Zusammenfassung	VII
Abstract.....	IX
Abbreviations	XIII
1. Introduction	1
1.1. Zearalenone	1
1.2. Physical and chemical properties	1
1.3. <i>cis</i> -Zearalenone	2
1.4. Occurrence, human exposure and maximum limits	3
1.5. Mammalian metabolism	4
1.6. Toxicity	6
1.7. Estrogenicity.....	6
1.8. Instrumental analysis.....	8
1.9. Aims of the thesis	11
2. Results and discussion	13
2.1. Comparison of analytical methods for the determination of zearalenone in edible oils	13
2.2. Automated solid phase extraction coupled online with HPLC-FLD for the quantification of zearalenone in edible oil	30
2.3. Photochemical <i>trans</i> -/ <i>cis</i> -isomerization and quantitation of zearalenone in edible oils	46
2.4. Preparation of ¹³ C-labeled <i>cis</i> -zearalenone and its application as internal standard in stable isotope dilution analysis	67
2.5. <i>In vitro</i> phase I metabolism of <i>cis</i> -zearalenone	83
2.6. Oxidative <i>in vitro</i> phase I metabolism of <i>cis</i> -zearalenone.....	100
2.7. Estrogenicity of novel phase I and phase II metabolites of zearalenone and <i>cis</i> -zearalenone	119
3. Final discussion	131
3.1. Advances in the methodology on ZEN in edible oil	131
3.2. Investigations on the formation and occurrence of <i>cis</i> -ZEN	133
3.3. <i>In vitro</i> phase I metabolism of <i>cis</i> -ZEN	136
3.4. Estrogenicity of ZEN, <i>cis</i> -ZEN and their biotransformation products....	139
4. Conclusion and future perspectives	141

5. Bibliography	143
Publications	155
Acknowledgements	159
