

Table of contents

Die Schienenneubaustrecke Dresden-Prag – Geologische/geotechnische Untersuchungen als Grundlage einer anspruchsvollen Verkehrsinfrastrukturplanung <i>S. Kulikov, O. Krentz (Sächsisches Landesamt für Umwelt, Landwirtschaft und Geologie); T. Frühwirt (TU Bergakademie Freiberg)</i>	1
Rock Mechanics in the Swedish Nuclear Waste Disposal Program <i>D. M. Ivars (Swedish Nuclear Fuel and Waste Management Co, Stockholm); H. Hökmark (Clay Technology AB, Lund); E. Hakami (Geosigma AB, Stockholm, Sweden)</i>	15
Tightness of Salt Rocks and Fluid Percolation <i>W. Minkley, D. Brückner, C. Lüdeling (IfG Institut für Gebirgsmechanik GmbH, Leipzig)</i>	53
Fracturing processes for brittle rocks – a numerical Study <i>X. Li, X. Li, (School of Resources and Safety Engineering, Central South University, Changsha, China); H. Konietzky (TU Bergakademie Freiberg)</i>	73
Herausforderungen bei der Durchführung einer großräumigen Gebirgsvereisung am Beispiel des Gefrierschachtprojekts Ust-Jaiwa <i>J. Franz, N. Hentrich (Deilmann-Haniel GmbH, Dortmund)</i>	101
About the behaviour of shafts and tunnels in a faulted rock mass <i>A. Poisel (IGT Geotechnik und Tunnelbau ZT GmbH, Salzburg, Österreich); R. Poisel (TU Wien, Österreich)</i>	111
Stability and deformation of backfilled shafts <i>H. Konietzky, Q. T. Nguyen (TU Bergakademie Freiberg)</i>	125
Rock slope stability considering surface load <i>H. Lin, H. Wang, P. Cao (Central South University, Changsha, China)</i>	143
Modeling of the Hydromechanical Behavior of Rock Salt at Grain Scale using DEM <i>C. Müller, E. S. Kuate (DBE Technology GmbH, Peine); T. Frühwirt, H. Konietzky (TU Bergakademie Freiberg)</i>	165
Determination of the 3D in situ stress conditions for the geotechnical planning and the construction of the Brenner Base Tunnel <i>C. Reinhold (Galleria di base del Brennero - Brenner Basistunnel BBT SE, Innsbruck, Österreich); R. Braun (Consultancy in Rock Mechanics, Caputh)</i>	183

Modelling of interaction of bentonite based sealing element and host rock <i>R. Blaheta, M. Hasal, Z. Michalec (Institute of Geonics CAS, Ostrava, Czech Republic)</i>	205
The geothermic Fatigue hydraulic fracturing experiment at Äspö Hard Rock Laboratory, Sweden <i>A. Zang, O. Stephansson (German Research Center for Geosciences GFZ, Potsdam)</i>	221
Rock Mass Scale Effects on Tool Wear in Hardrock Tunnelling – practically significant and scientifically neglected? <i>R. Plinninger, J. Düllmann (Dr. Plinninger Geotechnik, Bernried)</i>	235
Roof Bolting in Potash Mining – Monitoring of Long-Term Performance <i>T. Frühwirth (TU Bergakademie Freiberg); M. Nitschke, J.-P. Schleinig (K + S AG, Kassel); J. Sippel, (K+S KALI GmbH)</i>	251
Herausforderungen Tunnelbau bei 110 % Neigung am Beispiel der neuen Standseilbahn Schwyz – Stoos <i>T. Kobler (Amberg Engineering AG, Regensdorf, Schweiz)</i>	259
 More papers	
Improved Support method for the deep roadway in weakened rocks under high stress: a case study <i>P. Cao; R. Cao; Y. Zhong (Central South University, Changsha, China); Y. Mu, Q. Gao (Jinchuan Group Co. Ltd, Gansu, China)</i>	271
Current state of the mining-induced consequences at the coalfield Lugau/Oelsnitz <i>S. Harms, H. Konietzky (TU Bergakademie Freiberg); R. Stoll (Glauchau)</i>	291
Prediction of Classification of Rock burst Intensity Using the Cloud Model-Based Approach <i>K. Zhou (Central South University, Changsha, China)</i>	303
Optimization and analysis on excavation procedure for biased tunnel in weak surrounding rock <i>R. Huang; X. Zhang; H. Wu; J. Wang (Central South University, Changsha, China)</i>	313
