I	PLENARY PAPERS	9
1	M.Abdel-Maksoud. Vortical Structures on a Blunt Hull Form at Large Drift Angle	11
2	C.C.Chang. Recent Developments in Vorticity Force Theories for Vortex Flows Around Finite Bodies	12
3	G.Winckelmans. Recent Developments in Vortex Particle-Mesh (VPM) Methods and Applications	16
II	REGULAR PAPERS	17
4	A.A.Aparinov & A.V.Setukha. Solution of Aerodynamic Problems of Moving Objects with Vortex Method	19
5	O.A.Averkova A.K.Logachev K.I.Logachev & E.I.Tolmacheva. Numerical Modeling of Air Flow at the Input-Outlet Unit Range of Action	22
6	C.Bernier M.Gazzola R.Ronsse & P.Chatelain. Coupling a Vortex Particle-Mesh Method to a Multi-Body System Solver for the Simulation of Articulated Swimmers	24
7	M.Bruschewski & S.Grundmann. Experimental Investigation of the Flow Regimes in a Constant-Diameter Swirl Chamber	27
8	W-C.Chen L-C.Yao F-S.Hsu & K-C.Chang. Velocity Measurements in Near-Wake Region of Turbulent Wake behind a Circular Cylinder	30
9	A.Chorny. Modeling of Local Impact of a Cold Jet on Human Skin Surface	32
10	K-R.Lai C-C.Chu & C-C.Chang. A Thin-Walled Taylor Column Surrounding a Bathtub Vortex in Rotating Tank	34
11	S.A.Dergachev & G.A.Shcheglov. The Vortex Loops Based Algorithm for 3D Flow Simulation Around Bluff Bodies	36
12	Ya.A.Dynnikov G.Ya.Dynnikova & S.V.Guvernnyuk. Modelling of Pulsating Jets	38
13	D-F.Feder & M.Abdel-Maksoud. Potential of Adaptive Vorticity Confinement for RANS Simulations and Hybrid RANS-LES	40
14	M.Fuchiwaki & K.Tanaka. Vortex Ring Developed in Wake of a Flapping Butterfly Wing and its Contribution to Dynamic Lift	41
15	M.A.Gotovskiy S.A.Isaev S.P.Kolpakov Yu G.Suhorukov & N.N.Trifonov. One Promising Direction of Dimpling Usage for Heat Transfer Enhancement in Heat Exchangers	43
16	A.Groß & N.Kornev. Development and Validation of the Overset Grid Library Bellerophon for OpenFOAM	44
17	S.A. Isaev & A. Schelchkov. Intensification of Vortex Streams in the Flow Around Thick Lifting Surfaces due to Creation of Oval Dimpled Reliefs	46

18 R.Kasper J.Turnow & N.Kornev. Simulation of Particle Fouling and its Influence on Friction Loss and Heat Transfer on Structured Surfaces using Phase Changing Mechanism	48
19 N.Kornev & N.Abbas. Vorticity Structures and Turbulence in the Wake of Full-Bottomed Ships	51
20 H.Kröger N.Abbas M.Dhone & N.Kornev. Resolution of Tip Vortices by Coupling Vortex Method with Grid Based Simulation	53
21 H.Kröger & N.Kornev. Synthesis of Turbulence using Vortex Elements	56
22 Ch.Krüger N.Kornev & L.Greitsch. The Effect of Propeller Tip Roughness on Tip Vortex Strength and Cavitation Extension	59
23 K.Kuji & K.Fukuda. Numerical Investigation on Unsteady Motion and Deformation of Vortical Structures on an Accelerated / Decelerated Airfoil using a Grid-Free Vortex Method	63
24 K.S.Kuzmina & I.K.Marchevsky. On the Efficiency of Tangential Components of the Velocity Boundary Condition Satisfaction in Vortex Method for 2D Flows Simulation	65
25 N.V.Luc L.R.Zuhail & T.Uchiyama. Simulation of Flow Around Two Cylinders in Tandem Arrangement by Vortex in Cell Method Combined with Immersed Boundary Method	67
26 I.K.Marchevsky & G.A.Shcheglov. The Numerical Scheme for Tangential Components of the Velocity Boundary Condition Satisfaction on 3D Bodies in Vortex Method	70
27 J.-J.Miau C.-C.Lin & S.-A.Lin. An Experimental Study on the Interaction of Wind Turbine Wake and Atmospheric Boundary Layer	72
28 C.Mimeau G.-H.Cottet & I.Mortazavi. A Vortex Penalization Method for the Simulation of 3d Incompressible Flows	75
29 T.Mizuno H.Aono & H.Ishikawa. Vortex Structure in the Wake behind a Car Door Mirror	76
30 T.Nagata T.Nonomura S.Takahashi Y.Mizuno & K.Fukuda. Investigation on Wake Vortex Structure of a Heated/Cooled Rotating Particle in Compressible Flows by Direct Numerical Simulation	78
31 P.Parmentier P.Chatelain & G.Winckelmans. A Fourth Order Vortex Particle-Mesh Method for Compressible Flows	80
32 R.A.Putra & D.Lucas. CFD-Simulations on Rotating Flows with Bubble Entrainment	82
33 S.Samarbakhsh & N.Kornev. Hybrid Method Based on Embedded Coupled Simulation of Vortex Particles in Grid Solution	85
34 H.J.Spietz M.M.Hejlesen & J.H.Walther. Simulation of Impulsively Started Flow Past a Sphere and a Disc using Iterative Brinkman Penalization	87
35 R.Vitkovicova & Y.Yokoi. The Experimental and Numerical Investigation about a Wake Behind Two Circular Cylinders in Staggered Arrangement	89
36 G.Voropaiev & I.Zagumennyi. Boundary Layer Perturbations Generated by Locally Deformable Surface	91
37 R.Wang & B.Chen. Numerical Simulation of Cryogen Spray Cooling by a Three-dimensional Vortex Method	94
38 Y.Yokoi Ch.N.Nayeri & Ch.O.Paschereit. The Flow Characteristic Around Two Symmetrical Airfoils in the Close Arrangement State	96
