Foreword — V

List of Figures — VII

List of Tables — XIII

## General Section

- 1 Renewable Energy, Climate Change, and Sustainability — 3**  
Ulf Moslener, Menglu Zhuang
  - 1.1 Challenges Related to Climate Change and Sustainability — 3
  - 1.2 Climate Policy and Renewable Energy — 4
    - 1.2.1 The UN Climate Policy Process — 5
    - 1.2.2 A Variety of Climate Policy Instruments at the Regional and National Levels — 6
    - 1.2.3 How This Trend Shapes the Banks' Behavior — 14
  - 1.3 A Future-Proof Financial System: Sustainable Finance — 17
    - 1.3.1 Sustainability and the Financial System — 17
    - 1.3.2 Regulatory initiatives for sustainable finance — 18
  - 1.4 Change Ahead — 20  
References — 21
  
- 2 Electricity Supply Systems: The Current and Future Role of Renewable Sources of Energy — 23**  
Jerrit Hilgedieck, Jelto Lange, Martin Kaltschmitt
  - 2.1 Introduction — 23
  - 2.2 Global Trends and Key Drivers — 25
    - 2.2.1 Growing Energy Demand — 25
    - 2.2.2 Environmentally Friendly Energy Supply — 30
    - 2.2.3 Expansion of Renewable Energies — 31
  - 2.3 Global Energy Supply and Renewable Energies — 32
    - 2.3.1 Hydropower — 34
    - 2.3.2 Photovoltaics — 35
    - 2.3.3 Wind Energy — 36
    - 2.3.4 Biomass — 37
    - 2.3.5 Geothermal Power — 38
    - 2.3.6 Concentrated Solar Power — 38
  - 2.4 Developing Trends and Needs within the Electricity System — 39
    - 2.4.1 Renewable Energies — 40

2.4.2	Challenges —	47
2.5	Conclusion —	52
	References —	55
<b>3</b>	<b>Social Acceptance of Renewable Energy Technologies —</b>	<b>59</b>
	Robert Sposato, Nina Hampl	
3.1	Social Acceptance of Renewable Energy Technologies: An Introduction —	59
3.2	From Non-Technical Factors to Social Acceptance, Acceptability, and Support: Conceptual and Historic Developments —	60
3.3	Contextual, Personal, and Social-Psychological Factors —	64
3.3.1	Contextual Factors —	64
3.3.2	Personal Factors —	71
3.3.3	Social-Psychological Factors —	71
3.4	Conclusions —	74
	References —	76
<b>4</b>	<b>Capacity Building in Renewable Energy and Energy Efficiency Finance —</b>	<b>87</b>
	Alexander Boensch, Volker Jaensch	
4.1	Introduction: What Is Capacity Building and Why Is It needed? —	87
4.2	RE and EE Training Needs along the Project Life Cycle —	90
4.3	Project Financing as a Major Educational Component in RE and EE Capacity Building —	92
4.4	Experiences with the Green Banking Capacity Building Programme on Green Energy and Climate Finance in Southeast Asia —	93
4.4.1	Introduction to the Case Study —	93
4.4.2	Educational Components of the Green Banking Programme —	95
4.5	Practical Experience with the Programme in Southeast Asia —	97
	Lessons Learned from the Capacity Needs Assessments —	97
4.6	Lessons Learned from Conducted Training and Seminars, as well as Network Events —	100
4.7	Future Development of the Green Banking Programme —	102
<b>5</b>	<b>The Legal Framework of Promoting Renewable Energies: A Cross- National Study —</b>	<b>105</b>
	Christoph Torwegge, Thies Goldner	
5.1	Introduction —	105
5.1.1	Short Overview of the Historical Background of the Development of Promotion Systems for Renewable Energy —	105

5.1.2	Other Sectors (than Electricity) in which RE Are Promoted —	107
5.2	Is Governmental Promotion of RE (Still) a Prerequisite for an Investment in RE Projects? —	110
5.2.1	Overview of the Development of Electricity Prices and Generation Costs —	110
5.2.2	The Route to “Grid Parity” and Future Prospects —	112
5.2.3	Secondary Sources of Revenue in RE Projects —	114
5.3	International and National Concepts of Promotion of RE —	115
5.3.1	International Regulations for the Funding of RE, Particularly in the EU —	115
5.3.2	Overview of the Range of Different National Promotion Systems —	127
5.3.3	Further National Promotion Systems; In Particular State Aid and Tax Benefits —	137
5.4	Key Requirements for an Investment into National RE Markets —	139
5.4.1	Stability of the Regulatory Framework —	139
5.4.2	Mitigation of Political Risks —	143
5.4.3	Freedom of Market Access and Regulatory Access Limitations for Foreign Investors —	144
5.4.4	Investment Protection —	145
5.4.5	Requirements in Respect to the Design of the National Electricity Market —	157
5.4.6	Grid-Related Requirements —	162
5.5	Overview of Typical Securities —	164
5.5.1	Characteristics of Non-Recourse Project Structures —	164
5.5.2	National Enforcement Risks —	169
	References —	170
<b>6</b>	<b>Project Finance of a Renewable Energy Project —</b>	<b>177</b>
	Jörg Böttcher	
6.1	Foundations of Risk Management in Project Financing —	177
6.1.1	Risk and Risk Management —	177
6.1.2	Main Risk Management Goal in Project Financing: Sourcing Stable Cash Flows —	179
6.2	The Financing Process in Four Steps —	181
6.2.1	Introduction —	181
6.2.2	Risk Identification and Risk Allocation in Practice —	189
6.2.3	Risk Allocation in Theory —	195
6.2.4	Risk Quantification and Financial Engineering —	201
6.2.5	Optimization of a Financial Structure —	207
6.2.6	Project Financing in a Crisis —	216
6.3	Summary —	221

<b>7</b>	<b>Bankability of Project Contracts: Requirements of the Lender — 223</b>
	Daniel Marhewka
7.1	Introduction — 223
7.2	Defining Project Contracts — 224
7.2.1	Project Contracts during the Life Cycle of a Renewables Project — 224
7.2.2	Multi-Contracting versus a Full Wrap Turnkey Concept — 225
7.2.3	Securing the Land — 226
7.2.4	Construction-Related Contracts — 227
7.2.5	Grid Connection and Feed into the Grid — 229
7.2.6	Other Construction-Related Contracts — 230
7.2.7	Operation Project Contracts — 230
7.2.8	PPAs, Direct Marketing Agreements — 231
7.3	Other Transaction Documents — 232
7.3.1	Share Purchase Agreement, Asset Purchase Agreement — 232
7.3.2	Shareholder Agreement — 232
7.4	Concerns of a Lender which Need to Be Considered — 232
7.4.1	Insolvency of a Party Involved in the Project — 233
7.4.2	Survival of the Project — 233
7.4.3	Finalization, Transfer of Ownership and Operation of the Project — 234
7.4.4	Subcontractors — 234
7.4.5	Contractual Framework for the Duration of the Project — 234
7.4.6	Security of Subsidies and/or Sale of Energy, Access to the Grid — 235
7.5	Measures in Project Contracts or Related thereto to Safeguard Project Risks — 235
7.5.1	Scope of Services/Performances — 235
7.5.2	Transfer of Title — 236
7.5.3	Financial Strength of the Counterparty — 237
7.5.4	Securities Related to Project Contracts — 238
7.5.5	Step-In Rights — 239
7.5.6	Direct Agreements — 240
7.5.7	Best Effort Amendment Clause Related to the Lender — 240
7.5.8	Building Reserves — 240
7.6	Conclusion — 241
	Annex: Template Direct Agreement — 242
	Literature — 251
<b>8</b>	<b>Special Legal Aspects of Renewable Energy Projects in Emerging Markets — 253</b>
	Daniel Reichert-Facilides
8.1	Introduction — 253
8.2	Investment Treaties — 256
8.3	Implementation Agreements — 258

- 8.4 Equator Principles and IFC Performance Standards — 260
- 8.5 Anti-Corruption Laws and Economic Sanctions — 262
- 8.6 Arbitration — 264
- 8.7 Barriers to Trade, in Particular Local Content Requirements — 265
- 8.8 Foreign Currency Risk and Capital Controls — 267
- 8.9 Export Credit and Investment Insurance — 268

## **9 The Function of Securities within Project Financing — 271**

Julian Hoff, Björn Neumeuer

- 9.1 General Remarks — 271
- 9.2 Types of Securities — 272
  - 9.2.1 Material Securities — 272
  - 9.2.2 Personal Securities — 272
- 9.3 Purpose of Securities — 272
  - 9.3.1 Securing the Project Itself — 273
  - 9.3.2 Securing in Particular the Lender's Position — 273
- 9.4 Types of Securities — 273
  - 9.4.1 Material Securities — 273
  - 9.4.2 Personal Securities — 275
- 9.5 Choosing the Right Security — 276
  - 9.5.1 Securities to Ensure the Project Itself — 276
  - 9.5.2 Securities to Ensure the Lender's Position — 277
- 9.6 Remarks and Recommendations — 280

## **10 Power Purchase Agreements — 281**

Claus Urbanke, Jens Göbel

- 10.1 Power Purchase Agreement ("PPA") — 281
  - 10.1.1 Corporate PPA — 281
  - 10.1.2 Renewable Corporate PPA — 281
- 10.2 Seller's Motivation to Conclude a PPA — 282
  - 10.2.1 Two or More Cannot Be Wrong — 282
  - 10.2.2 Profit Generation — 282
- 10.3 Prerequisite for Project Financing — 283
- 10.4 Buyer's Motivation to Conclude a PPA: Partial Hedge — 283
- 10.5 Carbon Neutrality or Renewable Energy Targets — 284
- 10.6 Characteristics of a PPA — 285
  - 10.6.1 Commodity Related Risk — 285
  - 10.6.2 Non-Commodity-Related Characteristics — 290
- 10.7 Conclusion — 295

**11 Developing a Renewable Energy Project: Dos and Don'ts — 297**

Rosa Tarragó

- 11.1 Introduction: Dos and Don'ts — 297
- 11.1.1 Renewable Energy Project Demand — 297
- 11.1.2 Challenges Associated with Non-Recourse Project Financing — 298
- 11.1.3 Opportunities in Developing Countries — 298
- 11.2 Structure of the Section — 299
- 11.3 The Idea Phase — 299
- 11.3.1 Technical Dos and Don'ts of Site Selection — 301
- 11.3.2 Legal and Institutional Environment — 304
- 11.3.3 Finance and Partnerships — 305
- 11.4 The Conceptual Phase — 308
- 11.4.1 Technical Feasibility — 309
- 11.4.2 Commercial Feasibility — 310
- 11.4.3 Financial Feasibility — 311
- 11.4.4 E&S Feasibility — 314
- 11.5 The Contractual Phase — 319
- 11.5.1 Land Agreement (Lease or Purchase) — 321
- 11.5.2 Power Purchase Agreement — 322
- 11.5.3 Connection Agreement — 327
- 11.5.4 Implementation Agreement (IA) — 328
- 11.5.5 EPC and O&M Agreements — 329
- 11.5.6 Finance Agreement — 331
- 11.6 Conclusion — 332

**12 Cost of Capital for Renewable Energy: The Role of Industry Experience and Future Potentials — 335**

Florian Egli, Bjarne Steffen, Tobias S. Schmidt

- 12.1 Introduction — 335
- 12.2 Lessons from the Past — 337
- 12.3 Reduction of Cost of Capital: Luck or Experience? — 339
- 12.4 Potential for RET Cost Reductions in Europe — 341
- 12.5 Conclusion — 344
- References — 345

**13 The Role of Green State Investment Banks in Financing Low-Carbon Projects — 349**

Anna Geddes

- 13.1 Overview — 349
- 13.2 Introducing Green State Investment Banks — 349
- 13.3 SIB Instruments, Programs, and Financing Channels — 351
- 13.3.1 The Roles of Green SIBs and How They Offer Additional Value — 354

13.4	Lessons Learned and the Path Forward — 356
	References — 357
<b>14</b>	<b>Renewable Energy Finance by Multilateral Development Banks — 359</b>
	Bjarne Steffen, Tobias S. Schmidt
14.1	Renewable Energy Projects in Developing Countries — 359
14.2	The Landscape of Multilateral Development Banks (MDBs) — 360
14.3	MDB Activities in Renewable Energy Finance — 361
14.4	Financial Instruments and the Project Cycle — 363
14.5	Conclusion — 364
	References — 365
<b>15</b>	<b>Choice of Adequate Insurance Coverage — 367</b>
	Michael Härig
15.1	Introduction — 367
15.2	Core Issues of Risk and Insurance Management — 368
15.2.1	What Can Be Damaged? — 368
15.2.2	When Do the Risks Occur? — 368
15.2.3	Prevention Measures — 369
15.2.4	Who Bears the Risks? — 369
15.2.5	Which Insurances Should be Taken Out? — 369
15.2.6	Who Should Insure? — 370
15.2.7	How to Insure? — 371
15.3	Property Insurance — 371
15.3.1	Insured Items — 371
15.3.2	Insured Location — 373
15.3.3	Insured Period — 373
15.3.4	Insured Interest — 373
15.3.5	Insured Perils — 374
15.4	Liability Insurance — 375
15.5	Summary — 376
<b>16</b>	<b>The Debt Financing Process in Project Financing — 377</b>
	Jörg Böttcher
16.1	Introduction — 377
16.2	Project Documentation, Structuring, Credit Analysis, Rating, and Credit approval — 377
16.2.1	Bank-Internal Credit Decision Process — 377
16.2.2	Information Memorandum — 378
16.2.3	Letter of Intent: Flower Letter — 378
16.2.4	The Term Sheet — 380
16.2.5	Rating of Renewable Energy Project Loans — 380

16.2.6	Fulfillment of Covenants: Achieving First Loan Disbursement —	<b>382</b>
16.3	Projekt Loan Documentation: Overview —	<b>382</b>
16.4	The Concept of “Collateral” in Project Finance Transactions —	<b>383</b>
16.4.1	Aims of Collateral Agreements —	<b>384</b>
16.4.2	Typical Collateral Agreements in Renewable Energy Project Financing —	<b>384</b>
16.5	Syndication —	<b>385</b>
16.6	Credit Monitoring and Re-Rating —	<b>386</b>
16.7	Due Diligence: Documenting a Project for Credit Assessment —	<b>387</b>
16.7.1	Introduction to Due Diligence —	<b>387</b>
16.7.2	Due Diligence: Process and Roles —	<b>388</b>
16.8	Summary —	<b>390</b>
	Further Reading —	<b>391</b>

## **Offshore Wind Energy**

<b>1</b>	<b>Technology of Offshore Wind Energy Turbines: Current Status and Developments —</b>	<b>395</b>
	Uwe Ritschel	
1.1	Introduction: Why Offshore Wind Energy —	<b>395</b>
1.2	Basics about Offshore Wind Energy —	<b>397</b>
1.2.1	Why All Wind Turbines Have Three Blades and a Horizontal Axis —	<b>397</b>
1.2.2	Offshore Wind Resource —	<b>398</b>
1.2.3	Energy Production of a Large Offshore Wind Turbine —	<b>400</b>
1.2.4	Cost of Energy —	<b>403</b>
1.3	Offshore Wind Turbines —	<b>405</b>
1.3.1	Elements of an Offshore Wind Turbine —	<b>405</b>
1.3.2	Evolution of Technology —	<b>405</b>
1.3.3	Drivetrain Concepts —	<b>408</b>
1.3.4	Electrical Concepts —	<b>411</b>
1.3.5	General Electric, MHI Vestas, and Siemens Gamesa —	<b>412</b>
1.3.6	Loads on OWT —	<b>416</b>
1.3.7	Wind Turbine Control and Load Mitigation —	<b>418</b>
1.3.8	Special Requirements for Offshore Wind Turbines —	<b>418</b>
1.3.9	New and Alternative Technologies —	<b>419</b>
1.4	Offshore Wind Farms —	<b>420</b>
1.4.1	Layout of OWF and Efficiency —	<b>420</b>
1.4.2	Substructures and Foundations —	<b>422</b>
1.4.3	Installation —	<b>423</b>
1.4.4	Grid Connection —	<b>426</b>
1.4.5	Operation and Maintenance —	<b>427</b>

1.4.6	Offshore Wind Farms from 1990 to Now —	427
1.5	Other Topics —	432
1.5.1	Certification and Standards —	432
1.5.2	Approval Process —	433
1.5.3	Environmental Impact, Acceptance, and Possible Synergies —	434
1.6	Final Remarks —	435
	References —	436
<b>2</b>	<b>Project Contracts of an Offshore Wind Farm —</b>	<b>439</b>
	Matthias Hirschmann	
2.1	Introduction —	439
2.2	Contract Design —	440
2.3	General Contractor Agreements (EPC – Engineering, Procurement and Construction) —	440
2.4	Multi-Contracting —	441
2.5	Alliance Contracting —	442
2.6	General Terms and Conditions (GTCs) —	442
2.7	The Different Stages of a Wind Farm Project —	444
2.7.1	Phase 1: Construction —	444
2.7.2	Phase 2: Operation —	451
2.7.3	Phase 3: Dismantling —	453
<b>3</b>	<b>The Completion Risk in Offshore Wind Construction Projects: How Good Risk Management Adds Value to Large Asset Construction Projects —</b>	<b>455</b>
	Peter Frohböse	
3.1	The Motivation and Importance of Risk Management —	455
3.1.1	Why Risk Management At All? —	455
3.1.2	Why Is Completion of Construction Projects a Risk? —	455
3.1.3	Which Benefits Can a Risk Management Offer? —	456
3.2	The Basic Terms and Ideas —	457
3.2.1	The Risk —	457
3.2.2	The Methods of Risk Assessment —	459
3.2.3	The Risk Register —	460
3.2.4	The Risk Manager —	460
3.2.5	The Typical Types of Risks —	462
3.2.6	The Life Cycle of a Risk —	462
3.3	Technology, Stakeholders, and Phases —	463
3.3.1	The Elements of a Typical Offshore Wind Farm Project —	463
3.3.2	The Stakeholders —	464
3.3.3	The Phases and Processes —	467
3.3.4	Risk Distribution and Risk Allocation —	468

3.4	The Risk Management Process —	<b>469</b>
3.4.1	General —	<b>469</b>
3.4.2	The Step by Step Process —	<b>470</b>
3.4.3	Initial Step: Objective and Context Definition —	<b>472</b>
3.4.4	Risk Identification —	<b>472</b>
3.4.5	Risk Assessment and Analysis —	<b>473</b>
3.4.6	Risk Mitigation and Steering —	<b>474</b>
3.4.7	Risk Management and Control —	<b>475</b>
3.5	The Summary and Hands-On Guidance —	<b>477</b>
	References —	<b>478</b>
<b>4</b>	<b>Energy Yield Assessments —</b>	<b>481</b>
	Volker Barth, Beatriz Cañadillas, Patricia Chaves-Schwinteck	
4.1	Introduction —	<b>481</b>
4.2	Wind Resources Offshore —	<b>481</b>
4.2.1	Structure of the Marine Atmospheric Boundary Layer —	<b>481</b>
4.2.2	Logarithmic Wind Profile —	<b>483</b>
4.2.3	Atmospheric Stability —	<b>484</b>
4.2.4	Turbulence Intensity —	<b>485</b>
4.2.5	Wind-Related Implications for Offshore Power Generation —	<b>486</b>
4.3	Offshore Wind Data —	<b>486</b>
4.3.1	Measurement Towers —	<b>486</b>
4.3.2	Wind LiDAR Data —	<b>488</b>
4.3.3	Long-Term Databases —	<b>491</b>
4.3.4	Mesoscale Models —	<b>492</b>
4.4	Wind Flow in Offshore Wind Farms —	<b>492</b>

5.4.11	Training and Standards — 531
5.4.12	Spare Parts — 532
5.5	Operational Challenges — 533
5.5.1	Interface Risks — 533
5.5.2	Example of Grid-Related Challenges — 533
5.5.3	Defects and Serial Defects — 534
5.5.4	Communication Challenges: TETRA Radio, Mobile (Data) Network — 536
5.5.5	End-of-Warranty Inspections — 536
5.5.6	IT Security — 537
5.5.7	Pandemic Crisis Management — 537
5.6	Outlook — 539
<b>6</b>	<b>Supportive System for Offshore Wind Energy: The Example of Germany — 541</b>
	Thoralf Herbold, Thorsten Kirch
6.1	Introduction — 541
6.2	Legal Framework/Regime before the 2017 Amendment — 542
6.3	Changes in the EEG 2017 — 542
6.3.1	Auctioning Model — 543
6.3.2	Commissioning Date before January 1, 2021 — 544
6.3.3	Commissioning Date between January 1, 2021 and December 31, 2025: Transitional Model — 544

- 6.3.4 Commissioning Date starting January 1, 2026 – Central Model — **546**
- 6.3.5 General Provisions for All Auctions — **547**

**7 Renewable Energy in Belgium: The Support Regime for Offshore Wind Farms — 549**

Dieter Veestraeten, Nino Vermeire

- 7.1 Introduction — **549**
- 7.2 The European Backdrop: Policy and Targets — **550**
- 7.3 The Belgian Legal Framework: Competence and Regulation — **550**
  - 7.3.1 Green Certificates — **551**
  - 7.3.2 Support Period — **554**
  - 7.3.3 Cable Subsidy — **555**
  - 7.3.4 MOG: Modular Offshore Grid — **556**
  - 7.3.5 State Aid? — **557**
- 7.4 Conclusion — **558**

**Onshore Wind Energy**

**1 Technology of Onshore Wind Energy Converters: Current Status and Developments — 561**

Alois Schaffarczyk

- 1.1 Introduction — **561**
- 1.2 Current Onshore Wind Turbine Technology — **561**
  - 1.2.1 Towers and Wind Turbine Blades — **562**
  - 1.2.2 Drive Train — **564**
  - 1.2.3 Electrical Parts — **565**
- 1.3 Outlook into the Future — **566**
- 1.4 Summary and Conclusions — **567**
  - References — **567**

**2 Energy Yield Assessment — 569**

Lars Tallhaug

- 2.1 Introduction to Wind — **569**
- 2.2 Variability — **569**
- 2.3 Geographical Variations of Wind — **572**
- 2.4 Introduction to Energy Capture from a Wind Turbine — **573**
- 2.5 Methods for Wind Resource Assessment — **576**
  - 2.5.1 Anemometry — **577**
  - 2.5.2 Remote Sensing — **577**
  - 2.5.3 Long-Term Correction — **578**

- 2.5.4 Wind Flow Models — 581
- 2.5.5 Energy Losses in a Wind Farm — 582
- 2.5.6 Uncertainties — 585
- 2.5.7 Post-Construction Energy Yield Assessment — 587
- References — 590
  
- 3 Support Scheme for Onshore Wind Farms in France — 593**  
Sibylle Weiler, Ann-Claire Beauté
- 3.1 General Background — 593
- 3.2 Ambitious Wind Energy Targets — 593
  - 3.2.1 Previous Energy Targets — 593
  - 3.2.2 New Energy Targets — 594
  - 3.2.3 Challenging of the FiT Scheme — 596
  - 3.2.4 The Current Support Scheme: The Feed-in Premium (“FiP”) (“complément de remuneration”) — 598
  - 3.2.5 Since 2017: A New Support Scheme for Smaller Projects — 603
  - 3.2.6 The Tendering Procedure (“Appel d’offres”) — 605
  
- 4 Supportive System: The Example of India — 611**  
Prashant Agrawal
- 4.1 Introduction of Power Sector in India — 611
- 4.2 Evolution of Wind Energy in India — 612
- 4.3 Challenges Faced by the Wind Sector in the Country and the Way Forward — 614

## Solar Energy: Photovoltaics

- 1 Technology of PV-Modules: Current Status and Economic Assessment — 619**  
Jörg Böttcher
- 1.1 Photovoltaic Projects — 619
- 1.2 Energy-Economic Importance — 619
- 1.3 Technical Solutions — 620
- 1.4 Planning of PV-Projects — 622
- 1.5 System Losses between PV Module and Feed-In Point — 624
- 1.6 Markets for PV-Installations — 626
- 1.7 Photovoltaics and Specific Energy Yield — 628
- 1.8 Photovoltaics and the Development of Total Investment Costs — 628
- 1.9 Relationship of Total Investment Costs and Applicable Tariff — 630
- 1.10 Solar Energy and LCOE — 633

<b>2</b>	<b>Energy Yield Assessment for Photovoltaic Systems — 639</b>
	André Schumann
2.1	Introduction — 639
2.1.1	General Methods and Resources for PV Yield Assessments — 639
2.1.2	Motivation and Use of Independent Expertise — 639
2.2	Yield Assessment Process — 640
2.2.1	Characterization of the Site Influences — 640
2.2.2	Relevant Technical Aspects of the PV System — 641
2.2.3	Meteorological Resource Assessment — 641
2.2.4	Data Processing — 643
2.2.5	Determination of Irradiation Losses — 645
2.2.6	Module Level Losses — 647
2.2.7	Balance of System Losses — 650
2.2.8	Post Processing and Presentation of Results — 655
2.2.9	Additional Content of the Yield Report — 657
2.3	Quality Guidelines — 657
2.4	Critical Assumptions, Limits, and Uncertainties — 658
2.4.1	Meteorological Data — 659
2.4.2	Irradiance for Tracking Systems — 659
2.4.3	Soiling — 660
2.4.4	Snow — 660
2.4.5	Module Technology — 661
2.4.6	Temperature Losses Considering Wind Effects — 661
2.5	Outlook and Conclusion — 661
	References — 662
<b>3</b>	<b>Key Policies behind the Development of Solar Energy in Chile — 665</b>
	Miguel Saldivia, Matías Guiloff
3.1	Introduction — 665
3.2	Bespoke Auctions for Solar Energy Projects — 666
3.2.1	Scenario before the Legal Reform — 667
3.2.2	Relevant Amendments to the New Regulation — 668
3.2.3	Availability of Public Lands — 672
3.3	Pending Challenges and Final Remarks — 675
<b>4</b>	<b>Supportive System: The Example of Indonesia — 677</b>
	Yolanda Tobing
4.1	Background — 677
4.2	General Nature of the Support Regime for Solar PV Development in Indonesia — 679
4.3	When Is the Feed-In Tariff Secured? — 681

## **Solar Energy: Concentrated Solar Power**

- 1 Technology of Solar Thermal Projects: Current Status and Developments — 715**  
Andreas Wiese
- 1.1 Basic Considerations — **715**
- 1.1.1 Usable Solar Radiation for CSP Power Plants — **715**
- 1.1.2 Basic Energy Chain and Classification of Technologies and Systems — **717**
- 1.1.3 Classification of Technologies — **718**
- 1.2 Parabolic Trough Power Plants — **719**
- 1.2.1 Components — **719**
- 1.2.2 Power Plant System — **724**

1.3	Fresnel Power Plants —	<b>727</b>
1.3.1	Components —	<b>727</b>
1.3.2	The Power Plant System —	<b>730</b>
1.4	Solar Tower Power Plants —	<b>733</b>
1.4.1	Components —	<b>733</b>
1.4.2	The Power Plant System —	<b>738</b>
1.5	Energy Storage Technologies and CSP —	<b>739</b>
1.5.1	Aspects of the Integration of Storage Systems —	<b>739</b>
1.5.2	Different Types of Storage Systems for CSP —	<b>742</b>
1.6	Environmental Impact —	<b>743</b>
1.7	Cost and Economics —	<b>746</b>
1.7.1	Cost of Components and Systems —	<b>746</b>
1.7.2	Example Economic Calculation —	<b>747</b>
1.8	Market Status, Potentials, and Perspectives —	<b>749</b>
1.8.1	Market Status —	<b>749</b>
1.8.2	Technical and Economic Potentials —	<b>749</b>
1.8.3	Future Technical and Economic Developments —	<b>750</b>
