
Contents

1	Introduction	1
1.1	Structure of the thesis	8
2	Open Quantum Systems	11
2.1	Quantum Langevin Equation of Motion	13
2.2	Quasi Adiabatic Path Integral	16
2.3	Redfield Theory	26
2.4	Adiabatic-Markovian Approximation	34
2.4.1	Bloch Equations	34
2.4.2	Non-Equilibrium Bloch Equations	36
3	Dissipative Landau-Zener-Stueckelberg Dynamics	43
3.1	Two-level System and Landau-Zener Model	45
3.2	Full Dissipative Landau-Zener Model for Single or Mixed Noises .	49
3.3	Tunneling Fluctuations in the Dissipative Landau-Zener Model . .	51
3.4	Ohmic Transversal and Longitudinal Noise	55
3.4.1	Asymmetric mixed noise	57
3.5	Numerical Details for QUAPI	58
3.6	Landau-Zener-Stueckelberg Oscillations	61
3.6.1	Single-Passage Landau-Zener Dynamics	64
3.6.2	Successive Avoided Level Crossings and Stueckelberg Os- cillations	67
4	Summary and Outlook	71
5	Publications	75
5.1	Dissipative Landau-Zener Quantum Dynamics with Transversal and Longitudinal Noise	76

5.2 Stueckelberg Oscillations in a Two-State Two-Path Model of a Conical Intersection	77
Appendix	79
A Transformation	79
Bibliography	81
