Abstract	
Nomenclature	1
Introduction	4
Integrity Assessment of the WWER-400 RPV	5
Trepanning Technology	7
Irradiation Loading.....	10
Monte Carlo Program TRAMO	10
Input Data and Calculation Option.....	10
Comparison of Neutron Fluences.....	12
Comparison Calculation and Experiment	12
Results of the Neutron Fluence Calculations	13
Materials and Specimens.....	14
Beltline Welding Seam SN0.1.4	16
Forged Base Metal Ring 0.3.1.....	19
Overlay Cladding	19
Testing and Evaluation.....	21
Tensile Testing According to DIN EN ISO 6892-1	21
Charpy Pendulum Impact Test.....	21
Master Curve Testing According to ASTM E1921	21
Ductile Fracture Toughness Testing According to ASTM E1820.....	22
Test Results	22
Unit 1 RPV	22
Beltline welding seam SN0.1.4.....	23
Forged base metal ring 0.3.1.	28
Unit 2 RPV	33
Beltline welding seam SN0.1.4.....	33
Unit 4 RPV	36
Beltline welding seam SN0.1.4.....	36
Forged base metal ring 0.3.1.	43
Overlay cladding	51
Small-Angle Neutron Scattering Investigations.....	59
Experiments.....	60

Results	60
Finding of a reference material condition	60
As-irradiated conditions	61
Summary and Conclusions.....	64
References	68
Acknowledgement.....	73
Appendix	74
