and heavy duty transmission applications – Concentric variable flow transmission charge pump  

J. Winchester, A. Favale, S. A. Martin  
Lightweight, highly efficient drive system
Systeme mit elektrischen Antrieben (2) / Systems with electric drive (2)

M. Hammer, W. Klinger
ZF electrification in agricultural machinery systems 681

P. Heuvelman, C. Christ, D. Ried
Design of diesel electric propulsion systems in off-highway applications 689

P. Rieder
Investigations to improve the efficiency of highly integrated electrical drive units for industrial truck applications – The forklift-truck story 699

O. Neuf
A chain is as strong as the weakest part 701

Systems Engineering

V. Warth, B. Reick, B. Bertsche, M. Geimer
Efficient analysis of complex continuously variable power split transmissions with multiple in- and outputs 719

D. Engelmann, W. Müller, M. Geimer
Project “Line Traction 3” – Mechanical driveline with active wheel hubs 731

M. Ribaldone, F. Galli, S. Dominoni, S. Tremolada
Development of an innovative suspension and traction system for compact tractor 743
## International VDI-Conference CVT in automotive applications

### R. Hiraku
- Technologies need to have more flexibility

### Drive system

- **G. Hellenbroich, P. Janssen, I. Steinberg**
  - CVT in comparison to other transmission concepts – Fuel consumption in state-of-the-art B-class vehicles

### Transmission Concepts – Methods

- **M. Oguri, H. Itou, N. Akiyama**
  - Enhanced performance of next generation LINEARTRONIC®

- **A. Teubert**
  - How to build better CVTs

- **A. Pigeard, S. Strauss, T. van Dongen, L. Römers**
  - Start/Stop Coasting and CVT – An effective, customer perceivable and attractive fuel-saving combination

- **A. Yildiz, A. Piccininni, F. Bottiglione, G. Carbone**
  - Testing the CMM model of chain-CVT transmissions in steady-state and shifting conditions

- **C. Lauinger, A. Götz, B. Walter, M. Finsterbusch, E. Simon**
  - CVT Hybrid – Low emission, high performance

</tbody>
</table>
Alternative continuous variable concepts for automotive and automotive-related applications

G. Mclndoe, E. Taskiran
CVT powerpath solutions using variglide continuously variable planetary for maximum fuel economy

H.-D. Schneider, R. Rompelberg
The cone-ring-transmission will go into production!

J. W. E. Fuller, C. J. Gaskell
High efficiency “full-toroidal” traction drive CVT; technology improvements and application to front wheel drive cars

Peer Reviewed

M. Kraft, W. Pfieger, S. Henzler, C. Nizzola, S. Rinderknecht
Simulation-based study of drivetrain electrification to improve driving dynamics

B. Kohn, M. Otto, K. Stahl
Noise reduction potential of waveform flank modifications – Topological waveform and waveform-like modifications provide promising optimization perspectives

S. Foulard, S. Rinderknecht, R. Fietzek
Paradigm change in transmission design by online condition prediction – Cost-efficient and resource-optimized lightweight design based on the eLIFE and ecoLIFE³ concepts
