Preface	3
About the study	4
Acknowledgements	5
List of figures	9
List of tables	11
Executive summary	13
Ergebnistelegamm (deutsch)	17
1 Introduction and scope of the study	22
1.1 <i>Recent trends of autonomous driving in Germany</i>	24
1.2 <i>Use cases of autonomous driving</i>	26
2 Approach	28
3 Autonomous driving – a topic worth noting?	36
<i>Briefly</i>	37
3.1 <i>Interest, knowledge, and sources of information</i>	38
3.2 <i>Ready to hand over?</i>	40
3.3 <i>Connotations of autonomous driving, and autonomous vehicles</i>	42
4 Autonomous driving and mobility	48
<i>Briefly</i>	49
4.1 <i>What needs do autonomous vehicles address?</i>	50
4.2 <i>Do people's general attitudes towards the car correspond with their attitudes towards autonomous vehicles?</i>	58
4.3 <i>Are changes in mode choice ahead?</i>	59
4.4 <i>For what kind of trips are autonomous vehicles perceived as beneficial?</i>	62
5 Time use	66
<i>Briefly</i>	67
5.1 <i>Current time use patterns</i>	68

5.2 Riding in an autonomous vehicle: anticipated time use	70
6 Autonomous driving – a solution for the mobility-impaired?	74
<i>Briefly</i>	75
6.1 Do mobility-impaired transport users have a specific interest in cars that drive themselves?	78
6.2 Autonomous driving – individual door-to-door mobility for all?	79
7 Acceptance and trust	80
<i>Briefly</i>	81
7.1 Are people willing to use an autonomous vehicle?	82
7.2 And what about their willingness to replace transport modes?	84
7.3 How do people assess use cases of autonomous driving?	85
7.4 What emotional responses do people exhibit towards use cases of autonomous driving?	86
7.5 What are favored options for intervention and control?	89
8 Conclusions	92
List of references	98
Appendix	106
<i>German scales, and their English equivalents</i>	107
